WALTER A. DIMICK

Republican Candidate for Representative

He has signed Statement No. 1, and will vote for the people's choice for United States Senator, regardless of his individual preference.

He stands for economy in appropriations; less state taxes; stringent banking laws affording protection to depositors; all proper measures to rebuild our roads and public school system; a more equal system of taxation, so that corporations and land speculators will pay their just proportion of taxes; the preservation of the natural resources of our state to the people to whom they belong; and fair legislation with equal privileges to all.

The Rhodes Double Cut

EVERY fruit grower will appreciate the advantages of a pruning shears that has a double cutting edge, as all the pruning shears heretofore on the market have had only one cutting edge, and the other edge being dull would bruise and peel the bark from the limb and injure it so it would not heal up smoothly, but the Rhodes Pruning Shears having a double cutting edge, cuts from both sides of the limb and does not bruise the bark, but leaves a clean, smooth cut that heals up rapidly. All previous attempts to make a double cutting pruning shears have been failures, as the shear blades would draw together and cut themselves; but with the Rhodes Double Cut Pruning Shears this difficulty has been overcome by the overlapping points, as you will notice by the cuts that the points of the Rhodes Shears pass by each other before the shears cuts into the limb far enough to draw the blades, and it is impossible for the blades to draw together themselves after the points pass each other. The Rhodes Double Cut Pruning Shears are finely finished and are made from the best quality of material. The shear blades are forged from tool steel and are carefully ground and tempered. The handles are maple. The ferrules are of wrought iron four inches long, with an extra ferrule one inch long on the end. There is a rivet put through the ferrule, handle and shank of the shears which keeps the ferrule and shears from coming loose from the handle. Blades of Wood Handle Pruners are the same size for all lengths.
