

OVER FIFTY FAMILIES AIDED

Woman's Club Gives Report of its Work—Other Matters of Interest

The regular meeting of the Women's Club was held in the parlors of the Commercial Club, Thursday, January 14.

Mrs. Shanks reported that the Night School is still doing good work.

The report of the Committee on revising the By-Laws was accepted, and the chairman, Mrs. Caulfield, was instructed to have two hundred copies printed.

The literary hour was in charge of Mrs. C. Schuebel. She introduced Mrs. Montgomery of Portland, who spoke on "Dress of the School Girl."

The next meeting of the Club will be January 28. This is called Red Letter Day or Scholarship Loan Fund Day and will be in charge of Mrs. C. A. Nash.

being still further penalized.

Billy Sunday's big tabernacle at Philadelphia was nearly torn down by a frantic mob last week in their endeavor to get inside.

Sunday is a great hypnotist and so was Dowie, but they get no people of brains or great intellect.

Please tell me what sense there is in throwing vast sums of money at Sunday when he is already very nearly in the millionaire class.

The Boone Republican, published at Boone, Iowa, where Sunday once resided, said in an article that the body of his old mother laid in a neglected grave and that his brother, who was partly demented, was in the poor house.

He comes honestly by his tricks. His mother drew a pension as the widow of Sunday's father, who was an old soldier, and not long after his death married again, and the second husband soon expired.

All kinds of predatory fish and birds follow the smelt in their annual migration to the spawning grounds in order to prey upon them.

A literary society and debating club is on tap here now, and the question last week was resolved: that the U. S. should intervene in Mexico and it was decided in favor of the negative.

One quarter-section of land was sold here recently and enquiries are on foot for more in the same vicinity. This is the first piece of land that has changed hands in some time, and there is evidently going to be quite a boom here this season.

Gladstone W. C. T. U. The man who drinks never takes the consequences—they are borne by his family, his employer and his grocer.

If the men who vote for saloons had to furnish the boys to fill them, every town would go dry.

May God forgive our greediness And help us set the standard up For body, mind and soul!

E. A. Sealey, Press Supt. E. C. Moran, Pres.

PERSIA'S DEVIL PLANT.

It is Death to the Animal It Grips With Its Claws. The devil plant they call it in Persia, and well they may, for it is more deadly to the flocks and herds that play so important a part in their life than is the loco weed to the herds of our southwestern states.

It is in the family that the devil plant gets its deadly work. The flowers give place to seed pods with great belly like capsules and long, stiff, lank stalks like those of a bent of prey.

The animal's body lies in the open and decays, and into the decomposing flesh the hundreds of black seeds contained in the capsules of the clawed pod are discharged, for it seems that earth is not rich enough for them and only in decayed flesh can they find enough nourishment.

Drivers of caravans cause the devil plant, for it may cost them many of their beasts when these are turned loose to graze at night.

"Johnny," queried the teacher, "do you know the meaning of independent?" "Yes, ma'am," answered the little fellow. "It's when you don't owe no body nothin' 'an' can look 'em in the eye and tell 'em to go to blazes."—Chi cago News.

STORIES OF FLAGS

Origins of Some of the Emblems of European Nations.

THE TRICOLOR OF BELGIUM.

It Was Originally the Standard of the Duchy of Brabant—Complex Colors of Austria and the Flags of Germany, France, England and Russia.

Prior to the Franco-Prussian war of 1870 the German empire was little more than a group of scattered states. When they combined into a single empire, however, traces of all their flags were combined in the resultant standard.

To be sure, the colors of Prussia—black and white—and the Prussian eagle enter very largely into it, but it must be remembered that the country became at that time the head and ruler of all the others.

Since the Japanese took the island after their successful campaign against China in the nineties they have been carrying on a carefully conceived plan of gradual penetration of the valuable camphor regions.

In spite of these elaborate precautions, the loss among the camphor gatherers amounts to hundreds of deaths annually.

It is calculated that Formosa contains about a million camphor trees, some 10,000 of which are cut down every year.

