

THE NEWS FROM CANBY.

Interesting Column of Live Newsy Matters.

The Clackamas county fair, held on the fair grounds at Canby was thronged with people during the entire four days of its session. A conservative estimate of the attendance on both Thursday and Friday placed the number at between four and six thousand. There is no question but that the interest in the horse races was keener than at every former session, and the races were close, the jockeys driving to win in all cases. The series of baseball games added much to the interest, as it brought a larger attendance from the three localities representing the three contesting teams. On the first day the Shubel team played with and defeated the Molalla team by a score of 8 to 4, on the second day the Canby High School lads played the Shubel team and defeated them with the same score that they had defeated Molalla, 8 to 4, and on Friday the third day the Canby team met the Molalla boys and succeeded in winning, with the score 8 to 5, thus winning the series and placing them in a position where they had a chance for the large end of the purse as they were scheduled to again play the Shubel team on Saturday. This they did winning with a score of 14 to 4. Twenty-five dollars was awarded the winning team of each game and ten dollars the losers; therefore the Canby high school boys carried off seventy-five dollars, while the Shubel team got forty-five dollars and the Molalla boys got twenty dollars. It had been stated that the Shubel team had played nineteen games including the three at the fair and won all except the two games lost to the Canby high school team.

The only thing which marred the happiness was the accident which happened to Prof. Brown, who entertained the crowd with the daring slide for life. The order on the grounds and in the town was all that could be asked, for there was no necessity for a single arrest. The militia boys are to be congratulated on their efficient services.

The M. E. Church cleared, at their cafeteria, between three and four hundred dollars and they gave excellent meals at a reasonable price to the visitors of the fair. Mrs. John Graham, Pres. of the Ladies' Aid, Mrs. H. J. Lee and Mrs. J. R. Newton deserved much credit for the management of the affair, also much credit should be given to the ladies who so ably assisted in serving and preparing.

Mr. A. J. Burdette was taken to the hospital at Portland on Monday of this week, where he underwent an operation on Tuesday for appendicitis. The result of the operation is not known at this time. Last Spring the members of the M. E. Church were divided into two sides to raise money for the completion of the new church; one side had Mrs. J. R. Newton as captain and was called the "Huntlers," while the other side had Mrs. M. J. Lee as captain and was called the "Rustlers." The pastor, Rev. Greedy conceived this plan and set the last Sunday in Sept. as the date for the closing of the contest and he stated that the losing side was to furnish a dinner for the winners. On Sabbath A. M. the result was made public and Mrs. Lee and her side rejoice in that they raised \$655.10 to the other side's \$607. Mrs. Lee worked so quietly that all were surprised at the results, as Mrs. Newton's side started off away in the lead. The results were very gratifying to the pastor, as this means quite a boost toward meeting the indebtedness, which is still considerably over three thousand dollars.

Mayor James G. Dahlman, is serving his fourth term as Mayor of Omaha, Neb., having received the overwhelming support of the voters of that city. His steadily increasing popularity parallels that of a famous medicine he has used, of which he writes: "I have taken Foley Kidney Pills and they have given me a great deal of relief so I cheerfully recommend them."

Fortunes in Faces.

There's often much truth in the saying "her face is her fortune," but it's never said where pimples, skin eruptions, blotches, or other blotches disfigure it. Impure blood is back of them all, and shows the need of Dr. King's New Life Pills. They promote health and beauty. Try them, 25 cents at Huntley Bros. Co., Oregon City, Ore.

Mrs. R. B. Beattie is confined to her bed this week on account of sickness.

MOUNTAIN VIEW.

Molalla Avenue looks more like there was something doing. The water wagon, the rock carrier and the steam roller all busy at the same time last Monday. But we need a policeman in an aeroplane to look down and get the numbers of the autos that speed on this driveway. Last Sunday a party was coming in and when near the church some boys hurled rocks. One struck a man on the head, who was sitting in the rear seat, hurting him pretty badly. But not so badly but that was able to get out and capture the boy and give him a severe beating. We are sorry our boys forgot their Sunday school lesson and acted so unruly. Better be careful boys it may lead to something worse. Think of Jack Roberts and the result of his escapade.

