MONEY TO DOWN STATEMENT NO. 1.

The money used in Oregon to carry the State against Statement No. 1, will not be raised to any large extent in Oregon.

If a candidate subscribes to Statement No. 1, all he will have to do to win the election of a Senator will be to ratify in the legislature the people's choice.

THE COLLINWOOD FIRE.

Terrible disasters and appalling calamities must accompany the present progressive age. There is so much to be done our people are in such a hurry.

There was fault somewhere—these young lives were a sacrifice to some inexcusable neglect or lack of precaution. In the noon daylight there is no reason why pupils should not escape from a burning school building.

The Family Physician

The best medicines in the world cannot take the place of the family physician. Consult him early when taken ill.

Ayer's Pills. Bilious attacks, sick-headaches, indigestion, constipation, dizziness—these are some of the results of an inactive liver.

trending disaster of Collinwood will sink deep into the memory of all those on whom the life and security of assemblages of persons depends.

TO BE VOTED ON IN JUNE.

To increase the annual appropriation to the State University to \$125,000. To require railroads to issue passes to all state, county and district officials.

To appropriate \$100,000 for national guard armories. To give sheriffs exclusive control of county prisoners.

To increase the number of Judges of the supreme court from three to five (by legislature).

To give political parties proportionate representation in the legislature. To provide for the recall of public officials and to elect their successors.

To take from the district attorney the power of indictment and invest it exclusively in grand juries. To exempt certain property from taxation.

To prevent the legislature from amending or repealing initiative laws (by the state senate).

To give each city or town the sole right to regulate its business houses, gambling, theatres and the like as it pleases.

To extend suffrage to women. The corrupt practice act. Limiting the amount of money that candidates may spend for campaign purposes.

Requiring all legislative candidates to subscribe to Statement No. 1. (By U. R.)

For the division of Wasco county and the creation of another county, with Hood River as the county seat.

Prohibiting fishing for salmon, except with fish-wheels between Celilo and Astoria.

Prohibiting the fishing for salmon above the mouth of the Sandy.

Enlarging the powers of the Port of Portland in the interests of better navigation on the lower Willamette and Columbia rivers.

For an amendment of section 28 (originally intended to be section 29) of article 3 of the constitution, changing the compensation of members of the legislature to \$400 for each regular session, and \$10 per day for each extra session, instead of \$2 per day and mileage.

Section 23 provides the time when laws take effect, and the proposed amendment is therefore wrongly numbered.

ELECTING U. S. SENATORS.

Argument may be found for any cause. When argument is so flimsy, however, that it can not possibly carry conviction the cunning advocate takes a new tack; he appeals to prejudice.

A bill of this character will be introduced in the House by the chairman of the Committee on Interstate and Foreign Commerce, to which committee it will be referred.

ELECTRICITY IN CHURCH EDIFICES.

Few realize what an important part electricity plays in the work about the modern church edifices. There is considerable work constantly required about a church building and the clean, noiseless, efficient and economical electric motors do this work better than any other power in the world.

The new First Baptist church of Worcester, Mass., is electrically equipped throughout. The lighting of this large building is done by means of systematic principles and the incandescent lamps have been artistically arranged for effects which could be produced by no other kind of illumination.

Five motors, aggregating 30 h. p., do the work about this church. The largest motor, ten horse-power, drives a fan in connection with the heating system and assures an even temperature throughout the large auditorium.

The organ blower is operated by an eight-horse power motor, and a fan for the ventilation of the laboratories is driven by a four horse-power motor.

The installation of a vacuum cleaning system, driven by a four horse-power motor, makes it unnecessary to use brooms or sweepers to keep the building clean. The cost of cleaning has thus been greatly reduced in comparison with the old methods of doing the work by hand.

Another interesting motor application is the operation of the hood curtains and asbestos curtain between the main auditorium and the Sunday school room. This curtain is about thirty-five feet wide and thirty feet high, weighing about three tons. The motor will raise this curtain noiselessly in less than half a minute.

