STARK'S WEEKLY COMMENTS

An inquirer of the Oregonian in regard to the SS in use on legal documts such as summons and the like is informed that its origin is obsolete; its meaning unknown, and its usefuliness nothing, but the custom continues among lawyers merely as a custom without merit. When I was a boy a chum went to the County Seat and "accepted" a position as office sweeper for a prominent law firm at the county seat, much to the envy of yours truly and others. He informed me it was an abreviation of the Latin words "Soakeda Suckera," but he would not translate it into Missouri dialect, saying it was against the ethics of the profession to tell a layman a professional secret. As I never studied Latin I can only guess at the meaning, but perhaps some one post-ed, like the retiring superintendent of public instruction, could elucidate the

Dr. Owens-Adair says "it" will be before the next session of the legis-lature with another and better bill. If not past the age, I suggest "it" be treated to a dose of mutilatization. Its Owen dope.

the governing?
Did you notice all this before election and then vote with the big crowd so as to win? Then you are a picbald, two-legged close relation to a donkey.

After giving a graphic description of a female Indian, clothed in up-to-date fashion, filled to the brim with "aqua miracules," M. J. Brown writing in the Courier, proceeds to argue that the noble red man or woman is not fit for civilization. After describing the high class stunts she pull-ed off, I fail to see that this product of Carlisle is not finished, except that she was possessed of that native hon-esty, and made a street exhibition instead of doing her prettiest at a New Year's dance or charity ball. Of course she might have joined the D. A. R., W. C. T. U., K. L; X. Y. Z., etc, then if she get till of then if she got full of "conversation water" she would have kept the streets where the low brows would not have seen her, and no one but a ociety reporter would get a chance for

a write-up. Mr. Brown, you may think because you may win an indictment, you are qualified to criticize, but you need a term in jail—that monument of mod-ern civilization, before you are a graduate. Your think tank leaks at the wrong end; you need a new gas-ket. Civilized? Well, I should say a

to accept drugs or alcoholic mixtures when nature craves nourishment to repair the wasted body and restore the vigor of health

For forty years the best physicians have relied on the whole some predigested nourishment in Scott's Emulsion which is totally free from alcohol or opiates.

Scott's Emulsion sharpens the appetite renews bloodnourishes nerves-strengthens bones and restores the courage of health to make life bright.

Scott's Emulsion sets in action the very forces that promote health; it is pure, rich strength.

The season for the periodical small-pox "scare" is now approaching—it usually comes with cold weather in northern latitude, as stated previously. You have nothing to fear from this disease, as it is Nature's house-cleaning, and is caused by internal filth, together with improper atmospheric conditions—and is no more spheric conditions and is no more contagious than a broken leg is.

The medical doctors have long drugless methods of healing are remade a mountain out of this molehill quested and urged to copy and reand when a sporadic case appears, produce these articles and spread the vaccination harvest begins, quar-antine is established, schools are closed and the "scare" is worked to a nity and the only way we can reach finish on the ignorant and supersti-tious people. Eat right and keep clean and you will have nothing to fear. You could not "catch" smallpox

Anti-Typhoid Serum The A. M. A. through its parasites, the various boards of "health" and other tools have recently flooded the subsidized press with statements of the wonderful efficacy of anti-tphoid serum, stating among other things, the typhoid fever had been wiped out in the U. S. army and navy. This of course is deception, which is a large factor in the work of the medical

fraternity. To begin with, soldiers of the army as a body, are nearly physically perfect, enjoy perfect health, lead methodical lives under the best pos-sible hygenic conditions, and being in such fine physical shape as to be able to resist and throw off disease. Many of them are not able, however, to throw the blood poisoning effects of the vaccine, and the deaths that oc-cur from "menigitis," "tetanus," cur from "menigitis," "tetanus,"
"paralysis," and kindred diseases,
produced by the vaccine and their
death is not attributed to anti-typhoid vaccination, which really caus s these diseases.