The infant son of Mr. and Mrs. Geo. Terry was quite sick last Sunday and Dr. Mount was called. Mr. and Mrs. Carriero are moving into their new home this week.

Mrs. J. Everhart of Rockwood, visited her son George and wife last Saturday and Sunday.

Wm. Gillett returned to his home in Washington, after spending several days here visiting his brothers George and Dan Gillett and uncle John Gillett.

New sidewalks are being built on South Molalla Ave., by several of the residents.

Mrs. Ella D. Zinn, Dept. Pres. of the state of Washington, visited Mrs. R. M. C. Brown last Friday on her return trip from the National W. R. C. convention at Los Angeles, Cal. Mrs. Zinn and Mrs. Brown were acquainted in Indiana and this was their first meeting for several years.

Mrs. R. B. Moore of Portland, accompanied Mrs. Zinn.

Wm. and Al. Jones visited their mother, Mrs. Roehl, last Monday.

Mr. Heckart is painting the residence of Mrs. Maggie Harrington on Pleasant Ave.

It is pretty hard for some men to get home from the way some have traveled the past week or two. One man took the back seat in the buggy while his wife held the baby and drove the horse. Another had to hold on to both sides of the buggy seat while his wife drove. We wonder if those men would like to take their wives home in the same condition. We think it is just as fair for one as the other. We hope those men will vote for women suffrage this fall for they surely need the ballot.

Mr. Strees has traded his property here for a farm in Douglas county and left for his new home this week.

Mrs. O. H. VanHoy was called to Goldendale, Wash., last week by the serious illness of her daughter-in-law, Mrs. Claude VanHoy.

Mr. and Mrs. Mantz visited Mr. and Mrs. John Baker last Sunday. Miss Alda Clark and Miss Lena Lawrence spent the day last Sunday at Redlands, the guest of Miss Edith Bullard.

Mr. and Mrs. Imier visited their daughter, Mrs. John Darling, Jr., at Ardenwald last Sunday. Frank Welsh is building a small residence near his place, J. Lewellen assisting.

Oral Welsh started last Monday for Chicago to resume his studies at Rush medical college. His mother accompanied him to Portland.

Mrs. I. C. Hasler, Grand Island, Nev., has something she wishes to say about Foley's Honey and Tar Compound. "My three children had a very severe attack of whooping cough and suffered greatly. A friend recommended Foley's Honey and Tar Compound and it did them more good than anything I gave them. I am glad to recommend it."

For sale by Huntley Bros. Co., Oregon City, Ore.

John Velbert, Foster, Calif., states: "I have suffered many years with kidney and bladder troubles, and altho' I have paid hundreds of dollars to doctors and have taken all kinds of kidney medicines, I could not get any relief until I tried Foley Kidney Pills and they effected a complete cure. I have never been bothered with my old trouble since."

COMING TO OREGON CITY

ASSOCIATED SPECIALISTS, WILL BE AT THE

ELECTRIC HOTEL

MONDAY, OCTOBER 14TH

AND WILL REMAIN

ONE DAY ONLY

Remarkable Success of These Talented Physicians in the Treatment of Chronic Diseases.

OFFER THEIR SERVICES FREE OF CHARGE.

The Associated Specialists, licensed by the state of Oregon for the treatment of deformities and all nervous and chronic diseases of men, women and children, offer to all who call on this trip, consultation, examination, advice free making no charge whatever, except the cost of medicine. All that is asked in return for these valuable services is that every person treated will state the result obtained to their friends and thus prove to the sick and afflicted in every city and locality, that at last treatments have been secured that are reasonably sure and certain in their effect.

These doctors are considered by many former patients among America's leading stomach and nerve specialists and are experts in the treatment of chronic diseases and so great and wonderful have been their results that in many cases it is hard indeed to find the dividing line between skill and miracle.

Diseases of the stomach, intestines, liver, blood, skin, nerves, heart, spleen, kidneys, or bladder, rheumatism, sciatica, diabetes, bed wetting, leg ulcers, weak lungs and those afflicted with long standing, deep-seated chronic diseases, that have baffled the skill of the family physician, should not fail to call.

According to their system no more operations for appendicitis, gall stones, tumors, goiter or certain forms of cancer. They were among the first in America to earn the name of the "Bloodless Surgeons," by doing away with knife, with blood and with all pain in the successful treatment of these dangerous diseases.