The installation of a vacuum cleaning system, driven by a four horse-power motor, makes it unnecessary to use brooms or sweepers to keep the building clean. The cost of cleaning has thus been greatly reduced in comparison with the old methods of doing the work by hand.

that it makes the festival practically self supporting. The orchestra is now arranging its ninth season and another tour to the Pacific ocean has been arranged under the direction of the Great Western Lyceum and Musical Bureau.

RAILROAD REGULATION LEGISLATION.

"The Interstate Commerce Commission," says President Roosevelt, in his special message, "should be provided with a means to make a physical valuation of any road as to which it deems this valuation necessary."

Senator La Follette, of Wisconsin, has introduced in the Senate a bill providing for the physical valuation of railroads. The bill has been referred by the Committee of Interstate Commerce to the Interstate Commerce Commission for its opinion.

The Interstate Commerce Commission is on record as favoring legislation along this line. What action the Committee on Interstate Commerce and the Senate will take remains to be seen. Some discussion of the subject in the Senate may be looked for.

President Roosevelt further says in his message: "When combinations of interstate railroads must obtain Government sanction; when it is no longer possible for an interstate railway to issue stock or bonds, save in the manner approved by the Federal Government; when that Government makes sure that the proceeds of every stock and bond issue go into the improvement of the property and not the enrichment of some individual or syndicate; when, whenever it becomes material for guidance in the regulatory action of the Government, the physical value of one of these properties is determined and made known—there will be eliminated from railroad securities that element of uncertainty which lends to them their speculative quality and which has contributed much to the financial stress of the recent past."

Of all the legislation relating to common carriers engaged in interstate commerce, the most likely measure to receive proper consideration in the first session of the 60th Congress will be one giving the Interstate Commerce Commission authority to advise stock and bond issues and to see to it that the proceeds from the sale thereof are devoted to the improvement of the property and not the enrichment of some individual or syndicate.

A bill of this character will be introduced in the House by the chairman of the Committee on Interstate and Foreign Commerce, to which committee it will be referred.

THE CIRCUS COMBINE.

Much has been said and printed relative to the combine which was made the past year in which the big circuses of this country were amalgamated. Before Norris and Rowe entered into the arrangement, they gave the subject great thought. It has been their aim to give the public a clean, moral, refined performance, and that they succeeded in this is best illustrated by their past success. Wishing to give the public more for its money each year has been a constant problem that they have worked on incessantly.

When the powers that be of the big combine approached Norris & Rowe and invited them to participate in the benefits to be derived from the union, they gave matter further consideration. After so doing they saw a way clear in the saving of vast sums of money that had been wasted in useless warfare for territory, and in divers other ways to increase in size, and in the general excellence of their entertainment. By the agreement entered into, the Barnum and Bailey circus, will make the New England states; the Sells-Foran circus has been retired from service entirely; the Ringling Bros. will make the middle west and Southern states, and the Greater Norris and Rowe circus has been given the territory west of the Rockies.

The trust has a special representative in each of the big cities of Europe booking the big sensational acts; securing the strangest freaks, and rare animals. These acts and novelties are equally distributed among the three big circuses. The Greater Norris and Rowe circus has been enlarged to such an extent this year that it is now on a par with the other big shows in the combine. Their engagement in San Francisco this winter which extended over a month, was the most successful ever played by a tented exhibition in the history of the west.

MR. VOTER. Do you think the man who seeks election to the legislature really intends to represent YOU if he refuses to sign the following:

"I further state to the people of Oregon as well as to the people of my legislative district, that during my term of office I will always vote for that candidate for United States senator in congress who has received the highest number of the people's votes for that position at the general election next preceding the election of a senator in congress, without regard to my individual preference."

An unkind contemporary refers to Representative Bourke Cockran as a "political double-bug." It would have been much more dignified and polite to refer to him as a political pin-wheel. And it would be pretty hard to keep track of his revolutions at that.

The fact that there have been no recent estimates on the increased cost of the Panama canal ought to go somewhat toward restoring financial confidence.