The flag of Austria is a very complex affair. To begin with, the various Austrian provinces have their own flags. Bohemia is red-white. Tyrol is white-red. Dalmatia is blue-yellow. Galicia is blue-red. Croatia is red-white-blue and Istria is yellow-white-blue.

Then again, Austria-Hungary being a dual monarchy, both Austria and Hungary must be separately represented—and fully—on the flag.

The imperial standard of the czar of all the Russias is of brilliant yellow, in the center of which is a large double-headed eagle. This flag dates from the year 1472, when Ivan the Great married Sophia, a niece of Constantine Palaeologus, and thence assumed the arms of the Greek empire.

On the breast of the eagle is an escutcheon bearing on its red field in silver the figure of St. George slaying the dragon, the whole being surrounded by the collar of the Order of St. Andrew.

On the displayed wings of the eagle are other shields bearing the arms of Kiev, Novgorod, Vladimir, Kasan, etc. The Russian union jack is very similar to that of England, save that the principal crossbars are blue instead of red.

The well known tricolor of France is made up of three stripes—blue, white and red—running not the length, but the width of the flag.

The union jack of Great Britain is composed of the three crosses of St. George, St. Patrick and St. Andrew. That of the first was a broad red cross, dividing the white flag into four white squares; the white cross of St. Andrew, on a blue background, ran from corner to corner diagonally, while the red cross of St. Patrick ran in the same direction.

It was adopted as the national flag in 1831, being originally the colors of the duchy of Brabant.

From 1477 until 1800 Belgium belonged to Austria, but on the latter date it fell into the hands of Spain. In 1705 and for some years following it was held by France, and in 1814 was handed over to the Prince of Orange, but in 1830 the Belgians rose against the Hollanders and established their independence.

The flag of Belgium is composed of a tricolor—black, yellow and red—running up and down—that is, the width and not the length of the flag.

From 1477 until 1800 Belgium belonged to Austria, but on the latter date it fell into the hands of Spain. In 1705 and for some years following it was held by France, and in 1814 was handed over to the Prince of Orange, but in 1830 the Belgians rose against the Hollanders and established their independence.

The animal's body lies in the open and decays, and into the decomposing flesh the hundreds of black seeds contained in the capsules of the clawed pod are discharged, for it seems that earth is not rich enough for them and only in decayed flesh can they find enough nourishment.

CAMPBOR'S TRAIL OF BLOOD.

The Cost in Human Lives For Gathering the Pungent Drug.

Every drop of camphor you use is estimated to have cost at least its weight in human blood. There are few things which demand a heavier toll of lives than this pungent drug, which is so widely used for keeping moths out of our clothes and for making liniments and other remedies.

The reason for this is that the mountainous parts of the island of Formosa, from which the world gets most of its camphor, are inhabited by head hunting savages, whom the successive invaders of the island have been unable to subdue.

These savages are quite alive to the value of the camphor trees and fiercely oppose all attempts to get possession of the forests.

Since the Japanese took the island after their successful campaign against China in the nineties they have been carrying on a carefully conceived plan of gradual penetration of the valuable camphor regions.

In spite of these elaborate precautions, the loss among the camphor gatherers amounts to hundreds of deaths annually.

It is calculated that Formosa contains about a million camphor trees, some 10,000 of which are cut down every year.

The flag of Austria is a very complex affair. To begin with, the various Austrian provinces have their own flags. Bohemia is red-white. Tyrol is white-red. Dalmatia is blue-yellow. Galicia is blue-red. Croatia is red-white-blue and Istria is yellow-white-blue.

Then again, Austria-Hungary being a dual monarchy, both Austria and Hungary must be separately represented—and fully—on the flag.

The imperial standard of the czar of all the Russias is of brilliant yellow, in the center of which is a large double-headed eagle. This flag dates from the year 1472, when Ivan the Great married Sophia, a niece of Constantine Palaeologus, and thence assumed the arms of the Greek empire.