It is also a large factor, with vac cination for smallpox, in the great in-crease of tuberculosis and cancer. Vaccines or serums for tuberculosis, cancer, typhoid, smallpox, scarlet fever, measles, meningities and other diseases may kill you and can't cure ou. Don't allow it, but consult

The State Board of Health Illegal According to Section 4886 of Lord's regon Code "the State Board of Health shall consist of six members and a secretary who shall be reput-able physicians." So far, so good. It does not say that they shall all be medical doctors and the Governor of the state in appointing all members of one school, has deliberately viola-ted the law and Section 20 of Article l of the State Constitution, which forbids class legislation and monopoly. It is up to any taxpayer to get a writ of injunction against this board as now constituted as being a monopoly in violation of law, there-fore illegal. This would cut off \$5,000 per yea rpaid to Dr. Calvin S. White a starter, beside other expenses To be a legal body it must consist of octors of different schools. State University Medical Department

House Resolution 608 at the last ession of the legislature appropriated \$45,000.00 for 1913-1914 to sup-port the medical department of the State University, supposedly a non-partisan institution supported by all classes of taxpayers and which, in reality, is in the hands of a gang of political doctors, who teach only allopathic medicine, drugs, serums and operations. No drugless school methods are taught. You taxpayers, who are opposed to drugs and who are opposed to drugs and op-erations, are you going to stand for this much longer?

Compulsory Vaccination in Pennsylvania The New York Herald of Sept. 22,

1913 reports:
"Raymond F. Clee, age five, and Catherine Flynn, age seven, are the dead victims of compulsory vaccination. Under the wholly infamous and tyrannical Pennsylvania school law, it was compulsion with a vengeance. The doctors (allopathic) and health boards (allopathic) have fastened themselves on the public and the people are helpless."

Thanks to the Health Defense League of Portland and the National League for Medical Freedom vaccination has been abolished in the Port-land public schools and it is not compulsory in Oregon. If you care any-thing for the future lives of your children, don't allow them to be vac-

Why Not Organize in Oregon City? The Health Defense League of Portland has been doing a wonderful work in ferreting out cases of medi-cal malpractice—protesting against old school moss back methods of dealing with disease and preventing vac-cination for smallpox in the schools and among the employees of the large corporations, and it has kept the city "health" department on the defensive ever since our figurehead mayor took hold, I suggest that the citizens of Oregon City organize a local Health Defense League and if you send to me I will post you how to go about it. You will need one to off-set the Oregon Social Hygiene fake. Farmers Should Object

One of the most diabolical grafts perpetrated by the allopathic medical perpetrated by the allopathic medical fraternity is the Tuberculosis test for cattle. This is one of the biggest grafts in the United States and it should be resisted to the last by every farmer who owns cows. The drug trust in the shape of the National Drug Co., in Washington, D. C., makes this serum and it must be sold, Instead of being a "test" in any way it has the same action on cows that tuberculosis has on human beings; it gives cattle the disease and ings; it gives cattle the disease and whole herds of fine cattle have been destroyed by this filthy stuff. It does no good and if a cow is healthy it gives it tuberculosis.

The filthy stuff, which has killed so many people, has at last been pro-nounced a failure by the medical profession. Once a human patient is in-oculated with tuberculosis and he never recovers, and usually dies in three or four months. I have heard it whispered that the Beef Trust is interested in this serum, so by kill-ing off cattle high prices can be kept up for the trust. Of course they pay

what they please to the farmer. Pasteur "Rabies" Treatment The location a Pasteur institute in locality means "mad dog" scares and all that is necessary to produce "rables" is to locate one anywhere. The institute will see that "rabies"

Children Cry FOR FLETCHER'S CASTORIA

A SIMPLE ROUGH CAST COTTAGE

Design 757, by Glenn L. Sexton, Architect, Minneapolis, Minn.

PERSPECTIVE VIEW-FROM A PHOTOGRAPH.

Here is a cottage plan that makes a very economical home to build. It provides for seven rooms and a bath. Size, 24 feet wide and 26 feet deep over the main part. First story, 9 feet; second story, 8 feet. First story finish, red oak or birch throughout; second story pine to paint, with maple or birch floors in both stories. Cost to build, exclusive of heating and plumbing, \$2,300.

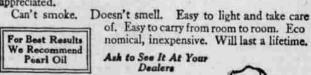

Upon receipt of \$1 the publisher of this paper will supply a copy of Saxton's book of plans, "American Dwellings." It contains about 250 up to date designs of cottages, bungalows and residences costing from \$1,000 to \$6,000.
