THE TIME TRIED

CHAMPION RAKE

Makes good in every field.

The substantial construction of the Champion Rake makes it a good machine for heavy duty. The thill frame is made of heavy angle steel, warranted not to bend or break. The self dumping device is accurate and sure in action. The rake is indorsed by many Clackamas County Farmers.

Best He Has Tried

Clackamas, Oregon, June 15, 1908.

Mitchell, Lewis & Staver Co., Portland, Oregon

Dear Sirs: Your letter of June 12, received Saturday. Will say in reply that the Champion rake is the best I have ever tried. It gave me entire satisfaction, especially in very heavy hay. Anyone needing a Rake cannot do better than to purchase a Champion.

Yours truly, JNO. W. BENNETT

Champion Tedders Are Fine Kickers

There is no question but what the use of a tedder increases the value of grain. It makes it care much more quickly and in a more thorough manner. It insures weet smelling hay, which is worth more for feeding. The Champion tedder is well made and will give the very best possible service.

Nahcotta, Wash., June 16, 1908

Mitchell, Lewis & Staver Co., Portland, Oregon. Gentlemen: Replying to your inquiry as to how the Champion Tedder suited me, would say that I found it to do very good work. Last hay season was a bad, damp time, but by the aid of the tedder I put up my hay in the best shape and with the least labor in my experience. The tedder is light to pull and easy to manipulate, and appears to be strongly built, so there is not much liklihood of breakage. Yours truly,

F. L. SARGENT P. S .- I would not be without the tedder for twice the cost.
