

THE FASHIONS

All through the spring, one of the materials that has kept steadily increasing in popularity is wool jersey. It has been used for coats and suits, for one-piece dresses, separate skirts and for middie blouses. It has been braided, stitched, and even headed, just like all the other smart materials. Colored beads combined with silk embroidery is the latest form of decoration to which jersey has taken. As summer approaches, there is not the slightest indication that wool jersey is on the wane. But, on the contrary, one seems to see more and more of it every day. On a dress that could not possibly be too warm for summer, it was combined with dotted crepe in the following manner: pink crepe with white polka dots made the waist and sleeves; the waist extended down to the hip line, and from there downward the skirt was of white wool jersey. There was a small yoke of the white jersey at the neck of the dress. This is one of the novel ways in which this popular material is used. White jersey suits bound with white silk braid or trimmed with black and white check are in very

good style at present. They look cool and summery.

All shades of gold and mustard are high in favor and especially so in the jersey cloths. Lavender and purple in jersey cloth are also among the popular colors of the hour.

Gold silk jersey has been combined most successfully with gray wool jersey in some suits and dresses, and with dark tan wool jersey in others. This combination of silk and wool jersey is frequently used by the best dressmakers. In some loose-fitting suits, with knee-sleeves, the silk is used for the sleeves, side and back of the coat, and the wool for bands down the front and around the bottom of the coat, as well as for the skirt.

Cool Summer Voiles

Cool and refreshing summer voiles in dainty flowered effects are charming for the informal cotton frocks, of which every woman requires several for the distressingly hot days. Now is the time to get them made. The styles are generally simple. Pleated, tucked or gathered waists combine with the simplest of skirts having a little fullness at the shoulders with an attractive collar edged with lace or machine picot edging. Soft pleats finished off with a heading at the top of the skirt are unusually pretty, as shown in the sketch. The puffed pockets are a charming

novelty especially suited to this type of summer frock. A long collar of white organdy provides the finishing touch in this dainty hot-weather frock.

It is the collar that makes the blouse in a great many cases. Large cape-like collars falling in points over the shoulders and continuing down the front of the waist are now being worn. A blouse with one of these new collars is illustrated. It is fashioned of white organdy, which is being used a great deal for blouses. The skirt that accompanies this blouse is of one of the smart wool plaids. It has pocket sections at the sides, giving a graceful draped effect.

Plaids are lovely for sports skirts and for other kinds of skirts, too. They are worn with short coats of a plain material and with slip-on blouses for sports use.

The New Mannish Shirtwaist Mannish shirtwaists are growing in favor. Some models of linen are made with finely tucked fronts, like those of a man's shirt. In addition to these tucks, there are little sprays embroidered in colors on some of the waists and turnover collars of pique. As separate waists and skirts grow more and more important there are always some novelties to be found among them. White tub skirts of cotton gabardine are made with yokes of colored linen, and where the skirt is attached to the yoke there are several rows of machine stitching done in heavy colored cotton the color of the yoke. White skirts with green, blue or orange-colored yokes are quite effective.

A strong military note is observed in suits of mannish cut for women. The coats are short and plentifully provided with pockets like those on a soldier's uniform. These suits are developed in dark blue and khaki-colored materials. Perhaps the military spirit is also responsible for the combination of blue and red so frequently seen. Blue dresses are embroidered with red beads or red silk, and in some very striking models there are entire sleeves of red with, perhaps, pockets on the skirt showing a bright lining of red. Hats also show the red and blue combination, generally in touches of red on blue straw.

IN THE DIVORCE COURT

Woman Sues for Separation Within Five Days of Anniversary

Audrey Falbrich is suing for a divorce from Albert Falbrich, whom she married in Salem, June 24, 1912. She charged that he has not contributed to her support for three years and that she was forced to tend stock and care for a team of horses on a small farm on which they lived near West Stayton. She asks for the custody of a 23-month-old child.

Within five days of the third anniversary of her marriage Mrs. Ida Wood, who was united to Collis Wood in Seattle, May 26, 1914, filed suit for divorce in the Clackamas county court Monday. She charges he deserted her in November, 1915, and has not contributed to her support since.

Charging that her husband sent her to her mother's home one month prior to the birth of her month-old daughter and that he promised to pay for her support, which she claims he failed to do, Mrs. Sadie N. Rush has begun suit for divorce from Geo. P. Rush, to whom she was married in this city August 3, 1916. She alleges he has \$200 on deposit in a bank and she asks for that. He is employed by the Crown Willamette Paper company and well able to contribute to her support, she claims.

