

When the bones ache and the joints are inflamed, with much tenderness at the affected parts, you need a powerful penetrating agent to overcome the attack.

BALLARD'S SNOW LINIMENT

IS A PAIN RELIEF OF GREAT EFFICACY.

Its wonderful penetrating power affords a most gratifying sense of relief to the afflicted. It eases pain quickly, subdues all inflammatory conditions and rapidly restores strength and comfort in the aching joints. It is equally effective in relieving neuralgia and sciatica. Rub it in well, gently but thoroughly; its healing and strengthening influence is manifest as soon as it reaches the nerve at the seat of the disturbance. A few applications controls the disorder and restores normal conditions. As a household remedy for curing cuts, wounds, burns, sores or the hundred and one accidents that are always occurring to the flesh, it has no superior.

Put Up in Three Sizes, 25c, 50c and \$1.00 per Bottle.

JAMES F. BALLARD

PROPRIETOR

ST. LOUIS, MO.

For Sore Eyes, Granulated Lids, Redness of the Eyeball, Weak Sight, Smarting Sensations in the Eyes, use Stephens Eye Salve. It is a remedy of proven merit.

CLARKES SCHOOL NOTES

The Clarkes School Debating Society met Friday, Jan. 6, 1911, and the following question was debated: "Resolved that devotion to fashion is a greater evil than the tobacco habit." The speakers were as follows: Affirmative, Laura Gard, Zelma Cumins, Clyde Ringo, Raymond Ginter, Edna Elmer, Alva Gard, Dora Marquardt, Erma Lee, Hazel Ringo, Alfred Marquardt, Irene Lee, Lydia Klenzsmith, Willie Johnson, Negative, Hazel Tallman, Ruby Gard, Elsie Elmer, Rudolf Miller, Rufert Marquardt, Lizzie Marshall, Sophie Miller, Libbie Sager, Esther Linden, Edwin Bottemiller, Walter Klenzsmith, Mary Bottemiller, Wesley Lindau. Our teacher acted as judge and decided the question in favor of the affirmative 15 to 11. The question chosen for the next debate is "Resolved, that the American method of celebrating Independence Day is detrimental to the public welfare." The speakers are as follows: Affirmative, Raymond Ginter, Clyde Ringo, Laura Gard, Elsie Elmer, Alva Gard, Libbie Sager, Sophie Miller, Negative, Edna Elmer, Zelma Cumins, Ruby Gard, Rudolf Miller, Lizzie Marshall, Erma Lee, Rudolf Marquardt. There being no further business to transact, the society adjourned to meet again Friday, Jan. 20, 1911. Mr. Gard visited the school one day last week.

The Plover children are very unfortunate with sickness this winter. We are glad to see Hazel Tallman and Willie Johnson back in school. The 5th grade made a fine showing in final spelling examination last week. The 9th grade is doing splendid work. We are sorry to report the serious illness of Edith Stout. Edith is a quiet ladylike girl and we hope to see her in school again soon. Vernon Larkins visited the school one day last week just to recall school days memories.

LOCAL AND PERSONAL

Miss Vada Elliott has returned from a three weeks visit with Mrs. Charles Officer, at Aberdeen.

Mr. and Mrs. J. S. Lagerson and little son, who have been guests the past month of Mr. and Mrs. L. J. Lagerson on Twelfth and Main streets, left Wednesday for their claim, which is about three miles from Nyssa, Oregon.

Rev. W. M. Proctor of the Congregational church of this city, was called to Portland Wednesday evening to solemnize the marriage of George Harney, Jr., to Miss Elvia McCoy, both of the Rose City.

The Woodmen of the World will install and initiate the new officers for Willamette Falls Camp No. 148, on Friday evening, Jan. 13th, in their hall. It is desired that a large number be present. Refreshments will be served and a good time is anticipated.

A Light Fall of Snow.

Snow began falling in this vicinity at an early hour Wednesday morning and has kept up an intermittent downpour of the beautiful white, resulting in a spread of the white mantle throughout Clackamas county to a depth of several inches. Streetcar traffic has been delayed.

BEE HILLS

Most of the Bee Hills people are "enjoying" the new year by entertaining severe attacks of the grip. Curtis Kandle is staying at his Bee Hills ranch now. Mr. Morrison's new house on his homestead is nearing completion. Severe storms and deep snow in the mountains have driven the wild animals and trappers to lower localities. Our trappers' luck so far this year has been a pinch of cougar fur, some wildcat toes and several odoriferous small animals. Will Miller was a visitor at Mr. Carr's, Sunday.

