When you get wool the demand for wool will increase beyond all expectations, and the result will be that wool prices will go UP, at the same time the wearer will get double for the money he pays now, because he will get HIS MONEY'S WORTH.

There is demand enough for wool in this country alone to take the coat off every sheep's back in the U.S. or Australia and yet keep the prices up-and you may keep on your tariff or you may take it off.

The present system of clothing graft is a hundred times worse than passing counterfeit money. The manendum have done away with the old ufacturers and the wholesalers and log-rolling tactics by which approprithe jobbers get it, and the wool rais- ations from the state treasury could ers at one end and the wool wearers at the other pay the rotten steal for almost any amount and for-alwhich our government sanctions.
