PUBLIC IS WARNED

Against Taking Substitutes for Nuxated Iron

Physicians Below Say That Ordinary Metallic Iron Preparations Cannot Possibly Give The Same STRENGTH, POWER AND ENDURANCE As Organic Iron—Nuxated Iron

United States Judge Atkinson Gives Opinion

Careful investigation by physicians among druggists and patients has revealed the fact that there are thousands of people taking iron who do not distinguish between organic iron and metallic iron, and that such persons often fail to obtain the vital energy, strength and endurance which they seek, simply because they have taken the wrong form of iron.

Therefore, physicians mentioned below, advise those who feel the need of a strength and blood builder to go to their family doctors and obtain a prescription calling for organic iron—Nuxated Iron—Nuxated Iron—Nuxated Iron.

It is surprising how many people suffer from iron deficiency and do not know it. If you are not strong or well, you owe it to yourself to make the following test: See how long you can work or how far you can walk without becoming tired. Next take two five-grain tablets of Nuxated Iron three times per day after meals for two weeks. Then test your strength and see how much you have gained.

Manufacturers' Note—Nuxated Iron, which is prescribed and recommended above by physicians is a secret remedy, but one which is well known to druggists. Unlike the ordinary metallic iron products it is easily assimilated, does not irritate the stomach, and does not cause constipation. The manufacturers guarantee successful and entirely satisfactory results to every user who will refund your money. It is dispensed in this city by all good druggists.

UPPER HIGHLAND

(Too Late for Last Week)

The basket social, which was held at the Upper Highland church on Saturday evening, was a decided success in spite of the weather. The program went off splendidly from start to finish. The primary classes were especially interesting in their representation of "The Three Bears," and the play, "How Woman Keeps a Secret," seemed to please the men folk immensely, as it was exactly their idea that "she can't." There were 24 baskets ranging in all sizes and shapes from a small doll chair to a medium sized wheelbarrow. The auctioneer, "Buzz" McVay, started the baskets off with a "bang." No basket sold for less than \$1.25 and the highest were \$5.50, \$6.00 and \$6.50. The entire proceeds, \$61.00, went to the school district for a new desk, chair and other needed supplies for the school house. \$5.00 goes to the Junior Red Cross, which makes the Upper Highland school 100%. Coffee was served and the audience and helped quiet the nerves of several of the men, who had become excited over the bidding.

LOGAN

Oregon City, route 2, is passing through one of its annual or semi-annual interruptions from high water.

First the Abernathy road was flooded and then the Parkplace pavement. Some of the neighbors have brought the mail most of the time and we have to be contented with that plan.

The writer well remembers his boyhood days in the Stafford country, when neighbors took turn at bringing mail from Oregon City, once a week, and how it was appreciated!

Weekly papers were all that visited farm houses then. How times have changed and how rapid we are. If conditions were the same now we would just about have heard of the close of the big war.

R. M. Tracy and W. M. Kirchem killed a coyote last week. The dogs drove it into a barn, where it was easy prey.

M. Liebenritt has a lot of mole traps and is serving himself and the farmers by catching their underground enemies.

We have been getting the rain that was due last Spring, which is alright if Jupiter Pluvius does not keep right on and give us next Spring's supply, too. But let us not be pessimists. This will be a good season, for the power above has never given this country three bad years in succession and never will.

Claude Sprague has bought the Hawley place and will move on in the near future.

We read in the Bible of seven fat years and seven lean years. If farmers had seven years in succession as lean as the last two and a world war to fight at the same time, they might be tempted to join the Bolsheviks and destroy themselves as well as others.

Sixty-nine cents per pound for butter fat and a prospect of going higher, and about seventeen cents for live hogs, brings the vision of some profit in dairying if feed is high at present. Those that kept the cows, the hogs and chickens, will be rewarded for doing so in face of discouragement.

Patient watchful waiting will be rewarded by seeing a just and mighty world government evolved out of the great peace conference "over there." The heaven is at work. Right is right and will prevail, despite the lack of mental dimension in some U. S. senators.

And so this great nation has really shoved old John Barleycorn out into the deep sea. It seems hard to realize that such a great bloodless revolution has really succeeded. It has not been very long since the few of us who howled for prohibition were generally regarded as visionary fanatics seeking to destroy "personal liberty." The great war hastened the final jump and that is one item on the credit side. Women's suffrage was moved along several paces, but did not quite make the goal. Well, that is the way humanity progresses. Opposing forces clam up progress for

TWILIGHT

Did you ever stop to think that in reality we derive more pleasure from anticipation than from realization—another proof of the wisdom in continually wishing for something not within our means.

