Save Your Eyes!

Your eyes are your breadwinners—take care of them If they need help, help them—and help them quickly. Scientists say that out of every hundred people to-day, not more than two have perfectly normal eyes. Of the other ninety-eight many go through life with poor vision—and never know it. They don't know what really good eyesight is.

Others suffer for years from incorrect vision—eye-strain which wearing of proper leases would entirely re-

If your eyes tire easily—if you experience discom-fort when looking at small objects—if things appear to "swim" and "blur"—if your eyes are no longer equal to the work of the day—they are in trouble, and need help.

Do not delay and run the risk of more serious trouble. Long experience enables us to give troubled eyes just the help they need. All work done by an expert optician, Satisfaction guaranteed.

Woman Voter Says City Council has Done Damage Enough

Last week's Courier surely spoke the sentiments of the people of Ore-gon City in regard to the elevator and the city council. Rather than pay Mrs. Chase, or anyone else, for land that would never be used, such an exorbitant price for a few feet to be used as an approach to the elevator bridge. I say move the elevator if it takes half of the \$1600 dollars of-fered her. Move it to 8th street and t will only help the appearance of that part of the city but will be as easy for the public to reach. And if our city council cannot be made up of better men than some who are in it, recall them when our election is called for the removal of the elevator Mr. and Mrs. William Meohnke and little daughter, Catherine, formerly of this city but now of Eagle Creek, were in this city the latter part of the week on their way home.