If you have kidney or bladder trouble bring a two ounce bottle of your urine for chemical analysis and microscopic examination.

Deafness often has been cured in sixty days. No matter what your ailment may be, no matter what others may have told you, no matter what experience you may have had with other physicians, it will be to your advantage to see them at once. Have it forever settled in your mind. If your case is incurable they may give you such advice as may relieve and stay the disease. Do not put off this duty you owe yourself or friends or relatives who are suffering because of your sickness, as a visit this time may help you.

Remember, this free offer is for one day only. Married ladies must come with their husbands and minors with their parents.

Office at Electric Hotel, Hours, 10 A. M. to 8 P. M.

New Type of Steel. New steels are being produced even now, and that of F. Kohlhaas of Düsseldorf is claimed to have quite remarkable properties in its toughness combined with hardness. Though it can be bent double while cold, it can be filed only with great difficulty. Only a low heat, it is stated, is necessary for forging and rolling. The tensile strength is very high, reaching seventy-five tons per square inch, the elongation varying with slight changes of composition up to 45 per cent. This steel normally contains from 0.5 to 1.0 per cent of manganese, 0.2 to 0.7 of silicon, 0.03 or less of sulphur and 0.015 of phosphorus. In manufacture ferromanganese and ferro-silicon are added in turn while the mass is at a very high temperature. In the final treatment the ingots are heated to 1,000 degrees and quenched in water or cooled in air.

Uses of Barytes.

The greater part of the barytes produced in the United States is used as a pigment in the manufacture of mixed paints. It is also used in the manufacture of lithopone, a white pigment. Other uses for the mineral are in the manufacture of rubber, wall paper, asbestos cement and poker chips and in tanning leather. A use of barytes reported from Italy is in the manufacture of gorgonzola cheese. The cheese receives a covering in the form of a thick heavy crust of the fine ground material, which has the property of affording just sufficient protection from aeration.

Barytes occurs in veins as a gangue of metallic ores, also in veins in sandstone and limestone or as a replacement of limestone. The mineral has a wide range in geologic time and an extensive distribution in the United States the principal sources are, however, limited to two districts—the Missouri district and the Appalachian district. A single county in Missouri—Washington—produces about 54 per cent of the total output.

Improved Coal Carrier.

An improved type of coal carrying vessel has just been launched at Blyth, near Newcastle, England, which, in the opinion of experts, will begin a new era in the building of cargo ships. The vessel is constructed on what is known as the "arch" principle, which, it is claimed, offers important advantages over boats of the ordinary type, with a dead weight of 3,100 tons and a draft of eighteen feet four inches. It is asserted to be the fastest collier built, and it will be used for coaling purposes in connection with the British fleet. Smaller capital outlay, cheaper maintenance and increased rate of speed are among the favorable features claimed for the vessel.

Deafness Cannot Be Cured

By local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian tube. When the tube is inflamed, it has a tendency to close, and the hearing is impaired. It is entirely cured, and the hearing restored to its normal condition, by the use of the "Fletcher's" method. It is a simple, safe, and effective method, and is the only one that can be cured by local applications. It is the only one that can be cured by local applications. It is the only one that can be cured by local applications.

Petition For Drainage District.

In the County Court of the State of Oregon for Clackamas County.

In the matter of the organization of Drainage District No. One, To the Honorable County Judge and Commissioners of Clackamas County:

The undersigned petitioners respectfully show that they are the owners of more than twenty-five per cent of the land hereinafter described; that the said land is low and flat and at all times is subject to overflow during the rainy season and requires drainage in order to render it useful for agriculture, and for that reason it is necessary that a drainage district shall be organized and created under the laws of the state of Oregon for the purpose of properly draining said tract of land; that the tract of land necessary to be included in said drainage district is described as follows, to-wit:

