BATTLE OF THE KEGS.

A Bloodless Naval Conflict of the Rev-

olutionary War. All wars have their humors and jokes, and the Revolutionary war was no exception. Jan. 5, 1777, figures in history as the date of the battle of the kegs, and, though bloodless, it has been celebrated in verse. Six months after the Declaration of Independence, while the British fleet was stationed at Philadelphia, the Americans undertook to destroy the ships by means of improvised torpedoes, which, set affoat in the river above the city, were to carry death and destruction among the en-

The alleged torpedoes were shaped like kegs, and when the British land forces discovered them floating down the river they were drawn up and ordered to fire on everything that came within range. The officers remembered the Trojan horse and feared every keg might contain an armed rebel. As the kegs came floating down there was great excitement and much firing, but no casualties. The only explosions were from the British guns, for the torpedoes were a failure.

The incident furnished much amuse ment to the patriots and was cleverly versified by Francis Hopkinson, a prominent lawyer of the day, one of the signers of the Declaration of Independence and the first district judge of Pennsylvania by appointment of Washington. He was one of the most popular writers of the day, and "The Battle of the Kegs" bad a great run among the patriots and distinct influence in the way of military inspiration, Francis Hopkinson was the father of Joseph Hopkinson, author of "Hail Columbia."-Indianapolis News.
