The Explanation of Energy

The energy of power of a moving object is proportional, not only to its weight or mass but to its velocity as well. Microscopic particles projected at high velocities have an energy equal to that of a much heavier body traveling at a slow gait. This is the reason that radiations possess such enormous energy. The particles shot out from it, although they are microscopically small, travel with the velocity of light. Rankin says that a spider web running over pebbles with the velocity of light would be capable of running all the machinery in England. We also know that a small stream of water at enormous velocities will tear down mountain sides, as in the hydraulic system of mining. Remember these things, it is then not so hard to conceive how electric current, which has a velocity equal to that of light, is capable of transmitting thousands of horse-power over an insignificant wire.

Not Too Proud to Work

"Here's a nickel," said a thrifty housewife to a tramp at her door. "Now, what are you going to do with it?" "Well, mum," replied the hungry man, "if I buy a touring car, I shan't have enough left to pay my chauffeur; if I purchase a steam yacht, there won't be enough to defray the cost of manning her; so I guess, mum, I'll get a seahorse and handle it myself." — Everybody's Magazine.

MINNESOTA DOCTOR FAMOUS

Discovers Simple Remedy for Appendicitis

Minnesota physicians and surgeons are becoming famous the world over. A Minnesota physician, a graduate of German universities, has discovered a simple remedy for treating appendicitis without operation, although perhaps in very rare cases operations may still be advisable. This physician deserves the gratitude of the entire world by conquering this widespread disease. The remedy, called Adler-i-ka, is composed of buckthorn bark, glycerine and other simple ingredients scientifically compounded. Because Adler-i-ka COOLS the diseased parts and DRAINS OFF all impurities, which no other medicine can do, ONE DOSE instantly relieves stomach or bowel trouble. The drug store of Jones Drug Co. reports large sales and wonderful results. Almost any doctor will tell you, if your bowels do not move each day, or if you have wind or gas in your stomach or bowels, or a heavy feeling at the center, you may very likely get appendicitis. By taking Adler-i-ka just once each week, appendicitis can gain no foothold. A valuable book showing many pictures of the various little appendicitis, and telling how appendicitis is caused and how you can easily guard yourself against it, can be secured free for a short time at the above druggist. You should read this book and take no chances.