HIGHLAND

Mr. Geo. Hanson has returned home after a few days' visit with friends at Wilsonville. Mr. and Mrs. Simms and family spent Sunday with Mr. and Mrs. Dave Miller. Will Miller is visiting at F. Nicholson's. Mrs. Fred Hettman is on the sick list. Her mother, Mrs. G. Wallace, is taking care of her. Will Hettman of Colton spent Sunday here. The Woman's Sewing Circle met at Mrs. Dave Miller's this week. Mr. and Mrs. C. G. Kandle of Oakville, Wash., are visiting their parents, Mr. and Mrs. M. E. Kandle. Geo. Wallace and Bert Leason left for Colton the first of the week. Mr. Ross Wilcox of Garfield spent a few days at M. E. Kandle's. Mr. and Mrs. Kandle have gone to Colton on business. There will be services at the M. E. church Sunday at 3 p. m. Don't forget to attend the meeting.

EASILY MADE IN WINTER.

Plank Drag For Use Later on Worth Tackling Up Farmer's Spare Time. An effective plank drag which can be made easily in winter by any farmer, in order to have it ready for later use, is thus described by an Ohio correspondent in the Rural New Yorker: The writer has used several kinds of drags on plowed fields and has seen a

FRONT VIEW OF DRAG.

[From the Rural New Yorker.]

large number in use, ranging from a sled up to a lever harrow with the teeth set back. Of all the devices used for dragging the soil the drag shown in the diagram is probably most effective. The plank drag made by lapping some 2 by 8 inch plank works all right in very dry soil, but is all wrong for soils properly moist for best results in working. The drag shown here will work anywhere and at almost any time. Such a drag is easy to make and not at all expensive. In the diagrams a and b are 2 by 6 or 8 inch plank 7 feet long for two horses or 11 feet for three, and d are 2 by 4 pieces bolted to the plank. e is a draft chain and may be fastened where shown or farther back, while xx are two short boards nailed in place for the driver to stand on. The latter pieces, xx, should not be too wide, as they might cause the soil to collect and pack underneath. The plank a and b should be set at an angle of 30 degrees to d-d, and the joints should be secured with two bolts each. This drag is simple and strong and will stand a lot of rough usage in the field, and its use will give satisfaction to

SIDE VIEW OF DRAG.

[From the Rural New Yorker.]

the user, and particularly where it is desired to level up inequalities of the surface. This drag cannot take the place of a harrow, roller or disk harrow, but it can do a few things more easily and quickly and in some cases far better.

The farmer driving through town with his prancing horses drawing a fine rig is the farmer on parade. The farmer in the field behind the plow is the farmer proving his right to be on parade.

Allen Hutchins will go to California soon.

TREATMENT OF SEED CORN.

Proper Methods, According to Washington Authority on the Cereal.

In farmers' bulletin No. 415, on "Seed Corn," C. P. Hartley, one of the corn experts of the United States department of agriculture, asserts that the same day seed corn is gathered the husked ears should be put in a dry place where there is free circulation of air and placed in such a manner that the ears do not touch each other. This is the only safe procedure. The writer has repeatedly seen good seed ruined because it was thought to be already dry enough when gathered and then

IDEAL METHOD OF TREATING SEED CORN. [From bulletin of United States department of agriculture.]

the precaution mentioned above was unnecessary. Many farmers believe that their autumn are so dry that such care is superfluous. Seed corn in every locality gathered at ripening time will be benefited by drying as suggested. If left in the husk long after ripening it may sprout or mildew during warm, wet weather or become infested with weevils.

The vitality of seed is often reduced by leaving it in a sack or in a pile for even a day after gathering. During warm weather, with some moisture in the cobs and kernels, the ears heat or mildew in a remarkably short time.

The best possible treatment immediately after gathering is shown in the illustration. Binder twine will support fifteen or twenty ears on a string arranged in the manner illustrated. Ordinarily the best place to hang these strings of ears is in an open shed or loft.

Permanent seed racks, with a separate compartment for each ear, are more convenient than the use of binder twine, and when they are located in a dry, breezy place the ears dry successfully.

To meet the requirements of a good farmer it is necessary to spend some of the winter weather in studying the problems of the farm.

Orchard and Garden.

Those who argue that fruit is uncertain and that the orchard is seldom profitable do not give an estimate of the work given their trees. It may be that their orchards do not get much attention, which, of course, explains why they are unprofitable.

