

LOCAL AND PERSONAL.

Work was commenced on the improvement of Mollala Avenue this week.

R. L. Badger, a prominent Beaver Creek man, was in the city Tuesday.

Rev. Landsborough and E. H. Cooper have been attending the Portland Presbytery at Tillamook this week.

Kenneth Hendricks of Park-place, one of the graduates of the Parkplace high school, left Tuesday for Bay Ocean, where he will spend a few weeks' vacation.

Miss Hazel Tooze, who has been attending the University of Oregon at Eugene, has returned to her home in this city where she will spend the vacation with her parents, Mr. and Mrs. Charles Tooze.

The Clackamas county Sunday school picnic, which was to have taken place Friday (today) at the Chautauqua park, at Gladstone, has been indefinitely postponed on account of the inclement weather.

Back east they say it never thunders or lightnings in Oregon, but twice within the past week we have had both. The old timers say it did not used to be so, but that "things are changing in Oregon."

Roscoe Morris returned from a ten days' trip to Ogle mine Wednesday, where he has been fishing and enjoying a few days' vacation. Morris says the mine is showing up a bunch of richness and that the mountain trout streams have anything beaten in the way of sport. He says he beat the Courier editor's last year's fishing record but that his record for a barefooted race up the Butcherknife yet stands.

Street Oiling This Week.

Contracts have been let for the oiling of the improved streets of this city, and work will start as soon as the present rain is over and the streets dry.

The contract has been let to the Oregon Road Oiling Company of Portland, which agrees to oil the streets a width of six feet for \$67.50 a mile. There was one other bidder, the Oregon Engineering & Construction Co., whose bid was \$90 a mile. The city reserves the right to increase the width of the oiling over six feet if it thinks best.

Linoleum Varnish.

The Acme quality kind will make shabby linoleum or oil cloth look new. Jones Drug Co., the Acme quality paint store.

McLOUGHLIN GRADUATES

Program and Class Members for Thursday Night Exercises.

McLoughlin Institute will hold its annual commencement exercises at McLoughlin hall this (Thursday) evening, June 20, at eight o'clock, when the following students will be graduated:

Miss Mary A. Nuttall, Miss Louise Weber, Miss Ellen McMillan, Miss Margaret Sullivan, Thomas Barry, Daniel McMahon, Joseph Armstrong.

Hon. Joseph E. Hedges will make the address to the class. The program is as follows: Coronation march, piano quartette, Salfie Clancy, Anna McMillen, Ellen V. McMillen, Opal Rains.

Salutatory—Ellen V. McMillan. The Ocean Spray, intermediate grades, S. Clancy accompanist. Roses, piano quartette, Laverne Brooks, Anna Rose Tanzer, Margaret Brady, Anna Lenon.

Sword drill—by the boys. Goin' to Meelin', song—by the Minims. Faust Waltz—Lorenore Hultson, Rose Muench, Joseph Gadke, F. Champion.

Adrian, song—F. Champion, N. Michaels, F. Bruce. Class Drill—Seventh and Eighth grades. Class Song. Jubel Feier, piano trio—Anna McMillan, H. Fosberg, E. McAnally. Valedictory—D. E. McMahon. Presentation of Diplomas—Rev. A. Hillebrand.

Address to Class—Hon. Joseph E. Hedges. They Put an End to It. Charles Sabel, 30 Cook street, Rochester, N. Y., says he recommends Foley Kidney Pills at every opportunity because they gave him prompt relief from a bad case of kidney trouble that had long been bothering him.

Light Lures the Fish. Fishermen of Ceimbra, Portugal, have a novel method of catching fish by the use of a natural phosphorescent substance. This is obtained from a fish known as Malacocephalus laevis and is a thick yellowish fluid which possesses a bluish phosphorescence in the dark, believed to be due to the presence of a luminous microbe. The fishermen rub this substance upon a muscled tissue, such as a piece of cuttle fish, and this is used as bait. The light appears to last for a long time, at least for several hours, and has a brighter glow when dipped in the sea. Fish are attracted to the bait by the light and are thus caught.

YALE PLAYERS PUZZLED

Milton Stock, the youngster who was given a trial by the Glants in the spring, saw many strange things in New York, but nothing that puzzled him more than the word "Yale." When he saw the Yale players at the Polo grounds for their exhibition with the Glants he turned to a fan and said, "Say, where are these guys from?" "From New Haven, up in Connecticut, where they make locks!" was the reply. "And these guys are the ones that make the locks, eh? Say, what league are they in?"

BAT NELSON IS THROUGH.

Ex-Champion's Hands Are Gone, and He'll Retire For Good.

