

NEWS OF THE COUNTY AND SUBURBS

Local and County Items of Interest to Courier Readers

CHERRYVILLE

Jack Frost has put in his appearance all right. Old timers say they never in many years saw killing frosts come so early.

Captain Baty of the Portland detective force was out Sunday visiting his sister, Mrs. Shank, who lives two miles northeast of the postoffice.

August Budenstein has gone over the mountains to help Hauser drive his band of sheep to the home ranch at Tygh Valley.

Theodore Kopper killed a big black bear up on Huckleberry mountain last Wednesday. He was in very fine condition and is estimated to weigh 400 pounds.

Solomon Hauser went through here last Saturday with his band of sheep on the way to the home ranch in eastern Oregon. The sheep were in fine condition and had been in summer pasture on Wildcat. The lambs—900 of them—were sold under contract to a Portland firm at \$4 a head. Now they are worth \$5. The sheep and wheat men, in fact, all the ranchers on the other side, have made money fast the last three or four years on account of the high price of all kinds of stock, wool and grain. Pretty hard to make them believe that we are having fearful democratic times when it is difficult to get men over there at from \$3 to \$4 a day.

A couple of old miners are digging a tunnel in a deep canyon in Alder Creek about three miles south of the postoffice. They found fine specimens of "float" in the creek and are seeking the mother lode, which geologists say lies deep in these hills and by driving in low in a deep canyon, they hope to locate the lode.

Tom Galarnau returned home from work on a government road up around Clear Lake last Saturday and upon going up to his claim three miles southwest of town he was surprised and shocked beyond measure to find that some one—or possibly more than one—had broken into his cabin and what they couldn't carry off they had maliciously and wantonly destroyed. The yard and garden were strewn with the contents of flour sacks, salt, beans, spices, coffee, tea, etc. About ten gallons of mammoth mountain strawberries, put up in glass jars and preserved in sugar, were taken out and smashed on the premises. There is no excuse for such wicked and utterly absurd actions and no one but a maniac or a degenerate would commit such depredations. Three guns were taken, besides other property and the total loss is estimated at around \$100. Suspicious point clearly to certain parties and it is hoped the guilty one will be found.

The "Golden Special" with a lot of golden dimes from New York city is on the coast this week. This poddog brigade with its monkey dinner outfit is out soliciting votes for candidate Hughes. It is difficult to believe that anything but a feeling of disgust will be produced by this combination of aristocrats, touring the country in palace cars to help elect a Wall street candidate and fasten with stronger bonds the chain of industrial slavery upon the toiling millions of our country. No one among the struggling masses will listen to these golden dimes.

Exchange

40 acre California Alfalfa Farm, cutting 12 to 15 tons of alfalfa per acre each year. Well equipped for dairying; abundance of water for irrigation. Hot and cold water in house. Want Oregon farm. Value \$26,000.

DILLMAN & HOWLAND,
28 8th & Main St., Oregon City, Ore.

MOUNTAIN VIEW

Our jitneys are surely trying to give good service to the people on the hill, as both are going in only to not keep people waiting. If they are compelled to quit for want of patronage, don't blame them, but yourselves. The men are kind, gentlemanly and obliging in every way possible.

Farm Loans

We have funds available for farm loans. If you have improvements to make or the buying of more acreage or the taking up of a mortgage, come in and let us help you.

We want you to feel free to consult us on any problem concerning your farm where financial conditions enter.

WE PAY FOUR PER CENT ON SAVINGS

Bank of Commerce

THOS. F. RYAN, President. DR. H. S. MOUNT, Vice President. JOHN R. HUMPHREYS, Cashier.

Mrs. S. Chandler has gone to Lacro, Wash., to visit her two married daughters and get acquainted with grandsons who lately arrived in each home.

"Grandma" Grant has come home to her daughter, Mrs. W. N. Clark, after spending several months in Portland with another daughter.

