Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out of this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Sold by Druggists, etc. P. J. CHENEY & CO., Toledo, Ohio. Take Hall's Family Pills for constipation.

FOREST SERVICE NOTES

Uncle Sam Tells What Might Be Done With Timber Used in Nation

The railroads of this country purchase approximately 135,000,000 cross ties annually. Last year approximately 43,850,000 of these ties were treated or creosoted. This quantity of treated material would construct a double track about 8,700 miles in length. If all of the 7,700,000 Douglas fir cross ties, treated in 1914, were laid by one railroad, a double track passenger service and a single track freight line could be run between Seattle and San Francisco. It has been determined that in the Rocky Mountains and Pacific Coast region ninety per cent of the damage to Douglas fir, commonly known as gum check or pitch seam, is caused by

the work of the Douglas fir pitch moth. Last year 2,525,000 linear feet of poles (telephone and telegraph) averaging 30 feet to the pole, were given creosote treatment. Should these treated poles be placed at 100-foot intervals, 1,600 miles of wire could be stretched. According to a recent report of the Department of Agriculture the cost of state highways, based on general conditions, varies in different sections of the country from \$1500 to \$15,000 per mile.

THIS TOWN IS ALIVE

Lacomer, Washington, Invites Tourists with Gigantic Sign. Lacomer, a little town in Washington, is situated some distance from one of the state highways used by

many motor tourists. It boasts, however, a lone hill which commands the best view obtainable of Skagit Valley, one of the rich farming districts of that section. In order to draw the passing tourists from their beaten path and attract them to Lacomer for the advantage of local business, the community has constructed a winding road to the summit of the hill and there built an observation stand. To advertise the lookout point, the words "Auto View" have been painted in letters 8 feet high on the wall of a water reservoir at the hill's crest. This sign is sufficiently large to be seen for a long distance. A view of the hill and stand appears in the November Popular Mechanics Magazine.
