Not Sisters

Now and again you see two women passing down the street who look like sisters. You are astonished to learn that they are mother and daughter, and you realize that a woman at forty or forty-five ought to be at her finest and fairest. Why isn't it so?

The general health of woman is so intimately associated with the local health of the essentially feminine organs that there can be no red cheeks and round form where there is female weakness.

Women who have suffered from this trouble have found prompt relief and cure in the use of Dr. Pierce's Favorite Prescription. It gives vigor and vitality to the organs of womanhood. It clears the complexion, brightens the eyes and reddens the cheeks.

No alcohol, or habit-forming drugs is contained in "Favorite Prescription." Any sick woman may consult Dr. Pierce by letter, free. Every letter is held as sacredly confidential, and answered in a plain envelope. Address: World's Dispensary Medical Association, Dr. R. V. Pierce, Pres., Buffalo, N.Y.

We have named our place "Pleasant View Farm." It is located at the end of Maple Lane, farthest from Oregon City and contains 25 acres. Recently we refused an offer of $5000 for the property. We raise all kinds of berries, especially strawberries, of which we have seven varieties, and other farm produce.

Sanitary Drinking Fountains

A public spirited man in Boston has invented a very unique, simple, and practical piece of mechanism in the shape of a sanitary drinking fountain, says the February Popular Mechanics. It is the only apparatus that delivers water and containers from separate receptacles by one and the same process, and the interest which this invention is arousing is helping considerably in the national crusade against the spread of contagious disease through the medium of the public drinking cup.

This fountain delivers for the sum of one penny, a new clean paper dipper filled with pure water. The cup is made of water-proofed paper or fiber, and can not be returned to the machine, thus insuring to every purchaser an absolutely clean cup. The article is illustrated.

MOLALLA.

County Superintendent Gary's school meeting at the Grange hall last Saturday was a great success in many ways. Although the weather was cold and rainy, about 100 people were in attendance. The Professor's fifteen questions were very thoroughly "threshed" out, seemingly to the satisfaction of all present. The only complaint heard was that the day was entirely too short to do anything like justice to so many important questions. This was the first meeting of the kind ever held in the county, and we would like to have the superintendent circuit the county with these meetings. It would tend to shorten and bridge and gulch which lies between the parents' educational cooperation.

All aboard again. F. M. Swift is still on deck and promoting the Southern Clackamas County Railway Company. A contract has been gotten up that seems to be free from flaws and serious objections. At any rate there is no money demanded until the railroad is built and the cars rolling onto the Molalla prairie from Oregon City. Isn't that good enough for anybody? And so long as we get the goods delivered on the ground before pay day comes, who cares whether it is F. M. Swift, the O. W. P. or some other powerful railway company that carries out the rolling contract. The job is to be done out this far in 21 months. That's none too soon. Let it come. Get a move on, old boys, lets get used to the new order of things early.

The Molalla Commercial Club at its regular meeting last Friday night, assigned an essay to each member on some resource or industry of the Molalla valley. These writings are to be made by persons engaged in their particular line of business and the club's next meeting promises to be very interesting, when all this data is turned into the common fund of information; whereupon a folder is to be issued descriptive of Southwest Clackamas county in general and the Molalla valley in particular and sent to all parts of the nation.