Mr. and Mrs. Dowling moved this week into their own property on Pearl street.

Mr. and Mrs. Edgar Terry were in Portland on business last Wednesday. Mr. and Mrs. R. J. Beally returned to Portland after visiting a few days with Mrs. Beally's mother, Mrs. Amanda Hickman.

Chris Blum and family are once more in their home on Molalla avenue. They have been in eastern Oregon the past two years.

The dust, the beautiful dust, covers you over with a grey old crust. The trucks carrying gravel to the new reservoir keep Molalla avenue in a cloud of dust, making it very unpleasant.

Rev. J. R. Landsborough will preach at the little white church here next Sunday at 3 o'clock. Let us all turn out to these Sunday afternoon services. These pleasant autumn days are so tempting for automobilizing that many are absent from church on Sunday.

Used it Eleven Years

There is one remedy that for many years has given relief from coughs, colds, croup and whooping cough. It is probably the best known family cough medicine in the world and because it contains no opiates is strongly recommended for children as well as adults. Mrs. Chas. Rietz, Allen Mills, Pa., writes: "I have used Foley's Honey and Tar for eleven years and I would not be without it." It promptly relieves hoarseness, tickling throat, bronchial coughs and congested membranes and permits refreshing sleep.—Jones Drug Co.

GLEN ECHO

The frost struck heavily at this point, taking the grape crop and garden truck. Mr. Hollowell was among the heaviest losers, he having lost a large quantity of green peppers.

Mrs. Cavanaugh and daughter of Portland have moved into our neighborhood, having purchased the Babler place. They are making extensive improvements on the property.

Mrs. Moran is improving from her accident of a week ago, which nearly cost her the use of her forefinger. The finger was caught in a wringer.

Mr. and Mrs. R. H. Taber have returned from Sylvan Park Inn after a very successful season. This is the last year for them as proprietors of the inn. Mr. Bushnell and wife of Portland having purchased the beach resort. Mr. and Mrs. Taber are spending some time visiting their daughter and husband, Mr. and Mrs. M. E. Walker on Steele avenue. They will soon take possession of their new home which they have just purchased from Will Henderson on Steele avenue and Mildred avenue. This is one of the prettiest bungalows at Glen Echo and modern in every detail.

Mr. and Mrs. G. E. Taber, Mr. and Mrs. M. E. Walker and son, Marion, formed an automobile party to Portland Sunday. While in the city they called on Frank Moore and family, a cousin of Mrs. Taber.

Mr. and Mrs. G. C. Fields and a jolly party also motored to Portland on Sunday.

A newly organized Parent-Teachers' association at Gladstone has as its president Mrs. R. R. McAlpin of Glen Echo. Much interest was manifested at the opening meeting, and many new ideas for the advancement of the school were suggested, among them being the serving of a hot lunch at noon to the children who live at a distance. Mr. McAnulty, the new principal is hearty in his co-operation with the new organization.

The new road from Gladstone to Glen Echo is in fine shape, and many machines are coming this way to avoid the hill climb over the Hollowell road.

MOUNT PLEASANT

The Mount Pleasant Parent-Teachers' met last Friday to take up their club work for the school. Mrs. E. E. Frey is president.

We are pleased to announce the marriage of one of our Mount Pleasant girls, Miss Dorothy Blom, to Orville Oglesby. Mrs. Oglesby is a devoted Christian and a church and Sunday school worker in the Adventist church. She will be greatly missed in this community, but her many friends will be pleased to hear of her happy romance.

John Christensen has closed his dryer after a good season's work.

P. W. Meredith is making his usual campaign for the Socialists. He says he cannot say anything against Wilson.

Eugene Niles of Idaho is spending the winter here with his mother, Mrs. E. A. Niles.

H. A. Kocher is managing S. O. Dillman's dairy and is making good.

Mrs. H. E. Cochran, who has been spending the last two months with her daughter, Miss H. E. Maxwell, will leave about the fifteenth of this month for her home in El Paso, Texas.