Mrs. Masie M. Casto was granted a divorce decree Monday when her husband failed to appear to make a defense.

GRADUATION SERMON MAY 27

Rev. F. W. Snyder Will Deliver Molalla Baccalaureate

The baccalaureate sermon to the Molalla graduates will be delivered by Rev. F. W. Snyder, of the Methodist church, Sunday evening, May 27th. The commencement exercises will be held in the Molalla Band auditorium May 31st, when C. E. Dunn, of the University of Oregon, will deliver the graduating address.

Eleven students will receive diplomas. The names of the members of the class are Zella Shaver, who will give the class history; Helen Reynolds, who will give the class prophecy; Inez Heyerly, class poet; Lydia Siler, Ida Coover, Harold Johnson, Marion Toliver, Leonard Vick, Lester Tubbs, Duane Robbins and Joseph Oleson. The three last named will not be present as they have enlisted in the United States marine corps. Vacant seats will mark their places.

Close Clackamas

In order to protect food fish which will be planted in the Clackamas river, that stream will be closed to all kinds of fishing except with hook and line until after June 10 by order of the fish and game commission.

NERVOUSNESS AND BLUES

Symptoms of More Serious Sickness.

Washington Park, Ill.—"I am the mother of four children and have suffered with female trouble, backache, nervous spells and the blues. My children's loud talking and romping would make me so nervous I could just tear everything to pieces and I would ache all over and feel so sick that I would not want anyone to talk to me at times. Lydia E. Pinkham's Vegetable Compound and Liver Pills restored me to health and I want to thank you for the good they have done me. I have had quite a bit of trouble and worry but it does not affect my youthful looks. My friends say 'Why do you look so young and well?' I owe it all to the Lydia E. Pinkham remedies."—Mrs. ROBT. STORTEL, Sage Avenue, Washington Park, Illinois.

If you have any symptom about which you would like to know write to the Lydia E. Pinkham Medicine Co., Lynn, Mass., for helpful advice given free of charge.

ALL AROUND THE FARM

PREVENT COLT LOSSES.

Fundamental Principles That All Mare Owners Should Know.

Recently the North Dakota experiment station has undertaken the dissemination of information having to do with the prevention of losses among colts.

According to the teachings of this station, the early troubles of the foal are apt to be navel ill, constipation and scours. Navel ill seems to be caused by germs that get into the body through the navel cord at birth. To guard against it have the cord dipped in a clean stall or in a pasture. Then the navel cord should be cut off about two inches from the body if it has not

The experts of the United States department of agriculture advise farmers to keep only the best mares and to breed them only to sound, pure bred stallions of the same. The mare shown is a Percheron.

already been broken that close or closer, a string dipped in a mild disinfectant tied about the end of the cord and the cord painted over with a mixture composed of one part of the tincture of iodine and three parts of glycerin once a day till it dries off. The udder should be rinsed off with a weak disinfectant, too, before the colt is allowed to suck. The first milk or colostrum is laxative and usually causes the digestive tract within six to eight hours. If the bowels do not move a laxative as two ounces of castor oil can be given and a couple of ounces of warm water with a little glycerin injected into the rectum. It is hard to determine what causes scours or diarrhea in each individual case, but the common causes are changes in the composition of the mare's milk due to nervousness, overwork or changes in feed, allowing the colt to gorge itself from the full udder of a mare that has become quite warm from overwork, and from filth in the food.

When the colt is four weeks old it will begin to eat a little grain; whole oats are the best. The colt should have a chance to nurse every two or three hours until it is about three months old. This is also for the good of the mare, as her udder will fill up in about three hours, and if the colt does not nurse or the mare is not milked there is danger that the udder will become damaged and the milk flow so lessened that there will not be enough for the colt.

If cow's milk must be fed dilute it with about one-third water and two level teaspoonfuls of sugar to each quart. Ordinarily a colt should nurse until it is six months old, when it can be weaned without any setback. Grain should be fed, as without it a good growth will not result. The valuable imported horses that have been so much in demand in this country are fed grain from the time they are old enough to eat till mature.

Inoculation For Alfalfa.

