Mr. Stephen Carver dared, however, and within eighteen months will have a competitive electric line operating between Portland and Oregon City. The right of way has already been secured between the Clackamas River and Milwaukie, and the big construc-tion crew working out from Clackamas is now moving along rapidly on its second mile. Folks don't have to be told the immense value of such a line to this community. It needn't even be said that we'll have a better

Carver is not a novice at the male Brother Brodie railway game. He has built two lines before, each larger than the present proposed road and in each case he made good and the lines finished on contract time. Carver doesn't claim to have any of the big interests behind him; he isn't a shouter nor a promoter of visionary promises. He simply puts the proposition up to the people in plain language without dec. people in plain language without decoration. More men are wanted at the construction camp, especially clearers. At present there are about fifty men employed and the clearers are having a difficult time to keep ahead of the grade men. With an increased force which is being put on as men apply, it is expected that the right of way will have been graded as far as the Clackamas river in Gladstone within sixty days. A COMMON FARMER'S VIEW Remarks on the County's Two Candidates for Governor

Sept. 4th, 1913 Speaking of candidates for the nomper has it figured out that Grant B. Dimick is the only logical Republican for that position. Well, he may be right but I for one, cannot see it that way. To me Mr. U'Ren seems a much bigger and better man.