It is reported that a ship has just arrived at Boston carrying 30,000 bushels of beans. Beans to Boston makes a variety in the metaphorical alliteration of "coals to Newcastle."

A Georgia Journal says, "Col. John Temple Graves has beat it to the land of milk and honey." What probably was meant was the land of mint and money.

With all the free advertising it has received in the past year and a half, it certainly seems as though Brownsville ought to be able to start something that would pay.

It remains to be seen whether Uncle Joe Cannon is as successful in shepherding convention delegates as he is in running Congress to suit his own book.

Women as Well as Men Are Made Miserable by Kidney and Bladder Trouble.

Kidney trouble preys upon the mind, discourages and lessens ambition; beauty, vigor and cheerfulness disappear when the kidneys are out of order or diseased.

Kidney trouble has become so prevalent that it is not unusual for a child to be born afflicted with weak kidneys. If the child urinates too often, if the urine scalds the flesh, or if, when the child reaches an age when it should be able to control the passage, it is yet afflicted with bed wetting, depend upon it, the cause of the difficulty is kidney trouble, and the first step should be towards the treatment of these important organs. This unpleasant trouble is due to a diseased condition of the kidneys and bladder, and not to a habit as most people suppose.

Women as well as men are made miserable with kidney and bladder trouble, and both need the same great remedy. The mild and the immediate effect of Swamp-Root is soon realized. It is sold by druggists, in fifty-cent and one-dollar size bottles. You may have a sample bottle by mail free, also a Home of Swamp-Root pamphlet telling all about Swamp-Root, including many of the thousands of testimonial letters received from sufferers cured. In writing Dr. Kilmer & Co., Binghamton, N. Y., be sure and mention this paper. Don't make any mistake, but remember the name, Swamp-Root, Dr. Kilmer's Swamp-Root, and the address, Binghamton, N. Y., on every bottle.

REGISTER! If you are a good citizen register in time to vote in the primaries. Do it now! Elections are decided in the primaries. This is where your vote really counts. If the country would be better off without you, do not register. If you think yourself of enough importance to be counted a worthy citizen inform yourself of the things that are to be done and be sure to register so that you will be in a position to help do them. Registration closes in about three weeks, April 7. Don't wait until the last moment for some unforeseen incident may prevent your registering. You will take a notion that you will want to vote in the primary election about the next day after registration closes. It will be too late then, and THERE IS NO WAY IN WHICH YOU CAN VOTE IN THE PRIMARY UNLESS YOU ARE REGISTERED. Former registration is not sufficient. REGISTER THIS YEAR. Attend to this VERY, VERY IMPORTANT DUTY without further delay.

SANITARY CONDITIONS OF HOP FIELDS AND FRUIT FARMS.

Every year an appreciable number of typhoid fever cases are reported arising in hop fields and fruit farms during picking season, and so far as is possible the cause of these cases is traced to the insanitary conditions in the hop yard or fruit farm or from impure water or milk.

Such conditions, if allowed to continue, are not only dangerous to those employed, but are liable at any time

to result in serious financial reverses to those engaged in these important industries. This is especially true in the hop yards throughout the Willamette Valley, in the fruit fields of theogue River Valley and Hood River, and in the vicinity of Brewster, in which localities fruit, berries and vegetables are extensively grown. In any of these places, a typhoid fever epidemic arising at harvest time, which is the most likely season, would undoubtedly interfere greatly if not entirely prohibit the disposal of their products to give the public a clean, moral, refined performance, and that they succeeded in this is best illustrated by their past success. Wishing to give the public more for its money each year has been a constant problem that they have worked on incessantly.

