Bull Run Water Again

There is an investigation under way by private citizens to see what may be done for water for this city; one of the propositions is the Bull Run supply from Portland, and the other the Canby supply. Some of the business men of the city declare that Bull Run water can be had, that a half of the great supply is now running to waste, and it is but a matter of going at it right with the Portland officials to get a supply—not only for this city but the cities and towns between here and Portland

An Endless Chain of Sickness.

There are upwards of one million deaths each year in the United States. In 98% of cases the people who die are less than sixty-five years old. The evils that are due to disease can be escaped just in proportion as the conditions and habits that bring on disease become more widely understood.

Then too a chronic disease which may baffle the skill of the general practitioner may yet be permanently cured by the Physician who has made one line of disease a specialty.

Physician who has made one line of discase a specialty.

It would be just as absurd for the Professor in a medical college presuming to lecture on all subjects as for the one Physician to presume to understand the nature and cure of every disease.

That is why Dr. R. V. Pierce established the Invalids' Hotel and Surgical Institute many years ago—with a full staff of Physicians and Surgeons—who though educated to practice in all departments of medicine are here assigned to a special department only—to which each specialist devotes his entire time, study and attention.
