ROADS DESIGNATED
Bonding Act Specifies Highways for Improvement at Early Date

The Oregon highways designated in the road bonding act passed at the recent session of the legislature as

most in need of hard surfacing and recommended for surfacing as soon as the money from the bonds becomes available in case the voters approve the bill, are as follows:

1. The Columbia river highway from the Multnomah county line to Astoria, Seaside, and south in Clatsop county to the Tillamook county line. Inasmuch as the counties of Columbia and Clatsop have already expended large sums of money in constructing the said Columbia highway through said counties and in doing so have practically exhausted their ability to raise money by an issuance of county bonds, the state highway commission is hereby authorized, from the funds arising under this act, in addition to paying said highway, to use from said funds sufficient to provide for the preparation of said highway through said counties for the paving thereof.

2. The Pacific highway from the Multnomah county line through Washington county and Yamhill county by way of Hillsboro, Forest Grove, McMinnville to Dallas, Monmouth and Independence, in Polk county; to Corvallis and Monroe in Benton county, and through Eugene to the north line of Douglas county.

3. The Pacific highway from the Multnomah county line through Oswego, Oregon City and Canby in Clackamas county, thence through Marion and Linn counties, to a junction with the highway at Junction City.

4. Such portions of the Columbia river highway between the Multnomah county line easterly through the city of Hood River and Hood River county and through The Dalles and Wasco county, through Sherman county, through Gilliam county, by way of the town of Arlington and up the Columbia River to the confluence of the Umatilla River with the Columbia River, thence up the Umatilla River through Hermiston, Stanfield, Echo.

5. The Pacific highway through Jackson county, where the same has not already been paved, along the route heretofore adopted by the state highway commission.

6. Commencing on the Columbia river highway at or near Arlington in Gilliam county, thence up Willow Creek in Morrow county, through the cities of Lone, Lexington and Heppner in Morrow county and through Pilot Rock, Pendleton, Adams, Athena, Weston, Milton and Freewater in Umatilla county to the Oregon and Washington state line.

7. A road from the south line of Clatsop county, at the end of its highway described in paragraph 1 hereof, south by Wheeler to Garibaldi.

8. A road from the Multnomah county line by Tigard, Rex and Newberg to McMinnville.

MANY OWN GASMOBILES
Business Faces 1917 Market of Nearly 8 Million Cars
So much has been written relative to the development of the motor car industry and so many prophecies have been ventured without proper consideration of vital and controlling factors, that a clear and simple analysis of the subject may serve to dissipate much of the unfounded conjecture.
The automobile market is divided into broad fields. First the rural class, which includes all persons engaged in farming and others in various businesses who live in towns of less than five hundred population. Second, the urban class, which comprises all people in any but farming pursuits, who live in towns of five hundred or more population.
In the rural or farming market, there are 6,500,000 families. One million of these now own motor cars and one and one-half millions are poor, illiterate, or negroes, who for the purpose of this study may be excluded from the prospective buying class. There remain, then, 4,000,000 farm families who are possible automobile buyers.
In the urban class, covered by 11,000 towns and cities of more than five hundred population, there are about 5,000,000 home owners of which number only 2,000,000 own cars. Accordingly, there remain 3,000,000 prospective buyers in this class, or a total actual unsold market in both rural and urban classes, of 7,000,000 possible automobile buyers.
The accepted average life of an automobile is about five years in the hands of the original owners; and as the man who once owns a car will not thereafter be without one we must include the re-order market which in the calendar year of 1917 will be about 600,000, or twenty per cent of the 3,000,000 now in use.
For the year 1917, therefore, the automobile business will face a market of about 7,600,000 possible buyers. Not more than 1,600,000 cars will be built in the coming year, leaving a possible excess market of 6,000,000 buyers at the beginning of 1918.
These figures are decidedly conservative because they take no consideration of (1) any export outlet, (2) the people who have or will have two machines, (3) increased population, (4) increased prosperity, (5) a million or more town and city families who do not own the homes in which they live, but are well able to buy and maintain a motor car, (6) the business houses, retail and wholesale merchants who use thousands of roadsters for salesmen, and many thousands more of delivery cars (regular automobile chassis with commercial body), (7) taxicabs and other cars for public hire.
