(Continued from Page 1)

was his prisoner. Whipping out his handcuffs he attempted to put them on Taylor, though the railroad detectives said it was needless. According to Gray Mr. Wilson's hands shook so-presumably from the chill of the evening wind, that he could only get one "bracelet" on Taylor; whereupon the bold, bad man jerked the nippers from Mr. Wilson's hands and offered to lock the other one on his wrist himself.

Eventually and with the help of an electric flash lamp which he used in good style Mr. Wilson managed to get the cuffs on Taylor, and then the part adjourned to make further investigations.

After Doyle produced the "soup" and other things he found under the rock in the brush, Mr. Wilson again showed signs of feeling the evening chill, and appeared to be very ill at ease. And when Doyle volunteered to pour the "soup" in the river, Mr. Wilson was quite willing that he should do so, and retired up the bank so that his actions would be untram-

Later Taylor and Mr. Wilson and a few others came to the county seat. There Taylor was held, until Monday without any charge being placed against him. Three streetcar ductors failed utterly to identify him as any of the various hold-up men. Traffic Superintendent Fields of the interurban line characterized the arrest as a "joke," and District Attorney Hedges admitted that "there was nothing produced against the man at all," And following Mr. Wilson's return to the county seat the bright young reporters wrote their highly entertaining fiction-and didn't mention any of the Milwaukie gentlemen who had done such valiant public service.

It is evident either that somebody lied, or that Mr. Wilson is being embarassed by his admiring friends. And incidentally the Courier can get affidavits in regard to the above, if necessary. Following Taylor's release, Mr.

Wilson said that he did not understand why some people in Milwaukie had so much to offer regarding the episodes centering about the arrest. Doyle, he admitted, poured the nitroglycerine "soup" into the river, but e said that he volunteered to do this. He also said that Doyle had begged him to keep his name out of the printed reports of the arrest as he (Doyle) feared that Taylor would "beat him up" for tipping off the officers to the

Mr. Wilson also admitted that the first he knew about Taylor and the belief that he might be the muchwanted hold-up artist was when the wife of one of the Portland railroad sleuths called him up and told him that her husband had "got a man surrounded in the woods," Asked as to how it happened that the Enterprise and Oregonian gave him credit for having worked on the case for "many months," Mr. Wilson said he didn't know. "Lillis talked to the reporters," said Mr. Wilson, "I never said a word." Lillis is one of the railroad special agents referred to as "assisting the sheriff" in the arrest.

Regarding the arrest itself. Mr. Wilson said that when he reached Milwaukie some of the excited citizens wanted to arrest him. "They thought was the bandit because I had on old clothes," said Mr. Wilson. "Later on, when we were walking down the track, I saw a man coming between us and a light streaming from a house winlow, and I said that probably he was the man we were after. The fellow ducked down into the shadow of a trestle, and when we went down we found out it was Taylor and arrested him

Asked if it was true that a citizen of Milwaukie or Island, hearing the officers shouting in the darkness for somebody to "throw up and be quick" had come running out with a shotgun and hald up the officers them. selves, Mr. Wilson would only say: "Well, there was a man came out

PANAMA PLANS FAIR

To Show Its Resources

Preparations for the National Ex. position of the Republic of Panama, under way, according to former rep-United States government to the ex-Panama.

The Government of Panama has alings upon the exposition grounds, which comprise seventy acres upon a high piece of land overlooking the bay. Two of the buildings are permanent structures of great architec-

Plans for the entertainment visitors are also being completed. During the month of February, when the balmy, dry season of Panama is at its best, there will be a Mardi Gras festival, and the old Spanish city of Panama will be a riot of fun and color for a week. In addition to this, there will be carnivals and other entertainments, and the native sports will be seen at their best.

The exhibits of the Republic of Panama, in addition to a comprehensive collection showing her natural resources, will include a remarkable collection of tropical birds, animals and pants, incuding many strange specments that are entirely new to cience. This collection is to form the basis of a national museum.

One of the most remarkable exhibits will be the famous Alvarado museum, which is to be brought from Quito, Ecuador. The Alvarado collection comprises a number of priceless specimens, bearing upon the peoples who inhabited South America in ancient times. For instance there is a mummy with a tiny head, which is an example of how the ancient Aztecs compressed the skulls of their prison. ers whenc hildren, so that they never attained more than half their natural

The Speed of Light.

Light holds the record for high speed among all moving things that have been measured. It travels at the rate of 328,028,800 yards a second. This is faster than thinking, even by the most quick witted person. Let any render try to think the simplest thought and then with the aid of a stop watch note how long it has taken him to think it. He will then be able to understand how slow his mental operations are compared to the speed of

Tilden's Dog. At one of the early dog shows Samuel J. Tilden bought an immense Great Dane dog. "What's his name?" asked a visitor. "Askim," said Mr. Tilden. "What good would that do?" "It's his name," was the reply.

