Won't consider it.

I heard a bright man say recently that he would go insane if he allowed himself to think of death and the hereafter. And then this man, whom I have called bright, added to his remarks that when a man died that was the end of him, and what was the use of hastening that end by insanity. I have respect for the opinion of any man who can sustain it.

But when a man sticks up his pitiful, punny little intelect as an argument against a wonderful universe, against a sun that rises and sets, against the law that moves the millions of stars in their courses, against a power that makes life and motion a power that makes a world teem with vegetation, that dispenses heat and cold, showers and sunshine—when a man will look these wonders vided for the construction of a govof administration in the face and say there is nothing behind them, I believe the more he thinks of them and the sooner he becomes insane the better.
It's human to dodge the hard problems of this life as best we can and

believe, yet because we can't believe, and sit down in a kitchen chair and we have no right to condemn. I don't care how you may reason, what you believe or disbelieve. The cold clamy facts that we can't get a-way from is that we must die.

Christianity tells us the end is not in the grave. If you can believe you are alive, you you can believe in a power that gives

What the wave not doesn't

In the judgement of the Courier there was absolutely no excuse or justification for the shooting down of the Portland boy by the man with a star last Sunday.

As we understand it the boy had a gun in the pocket of his motorcycle and when a dog attacked him on the highway he shot that dog.

He had a right to shoot that dog.

He had a right to shoot that dog.

METAPHYSICS. That the spirit of man will

ever wholly give up metaphysical investigations is just as little to be expected as that in order not always to be breathing bad air we should stop breathing altogether. Metaphysics will always exist in the world and, what's more, exist with every one, but more especially with reflective men, who, in default of public standard, will each fashion it in his own way. Now, what has hitherto been termed metaphysics can satisfy no acute mind, but to renounce it entirely is impossible; hence a critic of pure reason itself must be at last attempted and when obtained must be investigated and subjected to the universal test, because otherwise there are no means of relieving this pressing requirement, which means some thing more than mere thirst for knowledge.-Immanuel Kant.
