### TO EXTEND RAIL ROAD

Cazadero Line Will Be Lengthened by Fall

REACH POWER HOUSE

By the coming fall the line of the Portland Railway, Light & Power Company will be extended from its present terminus at Cazadero two and a half miles up the Clackamas river to the big power station that is being equipped there by the company, according to an announcement made by President B. S. Josselyn Sunday. Mr. Josselyn said, however, that this extention is undertaken so that machinery can be hauled direct to the new power house, and to develop the new power house, and to develop the ent Tooze shows that gentleman to country adjacent to the present line, be a vigorous educator. This is the

future. But we are making no plans and plane geometry, political economy to extend into Eastern Oregon. We are simply planning to build two and tory, the purchase of which has just a half miles up the river to enable been authorized. us to haul machinery into our new powerhouse, that is all. Estimates and surveys have been made and must be passed upon, but we wish to have much of the work completed this fall as possible.

We are now increasing our Cazadero plant by 33 1-3 per cent, between 15,000 to 20,000 horsepower, to care for the increase in our business during the coming year. Machinery is now being installed and a generator will be put in this month."

VISIT OGLE MINES.

John B. Fairclough, A. Knapp and W. H. Kirchem Return from Trip.

Fairclough, manager of the Ogle Mountain Mines, has just re-turned from a trip to the property of the company on Ogle Creek, where he found everything progressing nicely.

Mr. Fairclough was accompanied on his trip by W. H. Kirchem and Coun-cilman A. Knapp, of this city, who are greatly elated over the trip and the

been run and a large body of low grade ore has been found and within the next 225 feet very rich ore will no doubt be found. The company did not expect to find any ore in this tunnel short of 400 or 500 feet and are very much pleased with the prospects. This tunnel will be driven from 800 to 1000 feet deep which will cost from \$6000 to \$8000 and will cut the main

As soon as developed this will be a very important factor in the development of Clackamas County, and all who visit the property are unanimous in the opinion that the property is rich and has a great future.

Washington, Aug 6—The president has just signed a proclamation making a National Monument of the Oregon Caves of "Marble Halls" of Josephine County in Southern Oregon. phine County, in Southern Oregon. These natural wonders are located in the Siskiyou National Forest about thirty miles south of Grant's Pass in Cave Mountain. The caves are in marble and other

imestones and consists of innumerable caverns, corridors and passage ways of various sizes, all of them decorated beyond description in crystalized carbonates. They have been explored to a distance of two miles or more, the lowest of them being at a depth of about 2,000 feet below the summit of Cave mountain the highest being some seven or eight hundred feet above it. There are many passageways and rooms which have never been opened, and with these distant and unexplored openings the magnitude of the Oregon Caves is practically unknown.

These natural wonders were disovered in 1874 by Elija Davidson, while bear hunting, and the greater part of the exploration work was done by F. M. Dickerson, of Kerby, Oregon, when four floors of levels were partially opened. Many of the old ladders used at that time are still