Mrs. A. C. Warner, who has been confined to her bed, is improving.

Some of the farmers here who sowed sudan grass are quite disappointed by the results.

E. E. Kellogg is building a silo. Miss Ella Williams will leave in a short time to spend the winter with her brother at North Yakima.

LOGAN

Spuds are a fine crop here this year. They are turning out 100 or more sacks per acre of first class. Buyers are anxious to get them and are paying a little over \$1.00. A few car loads have been contracted and the fine weather is being utilized to the utmost considering the lack of laborers.

The last meeting of Harding grange was short in attendance, but long in interesting discussion along various lines. Some are going to attend Pomona grange meeting at Park place.

This is a fine time to haul in the winter's supply of wood, dig the spuds, haul in straw, dry cultivate the ground and do sixty-nine other different and useful things.

Well, news is scarce and time is flying fast, so here is "finis" until next time.

EAGLE CREEK

Mrs. Walter Douglass and Mrs. Will Douglass attended the fair at Estacada one day last week.

Miss Iva Mumpower, who had been staying with Mrs. Howlett, was called home last week by the death of her grandmother.

Mrs. George Judd, Grandma Judd, Mrs. Fred Hoffmeister, Misses Edna Kennedy and Myrtle Hoffmeister were guests at the home of Mrs. R. M. Brash Sunday.

Mr. and Mrs. Roy Douglass were visiting with relatives at Logan Sunday.

H. S. Jones was a guest at the home of his mother-in-law, Mrs. Viola Douglass, Sunday.

Several Eagle Creek folk attended the East Clackamas fair at Estacada last week.

CATTLE INFERIOR

Hogs Run Light at Opening of Portland Market for Week

Monday's cattle market opened with another large number of 1600 head. There was a large offering of inferior quality, steers and cows in the run, although there were a number of loads of good quality stuff shipped. There were a few loads of prime steers sold at \$7.25 with other loads from \$6.25 to \$7. Inferior quality steers rather slow demand, although prices have held steady on this class of stuff. Cow stuff scored another advance Monday of 10 to 25 cents. A few prime heifers brought \$6 and a few cows \$5.75; bulk of prime cows sold at \$5.50 to \$5.60 with inferior grade as high as \$3.00. Bulls were in good demand at slightly higher prices, although there were no real fat bulls in the trade. The best brought \$4.25. Prime light calves sold 50 cents higher, bringing \$8, although a few were sold from \$6.50 to \$7. Trading in the stockers and feeders division was limited to a few loads, prices ranging from \$3 to \$5.75.

A moderate run of hogs received Monday. Prices were 10 to 15 cents higher over last week's close. Tops sold at \$9.75, bulk going at \$9.60 to \$9.70.

Sheep market is firm, with unchanged prices. Some fairly good yearlings here Monday were taken at \$7.40. Demand was good, although there was hardly enough offered to start packers. A bunch of fair lambs brought \$8.30. Outside of this only a few other sales were made. Prime sheep of all grades remain in demand at higher prices.

Cut This Out—It's Worth Money DON'T MISS THIS. Cut out this slip, enclose with 5c, and mail it to Foley & Co., Chicago, Ill., writing your name and address clearly. You will receive in return a trial package containing Foley's Honey and Tar Compound, for bronchial coughs, colds and croup; Foley Kidney Pills, for lame back, weak kidneys, rheumatism, bladder troubles, and Foley Cathartic Tablets, a wholesome and thoroughly cleansing cathartic for constipation, headache, biliousness and sluggish bowels.—Jones Drug Co.

America's typhoid bill is more than \$70,000,000 a year.

AROUND THE DAIRY.

If the helpers kick some when you begin to handle their little udders never strike them. Speak quietly and be patient.

If you have never used a Babcock tester start in now and know just where you are with your herd.