KNOCKS THE NAVY

There is nothing particularly edifying in the investigation that has been going on this week before the Senate Committee on Naval Affairs. The thing all came up through the magazine article written some months ago by Henry Reuterhahl, a naval artist, who made the discovery that everything was all wrong with the Navy. Mr. Reuterhahl is not a naval expert, not a war ship constructor, nor anything in that line. He is merely an artist who has done a good deal of ship drawing and ship painting and who in the course of his work has been thrown into contact with many naval officers, each of whom has some particular hobby as is only natural with men of any profession who are interested in their work. Some of these officers, in perfectly good faith probably, declared that the American warships carried their armor belt too low. Others thought that the ships did not have enough freeboard, others thought that the ammunition hoists could be improved and others thought that the turrets were not properly protected. All these points are technical matters that furnish subjects of discussion for the naval boards of all the great powers, and all of them have been figured out in the light of the best naval construction with each successive warship that the American navy has built. But Mr. Reuterhahl bunched all of the criticisms and made it appear that the whole American Navy was fit for little but the scrap heap. Therefore the Senate Committee on naval affairs has had numerous witnesses before it. Admiral Converse, Admiral Capps and a number of others, all of whom have agreed that the charges of bad construction are unfounded. It was not till the committee got before it Commander Sims this week that they found anyone to agree with Mr. Reuterhahl. Commander Sims said that all of the charges brought against the navy were true beside many others that had not been brought. He said that American sailors did not know how to shoot in spite of the fact that they now hold most of the gun records of the world. And he said other things of the same sort. But as soon as he started in to say disagreeable things the committee shut him up as though they were afraid of finding out something. This did not seem very good either. If there is anything in the charges against the navy, it ought to be brought out. That is what the investigating committee is for. If the charges are untrue, they will be easily disproved. The committee of Commander Sims sound on the face of them like unreasonable criticism, but the Naval Committee is never going to get at the truth by shutting up the witness and not allowing him to talk. The subject needs to be threshed out and the more publicly the better.

A SOLDIER'S FAREWELL.

The following verses composed by one of our soldier boys after attending the funeral of a brother soldier, in the Philippines, when he states an officer ordered the band to play "Always in the Way," a popular rag-time song, the order being carried out much to the abhorrence of the Marines attending:

We don't object to hiking through a hundred miles of sun, We don't object to charging up a mountain on the run, We don't object to living on a soldier's ration straight, We don't object to dying, but to reach the golden gate, With ragtime funeral marches which the band is made to play— It does sound a little awkward "You are Always in the Way."

We don't ask any favors from you; you may do the worst you can, For congress can't make a gentleman where God has failed on man, Away with all this talk, it's bad air, dry and warm, Those common gags about respect that's due the uniform, When shoulder straps can make a man lose half his little head, And make him joke the holiness that wraps his country's dead,

Yet still we will salute you, and we'll say "yes, sir," too, But we salute the shoulder straps we would not speak to you, You're lower than a buzzard picking flesh from bones, You're farther down beneath us than a dog a Molok owns, When the flag is on our coffins you'll tell the band to play, That good old rag time hymnal, "You are Always in the Way."

You have stolen from the dead man the last solemn funeral rite, You have put a daub of mud on the flag for which we fight, You ain't disgracing the service, but you know you have at least, Showed how little man was in you, and how near you were a beast, Few men who hold commissions would tell the band to play, The rag time dance hall music when a soldier is laid away,

You're unjust, Mr. Officer, I don't know what's your name, Nor who it was who raised you, but you're wicked just the same, I hope they'll weed the service soon, of all such men as you, I will give the service credit now of having very few,

Shame on the man who wears the straps and tells the band to play, At the funeral of a soldier, "You are Always in the Way."

Catarrh Cannot Be Cured with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrh is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Catarrh Cure is taken internally, and acts directly on the blood and mucous surfaces. Hall's Catarrh Cure is not a quick medicine. It is prescribed by one of the best physicians in this country for years and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing Catarrh. Send for testimonials free.

F. J. CHENEY & CO., Props., Toledo, O. Sold by druggists, price 75c. Take Hall's Family Pills for constipation.

The marriage of Mrs. Maggie Hopkins and Mr. Fred Herzog took place at the home of the bride on Eleventh and John Quincy Adams street on Sunday afternoon. The groom is a contractor, and recently arrived in this city.