Battling Nelson, the former lightweight champion, at last admits that he is "all in." The game fighter is now satisfied that his sun as a retriever of his lost championship has set.

When he broke his hands a few weeks ago Nelson took the matter lightly. He paid a visit to the famous "Bonesetter," Rees of Youngstown, O., to obtain needed relief. Rees put Nelson's hands under a careful and thorough examination. When he had finished he remarked to Nelson:

"Battler, your hands are gone, and I regret to add that your days as a great fighter are over."

The Dane took the sentence stoically and now comes out with his short swan song.

MARQUARD NEEDS SLOW BALL.

Coach Robinson is Drilling Tail South paw In Art of Changing Pace.

If Rube Marquard can pitch a slow ball Coach Robinson of the Glants says he will be invincible. Marquard has learned to control terrific speed and a fast breaking curve. But he doesn't know much about change of pace. Robinson is drilling him every day in the art of pitching floaters and says the big southpaw is making progress.

All of the great pitchers in days gone by mixed slow ones with fast ones, thereby increasing their effectiveness in a remarkable way. One of the first to use a slow ball was Radrourne of the champion Providence team of 1884. Tim Keefe and John Clarkson also employed this method.

Linoleum Varnish.

The Acme quality kind will make shabby linoleum or oil cloth look new. Jones Drug Co., the Acme quality paint store.

The light appears to last for a long time, at least for several hours, and has a brighter glow when dipped in the sea. Fish are attracted to the bait by the light and are thus caught.

THE LIBERTY BELL.

Favors For Fourth of July Feasts.

PATRIOTIC FAVOR BOXES.

A charming and unusual luncheon plan is a Liberty bell table, the idea beginning with the flowers and extending to favors and all minor details.

The centerpiece, by way of a change, might be a hanging one, a bell formed of flowers and depending from the chandelier or by ribbons from the ceiling.

Again, you could have the conventional low bed of flowers and just above this one of the silver Liberty bells in paper mache which come for holding candy.

Have this swung from the chandelier or from the ceiling by ribbons and fill it with favors to be distributed after the luncheon, or you can fill it with sweets and have a favor little chocolate or silver paper Liberty bells, with the names of the guests written upon them in icing or red ink, as you choose.

Replicas of the old Liberty bell can easily be made provided one can construct the frame of wire by covering the frame with paper which has been dampened, then molded into shape. The outside is afterward tinted in a dull bronze, with the date 1776 across the surface in gold lettering. However, these trifles are so inexpensive that it would be a waste of time for any one to try to make them at home.

There are any number of variations of the articles typical of Independence day shown in favors which will not only add interest but attractiveness to the Fourth of July entertainment.

Useful Traveling Suit. Scarlet or green silk is introduced in smart touches on the black and white tailored costume, as evidenced in this

PEPPER AND SALT COSTUME.

good looking suit of black and white check, which has a collar and cuffs of black satin faced with apple green.

The Key. "And where, my fellow citizens," appealed the political speaker, "can we find an instrument so fit, so delicate, so adjustable and at the same time so unassuming and popular that it will unlock every department of state for the benefit of the people?"

"The hairpin" shrieked an enthusiastic suffragist in the audience. That Painting Job. Don't let it bother you. Consult us for advice and suggestions. Jones Drug Co., the Acme quality paint store.

When your child has whooping cough be careful to keep the cough loose and expectoration easy by giving Chamberlain's Cough Remedy as may be required. This remedy will also liquefy the tough mucus and make it easier to expectorate. It has been used successfully in many epidemics and is safe and sure. For sale by Huntley Bros. Co.

Just Think of It.

Large stew pans, four quart kettles, pudding pans, bread pans, of good granite ware, special at ten cents each, at Ferriman's, Mohala, Saturday.

Children Cry FOR FLETCHER'S CASTORIA

Helped to Keep Down Expenses.

Mrs. J. E. Henry, Akron, Mich., tells how she did so: "I was bothered with my kidneys and had to go nearly double. I tried a sample of Foley Kidney Pills and they did me so much good that I bought a bottle and feel that they saved me a big doctor's bill."

A specific for pain—Dr. Thomas' Electric Oil, strongest, cheapest liniment ever devised. A household remedy in America for 25 years.

The Open Door

SCIENTIFIC NEW DISCOVERIES.

By the electro-magnetic telegraph an operator can exactly locate a fracture in a submarine cable nearly 3000 miles long. A few fossils sent to an expert geologist enable him to accurately determine the rock formation from which they are taken. This he can describe as perfectly as if the rocky formation was before him on the table.