Permanent labels for trees and shrubs may be made from zinc cut into strips. If the name is written on the zinc with an ordinary lead pencil it will prove indelible and will not be affected by the elements.

It is a good idea to plan now for an evergreen windbreak to protect your orchard, but do not set the trees now; wait until spring.

Store the ladders under cover, but give them a good coat of paint first.

Good garden implements are essential for successful gardening. Much of the benefit and pleasure derived from work in the garden is missed by having poor tools. Spend part of the winter leisure in getting the tools in shape.

Prepare the soil for your bedding plants which are to be planted next spring. You cannot take too much pains in preparing the soil.

If you have decided to diversify your crops carry out the idea by planting several kinds of fruits. The garden, too, should show a nice variety. You may specialize if you wish, but be sure to have something else besides your specialty.

Get busy with the saw and pruning shears and clean out every dead and cankered branch.

Allen Hutchins will go to California soon.

Farm and Garden

LOOK OUT FOR APPLE SCAB.

One of the Most Destructive Diseases. Passes Winter on Leaves and Fruit.

According to a circular issued by the Virginia agricultural experiment station, scab is one of the most common and destructive diseases of apples and pears. A very similar disease affects quinces. It passes the winter season on leaves and diseased fruit, attacking the young foliage, bloom and fruit very early in the growing season. The foliage is browned and "blighted" by the disease. All fruit attacked at this stage drops or falls to develop. Later there is a secondary attack on the half

APPLE SCAB DISEASE ON LEAVES. [From circular, Virginia agricultural station.]

grown fruit, which disfigures it with gray and black blotches and "cloud" to such an extent that it renders the fruit unsalable. Spraying with bordeaux or lime sulphur (summer strength) before the bloom opens, supplemented by one or two later treatments at intervals of from ten days to two weeks, will prevent the development of this disease. The winter wash of lime-sulphur if applied for scale just before buds begin to swell aids the further treatment very materially.

Winter Feeding of Teams.

How to feed the team most economically, especially when there is no work for them, is a good deal of a problem. If there is any place where wheat or oat straw can be economically fed it is to this team to supply a part of the filling and fiber. This, with well made clover hay and corn or timothy hay and oats, will keep them in good condition and maintain their muscles. It has been found economical to have the grain finely ground for horses over twelve and under five years of age. The teeth of young and old horses will not usually allow them to thoroughly masticate whole grain; hence there is a loss either of grain or flesh or both—Farm and Fireside.

Protection for the Farmhouse.

A hedgerow of cedars or spruce trees along the windward side of the driveway leading from the main road to the farmhouse offers a warmth of welcome in winter that cannot be obtained in any other way. A stock proof fence that is both useful and ornamental can be made by setting fenceposts near the evergreens and stringing barbed wires in the usual way.—Farm Press.

FEAT OF A MISSOURI WOMAN.

An Audrain county woman raised 3,000 bushels of corn, 500 bushels of oats, ten wagon loads of pumpkins, nine children and a shiftless husband on eighty acres of land.—Centralia (Mo.) Courier.

The Hum of the Hive.

Any bee which loses sight of the spirit of the hive and works only for private good is considered sick, criminally insane, and the community no longer allows him to take up good space.—Elbert Hubbard.

Honey will candy or become white and hard during cold weather. This is really a good test of purity, for, while all pure honey does not candy, yet all honey candied solid is pure.

An excellent grade of beeswax can be extracted from seemingly black and worthless combs. The market price of wax averages about 29 or 30 cents a pound. Beekeepers too often overlook the possible income from wax.

If you use modern movable frame hives the stored honey should be equalized among your colonies. That in frames of sealed honey should be exchanged for frames of empty comb from the light colonies.

A strong hive contains 10,000 bees in February, 15,000 in March, 40,000 in April and from 60,000 to 80,000 in May.

The bee is charged with various imaginary crimes. Its sting is formidable, but chiefly to the imprudent. It is accused of ravaging fruit, but its tongue is formed exclusively for the extraction of sweet juices, and its mandibles are unable to pierce the skin of fruit.

In New York state it is not considered safe to winter bees in single wall hives out of doors without protection.

THE DEMAND FOR EXPERIENCE.

ED auto men is greater every day. We will teach you in our own shop, in two weeks, to drive and care for all makes of cars. Practical, thorough complete instruction day or evening. Anglin's Auto Academy, Office 3504 Washington St., Room 415, Portland, Oregon.

Look for the Bee Hive