Success in dairying does not depend upon the number of cows a man keeps, but the way in which he keeps them.

Make plans for building a silo if you expect to keep ten or more cows.

The dairyman should never forget his alphabet—the three C's, care, comfort and cleanliness.

There are some questions that cannot be answered by "yes" or "no." And so it is regarding the question as to whether it is profitable to feed grain to cows that are on pasture.

There are some things, however, that are very certain and not open to argument, says Kimball's Dairy Farmer. It will pay and pay well to feed grain to good cows when they are on poor pasture, and it will not pay to feed poor cows at any time.

There comes a time each year when pastures are at their very best, when cows other than the most highly productive ones refuse silage and grain. They are then receiving feed in abundance and a properly balanced ration, as is evidenced by the overflowing pails of milk they give night and morning.

They need no grain, and it is well for a time to withhold it, giving the powers of digestion a rest.

Unfortunately the favorable season lasts but a couple of months. Then grass gets short and the cow begins to decline in milk flow and get poor in flesh. She is still on pasture, but conditions are vastly different. If at any time of the year she needs grain she needs it now. She says so herself, but it is only the thinking man who understands that the decrease in milk flow and flesh are but the signals calling for assistance.

Just as soon as the milk flow begins to decrease it will prove profitable to begin feeding grain and soiling crops

or silage. Only a small amount is required at first, but as the drought comes on and the grass deadens the grain and succulent food should be gradually increased at a rate that the cows will continue to produce with that persistence which insures a profitable year's work.

All experience and experiments have shown that cows will give more milk and keep in better condition if fed grain when on pasture. Some experiments show that there is no immediate profit from feeding grain, the cow merely paying for the feed at good market prices, but only the short-sighted man would fail to feed because of this, for it is the after effects that give the profit.

The one who looks ahead realizes that winter will come before his cows freshen again and if they have been allowed to decrease in milk flow during the summer, when milk is cheap, they cannot be induced to give a large yield when milk is high. In fact, there is but one conclusion to draw and one answer to the question as to whether it pays to feed cows grain on pasture or at any other time. If in order to keep cows milking persistently and at their best it is necessary to feed grain, then it is advisable and profitable to do so.

Provided good cows are kept under comfortable conditions, for none other than large, persistent milk and butter fat production pays.

Treatment For Calf Scours. Give castor oil in milk to clear the irritant from the digestive tract, then mix in each pint of milk fed daily a teaspoonful of a mixture of half an ounce of formaldehyde in fifteen and a half ounces of freshly boiled water. Triple sulphocarbates, to be bought at the drug store, would also be likely to help in such a case of scours, due to bacterial action in the intestines.—Hoard's Dairyman.

Heifers Holding Up Milk. Kindness is about the only thing that can be followed in preventing a heifer from withholding her milk, as it is commonly called. Withholding of milk is not a voluntary action on the part of a cow, but an involuntary action, and for that reason kindness must be followed in order to put the heifer in an attitude so she will not withhold her milk.

Admirers of the Holstein breed of dairy cattle contend that this breed is capable of doing a greater volume of business than is milk production—at less expense than the other dairy breeds. The Holstein cow is kind, docile and has great capacity for converting roughage into dairy products. The cow here pictured is a pure bred Holstein.

BALLOT TITLES CONFUSE

Danger of Mistaking Single Tax for Rural Credits is Pointed Out

"The Full Rental Value Land Tax and Homesteaders' Loan Fund amendment" is the ballot title for measure number 306 and 307. "The Rural Credits amendment" is the ballot title for amendment number 318 and 319. There is danger that these titles may be confusing. The word "loan" in number 306 and 307 may lead some voters to believe that it is "The Rural Credits amendment." Voters should be very careful in distinguishing between these two measures on election day.