Inoculation for alfalfa may best be accomplished by scattering over the area to be seeded surface soil taken to the depth of four or five inches from another field upon which the crop has been previously successfully grown. The soil should be broadcasted at the rate of from 250 to 500 pounds per acre and barrowed in immediately. The spreading should take place on a cloudy day or late in the afternoon, as the sun's rays are destructive to the germs. Soil from the roots of sweet clover plants also will inoculate alfalfa. Care should be taken to avoid introducing noxious weeds or fungous diseases.

Barley For Fowls.

Barley is only a little inferior to wheat in feeding value for fowls, and as the price generally is lower than either wheat or oats it can often be fed to excellent advantage. No one grain should be fed to the exclusion of all others, but if you have plenty of barley or can get it at a comparatively low price a scratch grain mixture carrying 50 per cent of barley is practical and should give excellent results. Barley meal may also be substituted for cornmeal or middlings in the mash if desired.

Cut This Out—It Is Worth Money

DON'T MISS THIS. Cut out this slip, enclose with 5 cents and mail it to Foley & Co., 2835 Sheffield Ave., Chicago, Ill., writing your name and address clearly. You will receive in return a trial package containing Foley's Honey and Tar Compound, for coughs, colds and croup; Foley Kidney Pills, for pain in sides and back, rheumatism, backache, kidney and bladder ailments; and Foley Cathartic Tablets, a wholesome and thoroughly cleansing cathartic, for constipation, biliousness, headache and sluggish bowels.—Jones Drug Co.

REAFFIRMS DECISION

Judge J. U. Campbell's Decision Unfavorable to State

Judge J. U. Campbell of the circuit court for Clackamas county has reaffirmed his decision, which is adverse to the state, in the Hyde land fraud case, which was tried before him. This is the only one out of six decisions in the Hyde land fraud cases which has been unfavorable to the state.

"There can be no doubt from the evidence in this case," says Judge Campbell in his decision, a copy of which was received Monday by Attorney General Brown, "that Hyde procured title to this land by fraudulent means, and in violation of the law of Oregon governing the sale of school lands."

But he holds that the law passed by the legislature in 1901, which was two years after Hyde obtained from the state his last deed to the 2000 acres involved, cured Hyde's fraudulently obtained title.

This law was for the purpose of ratifying sales of land made by the state land board.

Five other judges of the circuit courts of the state, who have decided similar cases, held that this law did not apply to the lands obtained by Hyde by fraud. Judge Campbell points out that the present owner of the lands, the Western Lumber company, is an innocent purchaser, and that it is as much the public policy of the state to protect the innocent purchaser as it is to recover lands obtained from the state by fraud. He asserts also conditions existing at the time Hyde obtained the lands were known to the public officials, "who, no doubt," he says, "felt that they were getting the best of the bargain by converting the lands into cash and loaning the cash for the benefit of the school fund."—Oregon Journal.

TWIN BABY SHOWER

Mr. and Mrs. Willis Hughes Receive Surprise for Their Twins

Thursday afternoon, May 17, at the home of Mr. and Mrs. Willis Hughes occurred a delightful surprise and "shower" for the twin babies, who are not quite two months old. Lillian and Vivian, the pretty, dark-eyed twins, were on their best behavior, and received many dainty and useful gifts from admiring friends.

Their guests for the afternoon were as follows: Mesdames B. Santesson, H. Henrich, F. Steiner, A. L. Hellinger, R. E. Davies, F. W. Force, Mary Baker, W. F. Harris, D. Williams, Freda Fisher, E. O. Hughes, C. Anderson, Jessie Mayfield, F. Grossmiller, W. Dolbow, C. Gard, C. Kendall, R. L. Badger, O. H. Hughes, W. R. Hughes and Mr. Willis Hughes, Miss Gertrude Kroll, Miss Laura Parry and Baby "Bobbie" Santesson.

TO OPEN JOHNSON ESTATE

Karoline Peterson Asks New Hearing Claiming \$100 Due Her

Heirs to the estate of John F. Johnson have been cited to appear in the county court here Monday, June 18, and show cause why the case should not be reopened. Karoline Peterson, who claims Johnson owed \$1000 to her, and that she had a \$600 claim against the estate, has filed the petition to reopen the case.

She claims that she was induced to sign an assignment of her claim and her equity under the will by Drusilla Sellars and Ernest Sellars on their promise to pay the \$1,600 which she claims is due her. Ernest Sellars is alleged to have taken the woman to a bank in Portland after she had signed the assignment and given her only \$1,500, which she declares he said was all he had. She wants the remaining hundred.

