NOTED AUTHORITY GIVES A SIMPLE PRESCRIPTION.

TELLS HOW TO TAKE

Tells the Readers of This Paper How to Prepare the Mixture at Home and Other Advice.

Now is the time when the doctor gets busy, and the patent medicine manufacturers reap the harvest, unless great care is taken to dress warmly and keep the feet dry. This is the advice of an old eminent authority, who says that Rheumatism and Kidney trouble weather in here, and all so tells what to do in case of an attack.

Get from any good prescription pharmacy one-half ounce Fluid Extract Dandelion, one ounce Compound Kargon, three ounces Compound Serrapapavilla. Mix by shaking well in a bottle and take a teaspoonful after meals and at bedtime.

Just try this simple home made mixture at the first sign of rheumatism, or if your back aches or you feel that the kidneys are not acting right. This is said to be a splendid kidney regulator, and almost certain remedy for all forms of Rheumatism, which is caused by uric acid in the blood, which the kidneys fail to filter out. Any one can easily prepare this at home and at small cost.

Druggists in this town and vicinity when shown the prescription, stated that they can either supply these ingredients, or, if our readers prefer, they will compound the mixture for them.

The Rhodes Double Cut

PRUNING SHEARS (PATENTED)

EVERY fruit grower will appreciate the advantages of a pruning shears that has a double cutting edge, as all the pruning shears heretofore on the market have had only one cutting edge, and the other edge being dull would bruise and peel the bark from the limb and injure it so it would not heal up smoothly, but the Rhodes Pruning Shears having a double cutting edge, cuts from both sides of the limb and does not bruise the bark, but leaves a clean, smooth cut that heals up rapidly.

All previous attempts to make a double cutting pruning shears have failed, as the shear blades would draw together and cut themselves; but with the Rhodes Double Cut Pruning Shears this difficulty has been overcome by the overlapping points, as you will notice by the cuts that the points of the Rhodes Shears pass by each other before the shears cut into the limb far enough to draw the blades, and it is impossible for the blades to draw together themselves after the points pass each other.

The Rhodes Double Cut Pruning Shears are finely finished and are made from the best quality of material. The shear blades are forged from tool steel and are carefully ground and tempered. The handles are maple. The ferrules are of wrought iron four inches long, with an extra ferrule one inch long on the end. There is a rivet put through the ferrule, handle and shank of the shears which keeps the ferrule and shears from coming loose from the handle. *Blades of Wood Handle Pruners are the same size for all lengths.