PERUNA EDITORIAL NO. 2.

Dr. Hartman has claimed for many years that Peruna is an EXCELLENT CATARRH REMEDY. Some of the doctor's critics have disputed the doctor's claim as to the efficacy of Peruna.

Since the ingredients of Peruna are no longer a secret, what do the medical authorities say concerning the remedies of which Peruna is composed? Take, for instance, the ingredient HYDRASTIS CANADENSIS, OR GOLDEN SEAL. The United States Dispensary says of this herbal remedy, that it is largely employed in the treatment of depraved mucous membranes, chronic rhinitis (nasal catarrh), atonic dyspepsia (catarrh of the stomach), chronic intestinal catarrh, catarrhal jaundice (catarrh of the liver), and in diseased mucous membranes of the pelvic organs. It is also recommended for the treatment of various forms of diseases peculiar to women.

Another ingredient of Peruna, CORYDALIS FORMOSA, is classed in the United States Dispensary as a tonic.

CEDRON SEEDS is another ingredient of Peruna, an excellent drug that has been very largely overlooked by the medical profession for the past fifty years. THE SEEDS ARE TO BE FOUND IN VERY FEW DRUG STORES. The United States Dispensary says of the action of cedron that it is used as a bitter tonic and in the treatment of dysentery, and in intermittent diseases as a SUBSTITUTE FOR QUININE.

OIL OF COPAIBA, another ingredient of Peruna, is classed by the United States Dispensary as a mild stimulant and diuretic. It acts on the stomach and intestinal tract. It acts as a stimulant on the genito-urinary membranes. Useful in chronic cystitis, chronic dysentery and diarrhoea, and some chronic diseases of the liver and kidneys.

These opinions as to the ingredients of Peruna are held by all writers on the subject, including Bartholow and Scudder.

OF HYDRASTIS, BARTHOLOW SAYS it is applicable to stomatitis (catarrh of the mucous surfaces of the mouth), follicular pharyngitis (catarrh of the pharynx), chronic coryza (catarrh of the head). This writer classifies hydrastis as a stomachic tonic, useful in atonic dyspepsia (chronic gastric catarrh), catarrh of the duodenum, catarrh of the gall duct, catarrh of the intestines, catarrh of the kidneys (chronic Bright's disease), catarrh of the bladder, and catarrh of other pelvic organs.

BARTHOLOW REGARDS COPAIBA as an excellent remedy for chronic catarrh of the bladder, chronic bronchitis (catarrh of the bronchial tubes).

BARTHOLOW STATES THAT CUBEB, an ingredient of Peruna, promotes the appetite and digestion, increases the circulation of the blood. Useful in chronic nasal catarrh, follicular pharyngitis (catarrh of the pharynx), increasing the tonicity of the mucous membranes of the throat. It also relieves hoarseness. Useful in atonic dyspepsia (catarrh of the stomach), and in chronic catarrh of the colon and rectum, catarrh of the bladder, prostaticorrhea, and chronic bronchial affections.

MILLSAUGH, MEDICINAL PLANTS, one of the most authoritative works on medicinal herbs in the English language, in commenting upon COLLINSONIA CANADENSIS, says that it acts on the pneumogastric and vaso motor nerves. It increases the secretions of the mucous membranes in general. In the mountains of Virginia, Kentucky, Tennessee and Carolina, collinsonia canadensis is considered a panacea for many disorders, including headache, colic, cramp, dropsy and indigestion. DR. SCUDDER regards it highly as a remedy in chronic diseases of the lungs, heart disease and asthma.

These citations ought to be sufficient to show to any candid mind that Peruna is a catarrh remedy. Surely, such herbal remedies, that command the enthusiastic confidence of the highest authorities obtainable, brought together in proper combination, ought to make a catarrh remedy of the highest efficacy.

This is our claim, and we are able to substantiate this claim by ample quotations from the HIGHEST MEDICAL AUTHORITIES IN THE WORLD.
