Matters This is a mere catch phrase for serums and vaccines and these filthy poisons are so-called for the specific purpose of deceiving people. It is the last resort of the medical fraternity to gull the people and their efforts are now directed to hastening this diabolical fake on the people by law if possible, and make it compulsory, and that is why so many doctors are candidates for office. No sane person on second thought would sane person on second thought would ever accuse the medical fraternity ever accuse the medical fraternity of being philanthropists, and the idea that they seek to abolish all disease by "preventive medicine" or any other agency, and thus destroy their own living is absolutely preposter-ous. These doctors after watching serums kill thousands of people know that their administration means more business for the future, for they plant the seeds of cancer, tuberculosis, smallpox, menigitis, tetamus, measles

scarlet fever, mumps, diptheria and other diseases. Prevention of disease will never come from rotting the bodies of school children and others, but can be largely modified and eventually prevented, by cleanliness, sanitation and correct living and dictary, something the medical profession knows little about. If the people who call medical doctors would forbid the use of serums and vaccines, "preventive medicine" would soon be a thing of the past, but the doctors are the chief owners of the serum factories and vaccine farms and this filth must be vaccine farms and this fifth must be sold, even if given away "free" by state health officers, for the taxpayers foot the bills. The State of Oregon sets aside \$1,000 a year for smallpox vaccine, done, of course, at the instigation of the state board of backlets. health. By the way, I would like to ask Mr. U'Ren, Mr. Smith, Mr. Withycombe and the other candidates or governor, to state through this paper if they are in favor of the medical monopoly now illegally existing in the state board of health, and which is costing the taxpayers of Oregon over \$100,000 a year. They have stated what boards they would consolidate and abolish, but not one word about the most expensive and useless one of all. I think the tax-payers will be glad to hear from these gentlemen. Is there one among you with the backbone and nerve enough to declare yourself on this

Prohibition and Woman Suffrage Personally I am an abstainer and am opposed to the American form of saloon, but while I am for temper-ance in eating and drinking, my past observations and an experience of living more than 20 years in so-called "dry" sections of Southern California, leads me to believe that computsion is a bad thing to use on people whether to correct their habits of eat ing and drinking, or in saddling one kind of medicine on them. Prohibition is a great thing, in communities that have never tried it and it always comes out second best and never prohibits. I lived in Los Angedles when the anti-saloon league forced a vote on making that big city "dry"-it went two to one wet. Then came female suffrage and the same people called another election a month after the women could vote. It went three to one wet.

bitionists, and that after the first flush and novelty of voting is over, it settles down to the short haired voting "dry", the home-loving woman not voting, and the great mass of often unrecognized rests on the indi-"consumers," such as working women and others who like personal liberty, voting with their husbands, brothers and fathers. These are cold facts, widest open states in the Union, and have had woman suffrage more than 20 years each, and I heard the lady president of the federated clubs of Colorado say, in a speech in Los Angeles, that for 16 years they had tried to repeal the law granting women the right to vote, but could not ac-

complish it. In California the recent election showed that after 2 years of women voting many places "dry," the same places went "wet" and the "wet" places went wetter. Education and sane methods will accomplish more to abolish the liquor traffic than com-pulsion, for the latter method is odious to all Americans, and even if it is accomplished it never prohibits, and makes moral cowards and perverts of men who otherwise would be good citizens.

Items of Interest Governor Glynn, of New York, vetoed the bill granting Christian Scientists the right to practice in New York. The medical trust was too strong for this Tammany weak-

per cent, of the diagnosis made at Bellevne Hospital in New York, were wrong. They admit this much. If I'm the sight and Friday, one to take A committee has found that 47.7 the truth were known, not more than 10 per cent would probably be near-er the mark.

Two policemen in Washington, D. C., were recently bitten by a dog. Both died under the Pasteur treat-ment. Public Health Surgeon Has-seltine wrote about it: "There is seltine wrote about it: "There is one condition seen in these patients that seems to be the direct result of the treatment, viz., paralysis, more or less complete and often so extenof less complete an entire to be a cause of anxiety as to the final results," Anyone wishing this "famous" treatment for dog bite can get it from Dr. Calvin S. White, our \$5,000 a year "health" officer in

Portland.

An order for the sterilization of twenty-five convicts at the Fort Madison penitentiary, Iows, was recently rescinded. The convicts took the matter to court and their lawyers will press the point anyway, for fear of future orders.