So it was-Askim. The dog knew a number of tricks, but would only perform when fed. "He'd make a good politician," sald his owner as he gave him a bone.-Ex-

The Arctic Summer The arctic summer is brief, but for eeks together there is noth tinguish day and night. Once at Dvorat different hours. When later they er, "Good evening." Both agreed that the hour was 7, but while one traveler held that it was 7 tomorrow morning the other maintained that it was 7 o'clock last night. On returning to the ship they settled that it was last night, so they dined and went to bed

PHONE COMPANY SAD

Newest Republic Will Have Exposition Incoming Year to Bring Great Loss of Business, Is Report

That the telephone companies will be the first and hardest hit by the which is to open on January 21 and statewide prohibition law which belast for one hundred days, are well comes effective the first of the year is the statement being freely made resentative William E. Tuttle, of New by officials of the concerns. Every Jersey, who is the commissioner of the saloon, they point out, has one or two phones; and practically every em. position. He recently returned from ployee of the saloons, and every proprietor, has a residence telephone. The greater part of these will all be ready erected several splendid build- discontinued on January 1, 1916; as will also the telephones of the brewery agencies and many of the wholesale liquor houses.

In Portland alone the larger of the two telephone companies estimates that over a thousand phones will be taken out following the enforcement of the prohibition law. Some 400 of these telephones will be in saloons and the others will be taken from homes occupied by people intimately

concerned by the liquor traffic. In fact so great will be the loss of revenue that it is said the smaller of the two telephone companies, which will be relatively harder hit than the big company, may attempt to raise its rates to make up the lost income.

The First "Lady In Trade."

Perhaps the most notable instance on record of the feminine street trader is that of the "white widow," otherwise the Duchess of Tyrconnell, the Frances Jennings of the De Grammont memoirs, who at the time of the revolution in 1688, according to Horace Walpole. being reduced to absolute want on her arrival in England and unable for some time to procure secret access to her family, hired one of the stalls under the Royal Exchange and maintained herself by the sale of small articles of haberdashery. She wore a white dress wrapping her whole person and a white mask, which she never removed, and excited much interest and curiosity."-London Chronicle.

Unique Tablecloth.

When a southeast wind is blowing the visitor to Cape Town is treated to a peculiar and interesting natural phenomenon, for under such conditions Table mountain, in the language of the natives, "puts on a tablecloth."

In other words, the thin line of fleecy cloud forming above It descends until it rests flat upon the mountain top. with its edges drooping gracefully over toria, was in the county seat during rough trough hung to a bough over a toric value. The text is in Chinese its sides. It is really not unlike the article of household use which gives it

Russian Police Story. A Russian official once told a curious story of the thoroughness of the Petrograd police in the early nineteenth century. He had lost his pocketbook, containing a considerable sum, gave notice and had the money restored to him within a day or two without the pocketbook. Shortly after he found that the pocketbook, still containing fur coat. Naturally he asked whence had come the restored money. He discovered that the police rather than admit fallure had collected the money among themselves. - Dundee Adver-

A WASTED LIFE

In every conceivable set of circumstances on earth a beautiful life can be lived. Epictetus was a crippled slave, yet so noble was his soul that he had an emperor as his disciple. Circumstances do not produce a wasted life. The wasting must be done by the man himself. "No life is wasted," said Huxley, "unless it ends in sloth, dishonesty or cowardice.

Peculiarities of Russian Winters. There is one curious thing about a Russian winter-in the latter part of October or the beginning of November the weather will be quite mild. Not a sign can be seen of an approaching change, when suddenly, without any apparent warning, a light haze will be een in the northern sky, and in tweny-four hours the thermometer may fall 50 degrees. The change is so sudden and violent that travelers are fre quently frozen to death before they an gain shelter. It has occurred that farmers out looking after their docks have been caught in one of these blizzards and, missing their way home. have lost their lives, their bodies remaining under the snow until spring

Sizing Up His Customer. A dejected, sailow, friendless looking, low spirited man walked into the grocery store.

"I want some clothesline," he said hesitatingly. "Whatcher want it for?" asked the

man behind the counter. "To hang clothes on. The old lady's washing today."

"She is, beh?" said the shopkeeper, giving his customer the once over from head to foot," "Well, you go back and tell her to come down here and get it berself. The only way a fellow looking like you do can buy rope from me

Commissioner.

Rocket Cameras. The military camera of a Saxon named Maul is carried by a rocket over the landscape to be photographed. The rocket, twenty feet long and weighing fifty pounds, is mounted on a special support, which is raised to the degree necessary and aimed by means of occupies a seat on the platform when sights, and the electrically ignited powder charge carries the rocket to a height of about 2.000 feet. As it turns to fall, exposure is made by an electropneumatic shutter worked by a small battery. Directly afterward a parachute opens, holds the camera thirty feet above the rocket, and the whole I don't believe he was ever invited to apparatus falls gently to the ground.

> Deadly Chemical Bombs. Hydrocyanic acid, known as prussic

acid, is so poisonous that a mere breath of it means instant death. Sulphurieanhydrid when brought into contact with the air combines rapidly with moisture absorbed from the air, produeing sulphuric acid. Thrown in a bomb with just explosive charge "Good morning, Mr. H. Your wife ter the sulphuric-anhydrid, the air for enough to disrupt the bomb and scatmade a very pleasant call on us last a large space about the explosion would be at once converted into a "I'm very sorry," came the startling dense fog of sulphuric acid. Liquid reply. "I'll see that it don't occur ammonia, similarly employed, would inagain, for I'm going to chain her up in stantly so impregnate the atmosphere with ammonia as to strangle all persons in the immediate vicinity. Ammonia is absolutely irrespirable.

> Doubtful. "When do you expect to see Green

again?" "I don't know."

"But don't you usually see him once r twice a week?" "Yes, but yesterday I loaned him five that he was sure to pay back tomor-

row, and it is doubtful now that I shall

see him for a month or two."-Detroit