There is the widest possible difference in the effect which the adoption of these two measures would have. Amendment number 306 and 307 is a single tax measure, and has for its purpose the confiscation of private ownership in land. Amendment number 318 and 319 is just what its name implies: an amendment giving rural credits or cheap money to the farmers. The first amendment, number 306 and 307, would, it is said, simply ruin the state of Oregon if it was adopted.

To defeat single tax vote 307 X No.

No More Backache for Her

Mrs. J. M. Gaskell, Etna Green, Ind., writes: "I suffered from severe backache, and sharp pains shooting through my back until I could not stoop over and get up without aid. Urinary trouble seemed to be the cause of it all. A single box of Foley Kidney Pills gave me such relief that I cannot praise them too highly." This standard remedy for kidney and bladder ailments can be taken with safety for backache, swollen ankles and rheumatic pains.—Jones Drug Co.

Tax Limitation—Lower Taxes

If there has been any doubt in the mind of any voter about the wisdom of limiting taxation, it should have been removed by the events of the past few days.

The budgets of proposed expenditures for next year have been made up by the state and by the city of Portland. The budgets call for expenditures way in excess of anything which has been attempted before. Every state institution has asked for big increases in appropriations, except one. The one institution which does not ask for an increase is the East Oregon Insane Asylum. Every other institution asks for big increases. Do our public officials feel that the taxpayers can afford to pay unlimited taxes? What is to become of the state if this annual increase does not stop? How can anyone afford to pay the tax bills? It is an outrage to ask the tax-payers for big increases in appropriations when it is so hard to get money. Taxes should be decreasing these times, not increasing.—Contributed.

Issues Challenge

P. W. Meredith, socialist candidate for the legislature, has issued a sweeping debate challenge. Mr. Meredith, in a signed statement made Saturday, says: "I hereby issue a challenge to my opponents on the democrat and republican tickets to joint discussion of the issues of the day anywhere in Clackamas county; details to be arranged by candidates or their committees."

ESPEE BUYS MUCH

Railroad Company Loses Heavily From Mexican Revolution

To replace equipment vacated during the last fiscal year and to provide for increased requirements, the Southern Pacific company has placed orders for 28 locomotives, 50 passenger cars and 4204 freight cars, the greater part of which is to be delivered during the last half of 1916, according to the annual report of the Southern Pacific company and proprietary companies for the fiscal year ending June 30, 1916, just made public. The report shows that the railroad has also ordered two ocean going freight steamers to be delivered in August and September of 1917 and for use on the Atlantic system.

The cost of property of the Southern Pacific company of Mexico destroyed since the Madero revolution is placed at \$2,510,276 gold. Under the pension system put into effect January 1, 1903, 822 employees are carried on the pension rolls of the rail and water lines.

Shooting Stars Visible

Two separate annual displays of shooting stars will be visible throughout Oregon November 15 and 24, according to E. H. McAllister, professor of astronomy and mechanics in the state university. The display due on November 15 may be seen in the early morning hours; that of November 24 is due in the early evening. The earth at these times will be cutting through the orbit of the swarm of meteors from which the stars come.

Display of the aurora borealis will be visible in Oregon next winter for the first time in 11 years, Mr. McAllister says. Northern lights are dim in this latitude of the west, except when the sun spots have reached their maximum number, which occurs only once in seven years. A connection between the sun spots and the aurora borealis is believed by many scientists to exist.

NOTICE

We are making a special \$1.25 offer of a year's subscription to the Courier and to four standard magazines. This offer is open to all new or old subscribers. By subscribing to the Courier now you get \$1.36 worth

of magazines for only 25 cents extra. The magazines are all high class and will make a valuable addition to the library of any home. We want to call your attention also to the free dress pattern that is given to each subscriber.

We don't make a cent on these magazines. The only reason we offer them to our customers is for the sole purpose of saving our readers money. It is our intention to give our subscribers the advantage we receive from magazine publishers. It is for your benefit alone that we offer you these four magazines at such a big reduction.