L. E. Bently spent a day of last week with his son, Earl, in the Highland district.

Mrs. Curtis Dodds shopped in Portland Thursday.

Our influenza patients among the student body are back in school after a month's absence.

Tom Kelland is clearing a little more land this winter. Tom cannot be accused of idleness, which is further disillusioned by his continued prosperity.

We admire L. E. Bently, our neighbor, especially for the manner in which he adheres to his beliefs. Usually he is right and, originating in Missouri, can be shown when he's wrong. He is a good neighbor and we do not mind telling him so.

Occasionally every man (this includes the women) gets off on the wrong foot and wise is he who gladly confesses the fact when discovered.

W. A. Dodds, in his younger days, was a country school teacher and claims that a very large per centage of boy students carried strings in their pockets. That was in Ohio. In Oregon, a man without a chunk of baling wire in his possession is the exception.

The community for the first time in four months is entirely free of sickness, with but one fatality, that of Mrs. Henry Scheer. All others afflicted have resumed their usual avocations of life, and we are thankful that it has been no worse.

The recent holdup in our vicinity has brought into use the long neglected night latch, together with a cursory examination of window fastenings.

H. L. Scheer is entertaining his brothers, Louis and August, from Oklahoma; also his mother from Portland.

The recent wind storm killed a cow of H. L. Scheer by a falling tree, and injured another one of F. J. Meindle by a falling limb.

Seventy-four years ago, the 26th of this month, in the state of Ohio, Mr. W. A. Dodds was born. While that state bears the honor of this production it has been left to Oregon and especially to this community, to reap the fruits of that quiet event.

A small body of friends, as has been their custom annually, gathered at the home of his son, Curtis, Saturday night in commemoration of his birthday. The guests were: Mesdames Geo. Randall, King, Chinn, Bentley, McCord, Harvey, Kelland and Mrs. Swartz, father of Mrs. Chinn. The flowers scattered in Mr. Dodds' pathway met a hearty response from the recipient. Dainty refreshments were served, a little music and general conversation indulged in. The mid-night hour witnessed a renewal of the cordial wishes of the gathering for his continued presence among us, the enjoyment of health, life and happiness for years to come. Incidentally, some 14 years later A. H. Harvey first saw the peep of day, and P. S. King was ushered in still six years later. They were present

as minor stars. Mrs. Dodds' beautiful home never appeared more lovely, nor did a more friendly gathering ever assemble anywhere.

CHERRYVILLE

(Too Late for Last Week)

A regular January thaw.

The hard winter that was so generally predicted has failed to come so far and winter is more than half gone.

A fine entertainment was given at the schoolhouse last Saturday night and was appreciated by all present. The program was carried out largely by the school children, who did very well.

George TonEck was honorably discharged from the U. S. army at Camp Lewis and returned home here, where his wife is teaching this school. He was attached to a detachment of Coast Artillery, and after a term at the Benson Polytechnic, was sent to Camp Eustis, Va., where a transport with convicts was waiting to take them to France, but the day they reached there, November 11th, the Armistice was signed and, after staying there about six weeks, they were sent back to Camp Lewis, where they remained inactive for three weeks until the red tape

was unwound enough to let them out. George saw a good deal of this country and was quite highly delighted with the fertile level lands of Nebraska, Iowa and Illinois, and their immense fields of corn. Still, taking it all in all, Old Oregon looks best to him in many ways. He was not at all pleased with the South or the part that he saw, as the natives, largely negroes, were shiftless, dirty and lazy, and whenever they got a chance at the soldiers from camp in their restaurants or hotels, they charged frightful prices. Oysters, that were piled up on the wharves along the Chesapeake bay, became almost as costly as pearls when served up to soldiers. The fare, too, at Camp Eustis was rotten. Meals, especially breakfast, which was mostly bitter corn meal mush with no sugar and very little watery milk, 12 gallons being allowed for 157 men. The meals all the time they were there, were insufficient and of poor quality. Some quartermaster was profiteering and the government will be on his trail and make him disgorge. In marked contrast was the bill of fare at Camp Lewis, where a feast of palatable food was well served three times daily.

In regard to the "flu" in the
