THINGS we characterize as "impossible" when told us, cease to be miracles when seen and heard with your own eyes and ears-

BISHOP HURST years ago when told that the first tinfoil phonograph was an instrument that "talk back after being talked to" characterized the announcement as a fake. Not till he had visited Edison at Menlo Park and heard his own voice from it would be believe. Then be MARVELED!

The good bishop is long since dead but there are other doubting Thomas'es today who won't believe the SECOND EDISON WONDER, till they see it and hear it with their own eyes and ears. They are inclined to characterize the statement that it is

as an exaggeration. But the facts remains that they will MARVEL more at its human voice than did the good Bishop in days gone by. And the more critical the ear the keener will be the enjoyment as they listen. There is absolutely nothing with which to compare it. It represents EDISON'S CROWNING TRIUMPH to perfectly record and perfectly reproduce sound. Don't argue; HEAR IT!

"REAL MUSIC AT LAST" will be your verdict as it has been of all who have heard it.

MATHEMATICS PASSED UP EASILY BY MR. TEMPLETON

Councilman not Particular Regarding

Culvert's Shape or Capacity Professor Tooze being absent from evening, Councilman Templeton was able to put over some rather unexpected arithmetic on the city fathers. The subject under discussion was proposed concrete culvert to carry the waters of Singer Hill creek under Seventh street, and in a report sub-mitted Mr. Templeton suggested that concrete drain 30 inches square be built, and that the city advertise for bids on the work. In the course of an explanation of his report, Mr.

Templeton said: "It is not definitely suggested that this culvert be 30 by 30 inches. It may be deemed to have it 40 by 20 instead, or to use 30 inch concrete pipe The idea is to use whatever shape ulvert will require the least ecxava tion, and so save money for the city.

This interested some of the spec

tators considerably, who figured out that the three named shapes of pipe would each have a different capacity An inquiry was made as to whether all these forms of pipe would have ability to carry off the volume of water in flood time. Some of the spectators went away from the counchamber busily figuring out the relative carrying capacity of a cul-vert 30 by 30 in cross section and one 40 by 20—and found a considerable