PLAN RELIGIOUS WORK

Endeavors of Eastern Clackamas Have Big Enrollment

The rally of Christian Endeavors of eastern Clackamas at Estacada Sunday was marked by addresses by G. Evert Baker, of Oak Grove, and Elbert Charman, of Oregon City, and a discussion of various phases of the Endeavorers' work.

Since organizing recently the Estacada and Springwater societies have been rapidly increasing their enrollments. A number of visitors were at the rally, among whom were Loraine Ostrom, Jennings Lodge; Dr. Roy A. Prudden, Elbert Charman, Miss Della Hinchman, Miss Marian White, Oregon City; G. Evert Baker, Oak Grove; and Misses Jennie Muller and Shirlee Swallow, Wichita.

Why "Liberty Loan?"

The \$5,000,000,000 bond issue of this year is named "The Liberty Loan of 1917" because it is to be a loan from a free people to be used in freeing the world.

It is the loan of a liberty-loving people to be devoted to the establishment of liberty in Europe and on the high seas.

It is the loan of the great democracy of the New World to redress the wrongs and support the cause of the democracy of the Old.

These bonds may be purchased through any bank or post office in the United States or by applying to the Treasury department in Washington, D. C.

New Spark-Plug Cleaner

Spark plugs may be rapidly freed from carbon and oil by a new cleaning device which does not require the plugs to be taken apart for its operations, according to the June Popular Mechanics magazine. It consists of a small tube with a bushing at one end to receive the plug, and a number of loose needles contained within. When the tube is half filled with gasoline and the plug to be cleaned is screwed into the bushing, it is only necessary to shake the tube, when the needles inside pick any carbon off the porcelain, while the gasoline dissolves any oil on the plug.

MEASLES CLOSE SCHOOL

Mount Pleasant Term Ended Friday Because of Epidemic

Measles, chicken pox and whooping cough made a drive on the Mt. Pleasant school and forced it to close for the term last Friday afternoon. As only nine out of thirty pupils were attending school, the principal thought it advisable to anticipate the regular June closing. Fortunately, no fatalities have resulted from the epidemic.

School Supervisor B. Vedder visited the Firgrove, Redland, Viola, Dodge, Springwater, Twilight, Barlow, Canby, Marks Prairie, Pleasant Hill, Milwaukie, Oak Grove and Concord schools last week, and reports that he found very little to criticize during the entire trip.

Since his last visit, the Mt. Pleasant school had become standardized, that is to say, it had complied with the regulations of the State Board of Education, and was entitled to the certificate and pennant from the office of the county superintendent with which he gladly presented it.

TESTS SHOW OVER-SUPPLY

West Linn Gets 1,045,790 Gallons More than Third Share

West Linn will probably drop the controversy over its supply of water when the report of City Engineer Miller and H. A. Rands is submitted to the city commission. In their tests conducted for the purpose of measuring the water which goes to that town and Oregon City it was revealed that 332,538 gallons more than West Linn's share went into the mains in 24 hours.

Of 3,137,328 gallons measured, 175,000 went into the Oregon City main and 1,378,328 went to West Linn. As West Linn is only entitled to one-third of the water it can readily be seen that the town is getting an oversupply.

The Courier and the Daily Journal \$4.75

MARRIED IN PORTLAND

Well Known Young Couple of This City United in Pro-Cathedral

Miss Clara Pearl Mitchell and Mr. Joseph M. Justin, both of this city, were united in marriage Sunday noon by Father Cronin, of the Pro-Cathedral, Portland. After the ceremony, witnessed by a few intimate friends, a luncheon was served at the Portland hotel, followed by a trip over the Columbia river highway. They returned to Oregon City Sunday evening and will be at home to their friends in September at their bungalow, Eleventh and Center streets. Mr. Justin is a salesman for Price Bros., and Miss Mitchell is a bookkeeper for the First National bank.

Asks Writ of Review

A writ of review was asked in the estate of Lulah Tondemier by the heirs this week in a petition filed in the office of County Clerk Iva M. Harrington.

Large advertisement for ZEROLENE motor oil, featuring an illustration of a Studebaker car and the text 'STUDEBAKER MAXWELL proven entirely satisfactory' and 'ZEROLENE The Standard Oil for Motor Cars'.