So, also, in medical science. Disease has certain unmistakable signs or symptoms. By reason of this fact the physicians and specialists connected with Dr. Pierce's Invalids' Hotel and Surgical Institute at Buffalo, are enabled to accurately determine the nature of many chronic diseases without seeing and personally examining their patients. In recognizing disease without a personal examination of the patient, they do not claim to possess miraculous powers. They obtain their knowledge of a patient's disease by practical and well-established principles of modern science.

Certain diseases display peculiar traits. Subjected to scientific analysis they furnish abundant data to guide the judgment of the skillful practitioner. This method of treating patients at a distance, by mail, has been successful that there is scarcely a city or a village in the United States that is not represented by one or more cases upon the records of practice at the Invalids' Hotel and Surgical Institute. Such rare cases as cancer, not treated in this way, which require surgical operations or careful after-treatment, or electrical therapeutics, receive the services of the most skillful specialists at the Institute.

Dr. R. V. Pierce, long ago established this Invalids' Hotel and Surgical Institute with a full Staff of Physicians who were expert in their specialties. These physicians may be consulted by letter and without charge whatever, if you wish a specialist's advice upon any chronic malady. The same system of "specimens" is observed as in the departments of a medical college. The professor who would assume to lecture in all departments with equal ease and proficiency would be severely ridiculed by his colleagues, and it is just as absurd to suppose that the general practitioner can keep himself informed of the many new methods of treatment that are being constantly devised and adopted in the several departments of Medicine and Surgery.

Why He Sees Double.

The reason that a man sees double when he has gazed too long on the wine when it is red is that the nerve centers are changed by the action of the alcohol. There is a want of harmony in the action of the muscles which move the eyeballs. Consequently instead of both eyes being focused simultaneously on an object one eye receives an impression independently of the other. The two impressions are communicated to the brain, and the object is therefore seen twice. The inflamed condition and loss of energy in the brain centers from over-doses of alcohol also account for the staggering gait of an intoxicated man.

FRANK BUSCH FURNITURE AND HARDWARE

Paint was first used simply to beautify and to cover up defects. From time to time ingredients were added which give it the power to protect and preserve as well.

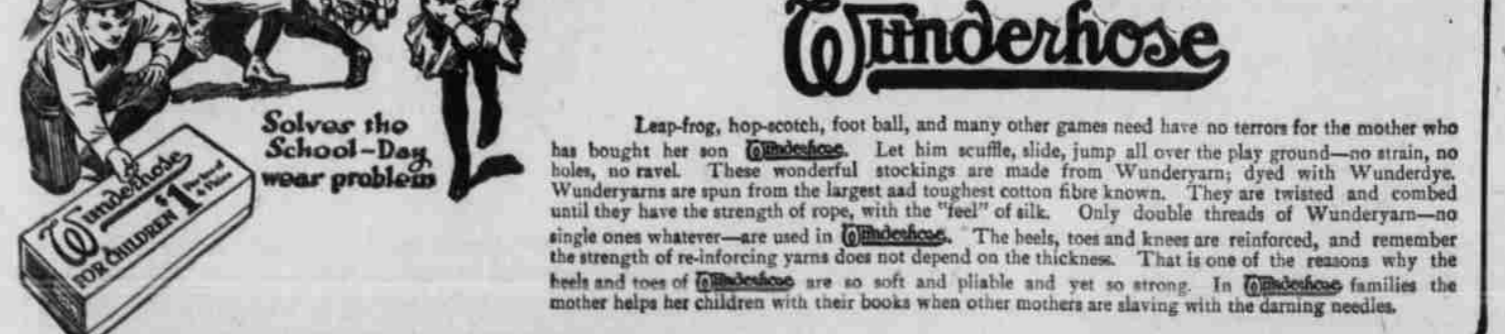

There are paints and paints on the market. Some of them answer the purpose for which they are intended. The majority are simply on the market for one reason—to make a big profit for the people who make them and the people who sell them. We don't keep that kind.

It doesn't pay you to use them so in the long run it wouldn't pay us to sell them. You want the most for your money so come in and talk the paint question over with us in detail.

FRANK BUSCH Furniture and Hardware

Wanderhose School Days Bring Many Problems

You owe it to your children to see that they are well dressed and comfortable. How can it be done on the least money? Stockings have been the greatest trouble. You know the kind that look well until the first recess. If your boy is the right kind of boy, he plays so fast he forgets all about his stockings. To grow he must play that way. Give him the kind of stockings that take care of themselves—

L. A. AMES, OREGON CITY'S BIG DEPARTMENT STORE SEVENTH AND MAIN STREETS