Eric Nardstrom, of Minneapolis, was forcibly taken by the police, out

was forcibly taken by the police, out of his house, in a patrol wagon, to the Hopewell tuberculosis haspital. Still we speak of the freedom we enjoy in this country.

2500 patients and 450 nurses were exclused vaccinated in the Binghamp-

ordered vaccinated in the Binghampton, N. Y., state hospital by Czar Biggs, state health officer. This is a sample of what you will get in Oregon if you don't put the right men in office.

in office.

Typhoid Fever

I have assisted typhoid fever patients to recover in from three to ten days, instead of letting the disease "run its course" by the following simple method: Flush the colon twice daily for a few days, drink orange and grape juice, alternately, one third glass of juice and enough water to make one half glass altogether every 30 minutes until four o'clock. Put one tablesnoonful of lemon juice in the grape juice. Eat lemon juice in the grape juice. Eat nothing for a few days as the juices will be sufficient. Feed warm cooked fruit and green leaf vegetables, raw

and cooked when beginning to re-cover, when sick the gastric fluids are withheld and a sick person cannot di-gest food and it decomposes and makes trouble.

children. They furnish medical inspection, school nurses, medical and dental clinics, and buildings designed with proper regard for lighting, ven-

with proper regard for lighting, ventilation, and seating.

On the other hand, not one state in five provides even the simplest medical inspection for children in the country schools. What is the result? A study of twenty-five typical cities and of hundreds of rural districts, chosen at random in Massachusetts. New Jersey, Pennsylvania Virginia, and Idaho, shows these persentages: curvature of the spine, wing largely to school seats. sentages: curvature of the spine,— owing largely to school seats,—15 in the cities, 3.5 in the country; ear crouble, 1 in the cities, 5 in the coun-cry; eye defects, 5.1 in the cities, 21.08 in the country; adenoids, 8.5 in the cities, 21.5 in the country; en-larged tonsils, 8.8 in the city, 30 in

the country.

In one city, for example, 69 per cent of the school children have some physical defect serious enough to warrant medical attention; but in 1,831 rural districts in the same state the percentage is 75. In the crowded city of New York, less than 1 per cent of the school children have any affection of the lungs; in the rural schools of a Virginia county, the per-centage is 3.7. Heart trouble is twice centage is 3.7. Heart trouble is twice as prevalent among country school children as among those in the city schools; and although 23.3 per cent of the city school children suffer from poorly nourished bodies, in the country schools the percentage is 31.2.

The investigation shows in definite

The investigation shows in definite terms the progress that the cities are making and the returns that they get from their investment in medical supervision for the schools

What the cities are doing for their own children, the states, as far as conditions permit, should do for the children in the rural districts. Some a month after the women could vote.
It went three to one wet.
Radical prohis fail to grasp the fact that all women are not prohibitionists, and that after the first cannot unaided do the work thoroughly, although many could easily accomplish much more than they do now. Above all, a responsibility too

SHUBEL

The rain Saturday and Sunday means more dollars for the farmers, while it probably meant less for the merchants in Oregon City on Booster No doubt they expect to get theirs some other day.

Quite a number of farmers are

complaining about chicken thieves getting their chickens. Otto Liman shot one Saturday night, it took sev-eral shots to end his thieving career. It will take something else to end the scent. It was a skunk.

Geo. Kirbyson is here visiting few days, not being able to work as he was in the hospital several weeks

crippled with rheumatism.
The man who posted a lot of bankrupt sale bills here last week, caused and bottom. The next time he puts up bills in that shape he may run into a bunch of trouble.

L. Moser has the foundation ready his new house, H. S. Grasse and wife, from Oklahoma, who were visiting with his brother, Arthur Grosse, left for Eastern Washington Tuesday, to stay

went to Portland Friday, one to take in the sights, the other to visit with her relatives a few days. D. J. Makinster is kept busy with his wood saw sawing next winter's

wood for the farmers.

Jacob Grossmuller Jr. who was at ome several months, went back to

Portland to work.

Corn and late potato planting are being crowded now, and if some of the game wardens will kindly come and keep the China pheasants from digging up the corn they will pre-vent some of the farmers from break ing the rame laws. If the birds must Roberson were guests of Mr. and Mrs. S. S. Boutz, Saturday and Sunbe protected, our crops surely ought to have some protection.