Beginning at the Northeast corner of Block Seven (7) in Jennings Lodge, as platted, and of record in the Recorder's office of Clackamas County; thence along the South line of Block Twelve (12) to the Southwest corner of said block; thence along the West line of Block Twelve (12) and Thirteen (13) to the center of Boardman Avenue; thence West along center line of the Avenue to the Southwest corner of Block Eleven (11); thence along the West line of Block Eleven (11) to the Northwest corner of said block; thence in a straight line to the Southwest corner of Block numbered Five (5) in Covell plat; thence along the West line of Blocks Five (5) and Six (6) to the Northwest corner of Block Six (6); thence in a Westerly direction One Hundred and Seventy-five (175) feet; thence in a Northwesterly direction to the North line of the Naef tract along the contour of the hill to the County Road culvert known as the outlet of the ditch; thence along the North line of the Rue acreage to the intersection of the North line of the Naef tract; and along the said line to a point at right angle with Block Eleven (11) in Covell Plat; thence South along the East line of Blocks Eleven (11) and Twelve (12) to the North line of the H. N. Smith tract; thence North along said line to a point at right angle with the East line of Block Twenty-Six (26) in Boardman addition; thence along East line of said Block Twenty-six (26) to the intersection of center line of a street (unnamed in the Boardman plat); thence South along the center line of said street to the point of intersection of Jennings Avenue; thence along center line of Jennings Avenue to the West line of Maywood tract; thence along West line of said tract to the center line of Hull Avenue; thence along center line of Hull Avenue to the intersection of the center line of Addie Street; thence North along center line of the street to the intersection of the center line of Jennings Avenue; thence West along center line of street to the East line of O. W. P. R. R. right of way; thence along said R. R. East line to a point at right angle with the point of beginning.

Comprising approximately Two Hundred Twenty-Seven (227) acres, as per map or drawing made from the original blue prints of the engineers of the Jennings Lodge and Covell districts.

That said lands are all located within the County of Clackamas; that said district is at present partially drained by a ditch constructed many years ago but which is wholly inadequate in size or depth to properly drain said

tract of land; that the same can be properly drained by enlarging and deepening said ditch under the direction of a competent engineer, and the proposed drainage system should follow practically the course of the present ditch, commencing where the culvert constituting the outlet of the present ditch intersects the County Road known as the River Road, near the North line of the Naef land and following the present line, the said ditch, across the Naef land and under the Oregon Water Power Railway (Track near Naef's South line); thence Southerly following the line of the present ditch with such lateral as may be necessary to complete said drainage system.

YOUR PETITIONERS THEREFORE PRAY, that said drainage district may be organized by order of your Honorable Court, and that trustees for such district be appointed, and your petitioners desire that H. N. Smith and James McMonigal and James L. DeLong be appointed trustees for the first year and until their successors are chosen and qualified.

An ideal finish for settees, flower stands, porch furniture, garden tools and all surfaces that must withstand exposure and hard usage. Ready to brush on and the label tells how. JONES DRUG COMPANY, Oregon City.

HOW BLOOD IS MADE. The liquids and the digested foods in the alimentary canal pass through the wall of the canal into the blood. This process is called absorption and takes place chiefly from the small intestine. After absorption the blood carries the food through the body, and each cell takes from the blood the food it needs. A pure glyceric extract made from bloodroot, mandrake, stone, queen's root and golden seal and sold by druggists for the past forty years under the name of Dr. Pierce's Golden Medical Discovery, gives uniformly excellent results as a tonic to help in the assimilation of the food and in the absorption by the blood of the food it requires. Eradicate the poisons from the blood with this alternative extract which does not shrink the white blood corpuscles, because containing no alcohol or other injurious ingredients. Thus the body can be built up—strong to resist disease. This is a tonic taken from Nature's garden that builds up those weakened by disease. Dr. Pierce, founder of the Invalids' Hotel at Buffalo, N. Y., has received many letters similar to the following: Mr. FRED R. MUNRO, of Pasadena, N. S., writes: "I take great pleasure in writing you as regards my case and its cure. In September I was taken with Typhoid Fever, which put me in a dreadful condition. I was weak, ran down, nervous and was reduced to a mere skeleton. I had tried most everything I could get but nothing did me any good until at last I was advised to try Dr. Pierce's Golden Medical Discovery, and 'Pleasant Pills,' which I did. Before I had used one bottle I had a great improvement in my condition. I continued to use two bottles, using only a few pills of 'Pleasant Pills.' I returned to perfect health. I cannot find words to express my thankfulness for this wonderful medicine. I advise all sufferers to write to Dr. R. V. Pierce, as he cures when others fail."
