Milwaukee.

The railroad survey being at last definitely settled, and franchise granted to cut our city in twain, and the sack which the council was holding having been returned to the junk heap, quiet again reigns supreme in our little hamlet, and property goes soaring upwards as predicted by the Courier. One party who has property on the survey, and whose cow pasture will be slightly interrupted with, has taken the initiative, and raised the price on a 50 foot lot 228 feet deep to \$850, or \$17 per front foot for land adjacent to the Kellogg pond. That's going some! Bunches of interested land owners who's property will be either benefited or otherwise depreciated in value by the railroad, can be seen at all hours of the day, and far into the night, standing on corners and cross roads, arguing the question as to the best mode of procedure to pursue, when the right of way man shows up. Even if the railroad does us no good in the end, it certainly has been the means of waking up our citizens to the needs of "getting next to themselves" on the railroad question.

It is generally conceded that the money which will be spent on construction work in and adjacent to our little village, will be the cause of many new lines of business opening up this summer, and we look for a busy season in all lines of trade.

The New Iowa Cream SEPARATOR

It is positively the closest skimmer made and gets all the butter fat. Run the skim milk, skimmed by any other cream separator, through a New Iowa and it will extract cream which the other separator could not get. It may be ever so little, but it will be enough to prove that the New Iowa IS the closest skimmer on earth—cold as well as warm milk. Another thing to take into consideration in buying cream separators is the height of the supply can. The New Iowa's supply can is waist low, just a comfortable height and an easy lift. The crank is also placed at a most convenient height and the handle can be adjusted to suit the operator. The New Iowa is easily cleaned and requires very little attention. Leave it to your wife and she will choose a New Iowa every time because she can see that it is the machine which will get the most out of the milk with the least work. Half Lindsey is hauling lumber for his new house and barn.

The most interesting ball game ever played here was the one that took place on the Shubel grounds between the home team and Molino, the score being 6 to 1 in favor of Shubel. The worst of it was that there was no well for Molino to fall into and letting Shubel gain a tally in that way.

The Dutch and the Welch may be scrabs but they were big enough to beat Molino last Sunday at the game. Hip-hip—hip—hurray Shubel.