Accidents to the flesh will happen, no matter how careful you are. Ballard's

SNOW INIMENT

Kept always in the house is a guarantee of prompt treatment whenever there is a cut, burn, bruise or other injury to the fiesh of any member of the family. The sooner these wounds are treated, the greater certainty that they will heal without much pain or loss of time. It is equally certain that the torture of rheumatism, neuralgia and sciatica, lame back, stiff neck and lumbago will be eased, and the disease speedily driven out of the body. If you have it on hand the suffering is short and the cure is speedy and complete.

May 28, 1914. Editor Courier: MHERE CITIES WIN

Health of City Pupils Much Better Than Those of Country Schools

The following editorial from the Youth's Companion is sent to the Courier by a lady reader with request that it be published:

Which are healthier—city children or country children? Can there be more than one answer? Country children have the pure air, the wholesome food, the exercise, and all the other good things that farm and village life afford. The city is the place of the tenements and the pitflai slums, of poverty, neglect, and ignorance. Of course, then, country children are healthler.

That has long been the popular belief, but the National Counci! of Education and the American Medical Association have upset it. Through the subject for two years in all parts of the country, they make the amazing report that country school children.

The conclusion will astonish us the country of the country of the country, and have mean and the less healthy than city school children.

The conclusion will astonish us the country of the country of the country, and have mean and an attendance of the country school children.

The conclusion will astonish us the country of t In my article in the Courier of the 21 inst. on "Good Ronds Without Bonds," you make me say, "that I

cent. less healthy than city school children.

The conclusion will astonish us less if we stop to think how times have changed. It is no longer merely a case of city against country life, but a case of city oversight and care against rural indifference and neglect Four hundred of our cities look carefully after the health of their school children. They furnish medical in-

"Anthony and Cleopatra."

GREAT HISTORIC DRAMA COMING TO GRAND

Anthony and Cleopatra to be Shown Here on June 1 and 2.

Through the magic medium of the photo-play the most tragic of history will be shown in the Grand Theatre, Oregen City, Monday and Tuesday, June 1 and 2. Manager Charles Sch-

leave nothing to be desired. Staged elaborately and with an accuracy of detail, the scenes will depict both Rome and Egypt at their times of grfeatest progress and magnificence; throughout the action of the selint drama will run the thrilling and passionate account of the selint drama will run the thrilling and passionate account of the selint drama will run the thrilling and passionate account of the selint drama will run the thrilling and passionate account of the selint drama will run the thrilling and passionate account of the selint drama will run the thrilling and passionate account of the selint drama will run the thrilling and passionate account of the selint drama will run the sionate conquest of the great War-rior by the East's most famed queen. The costuming of the characters is superb, and the great scenes showing the masses of troops and people will not only be impressive but will be instruction as well. nstructive as well.

The story of "Anthony and Cleopatra" tells of the events that occured in the neighborhood of the year 41 B. C. and which did much to mould the later history of the civilized world. Starting with the landing of Anthony's victorious army at Alexander Company of the civilized world. Anthony's victorious army at Alex-andria, and the commander's request

that Cleopatra visit him and explain why Rome's law had not been ob-served, the action of the drama shows the rapid conquest of the great general by the beautiful Egyptian queen, and the Roman's abandonment of his duty so that he may bask in the presence of his new-found love.

The efforts of Marc Anthony's wife Octavia, to win back her lord from the allurements of the Egyptian are June 1 and 2. Manager Charles Scharam has secured the Italian "Cines" shown, together with her repulse and production of this historic drama of conquest, and in its many reels the story of "Anthony and Cleopatra" will be shown on the two dates named above. To prepare these films all the skill of the moving picture expert was utilized, and over 7,500 people enacted the scenes which taken together make this greatest of all great photo-dramas. hoto-dramas. the pomp and ceremony of his fun-Sceinically the production will eral afford further opportunity for spectacular motion-picture marvels; and the entire production comes to a climax in Cleopatra's own death, which she seeks to save herself the indignity of being taken back to Rome a captive.

Those who have see nthe "Cines" production pronounce it the greatest production pronounce it the greatest masterpiece that this enterprising producing company has yet turned out, and when it is recalled what a triumph "Quo Vadis" was, this is saying a great deal for the films. Manager Schram believes that in obtaining this great production for the patrons of the Grand Theatre he has done his utmost to give Oregon City done his utmost to give Oregon City people only the best in photo-plays, and offers "Anthony and Cleopatra" for two days as the crowning feature of the present year's season at his
