

DOES YOUR WATCH NEED REPAIRING?

A WATCH is intended to tell you the time of day. Unless it does this accurately it is worse than useless, for it is like the man whom you cannot depend upon.

Many a man has twenty-five or thirty dollars tied up in a watch, which is worthless when if he would invest a dollar or two for having it repaired he would get the full value out of it

Often a watch which does not keep proper time needs regulating for which we make no charge. If it needs repairing our charges are more than reasonable and our work is guaranteed.

The "Tea Leaver." A good deal of the tea consumed by the working classes in the days when Arthur Young complained of the addition to this luxury had never seen either India or China. In one of John Ashton's works on England he cites a case in which a boy charged with gambling stated that the money found in his possession had been made by picking tea leaves. This led to the discovery that many persons made a living by picking alone leaves and white-thorn leaves in the fields near Camberwell and selling them to a local co-keeper for a penny a pound. One man said he picked from fifty to sixty pounds a day and always found a market for them. The leaves were subsequently sold to a wholesale merchant, who obtained as much as 8 shillings a pound for them under the guise of tea. The merchant was prosecuted and fined, not for adulteration, but for defrauding the revenue. And the "tea leaver" is still the slang name for the petty thief.—London Standard.
