OLD ITALIAN SPORT

Peculiar Method of Snaring Migrating Pigeons

At Cava del Tirreni the Birds Are Waylaid With Nets and Slings-Much Ingenuity Necessary to Secure Good "Bag."

It is not often that one comes across past three months. a little place that has an ingenior and exciting sport all its own, At Cava BOYD F. TRAYLOR DEAD, del Tirreni in Italy, nowever, there has for a thousand years existed a peculiar form of pigeon catching. It was introduced in 892, says Mr. Herbert Vivian in Italy at War and it has flourevery autumn great flocks of pigeons pass over Cava and the Gulf of Saler-25th of October.

where the nets are set up. One tower is probably a thousand yards from the net, and the nearest perhaps seventy net, and the nearest perhaps seventy only 27 years in his youthful manyards, but the distances vary. The towers are tall and slim, windowless this "Blessed Sleep" in Portland,

In a merry mood the members take their places in the fresh morning air. Most of them are dressed in velveteen coats, top-boots and peaked caps. Two men ascend each tower and the rest are distributed among the nets. In each of the clearings stands a small house from the center of which rises a tall black mast. To that two huge nets are fastened, stretching right and left to clumps of trees and spreading out obliquely to the ground. Inside the house is a handle and a cogwheel for raising the weighted nets. The lookout place is a straw hut two or three miles away in the direction from which the pigeons are expected. When the watcher sights a flock of birds he ship yard. gives a signal on his horn, which other watchers scattered about the woods

The birds travel at a tremendous the essence of the sport, and it re- pay their last respects. quires strong muscles, a quick eye and a steady aim.

But the netting is also difficult. The man at the ropes is white and nervous; everything now depends upon him. If he releases the weight at the right moment, the net comes down instantly and the birds are bagged. A moment too soon, and they see the

"War Time."

A novel memento of the great war is a clock, which is made from munitions -both enemy and allied-collected on the Somme battlefield by a soldier, who afterwards used them for this purpose. The body of the clock is a German shellcase, and German cartridges form the legs. Of the three cartridges on top of the timepiece, the two outside are German, and the one gracing the center French, while the two small ornaments between these are Belgian bullets. The side ornaments are made from Verey-light cases, pierced to admit of a British

cartridge projecting through the top. The pendulum consists of five French bullets, and the figures and hands are bent to shape from copper wire taken from German trenches. To complete the whole, the clock movement inside is also of German make, and, after necessary repairs, is found to be entirely adequate.

Look to Africa for Food. The world-wide shortage of food and the certainty that this shortage will continue in modified form for years to come has roused France to utilize more fully her great colonies just across the Mediterranean. Comprehensive plans are being formed-and started on the way to fulfillment-for refrigerating and packing plants in Algeria, so that the animals need not be shipped across the sea alive. These institutions, too, will give a much readier and steadier market than has been available hitherto, and that is probably all that is needed to quadruple the meat exports of North Africa.

took it for a week and felt a little beter. I kept it up for three months, and I feel fine and can eat anything now without distress or nervousness."-Mrs. J. WORTHLINE, 2842 North Taylor St., Philadelphia Pa.

The majority of mothers nowadays overdo, there are so many demands upon their time and strength; the result is invariably a weakened, run-down, nervous condition with headaches, backache, irritability and depression—and soon more serious ailments develop. It is at such periods in life that Lydia E. Pinkham's Vegetable Compound will store a normal healthy condition, as and to Mrs. Worthline.

All the convenience of gaswithout the dust and dirt of coal or wood

Pearl Oil, the Standard Oil Company's kerosene, is one of the most convenient and economi-

cal fuels you can use. Easy to handle. With a good oil cookstove you will cook in comfort all year 'round. Bakes, broils, roasts, toasts—economically. Lights at the touch of a match. No waiting for fires to come up, no unnecessary work, no waste. Concentrates a steady heat on the cooking-leaving the kitchen cool and com-

Strong, Forceful Men -With Plenty of Iron In Their Blood-

These Are The Ones With The Power and Energy To Win just short of winning because they don't

"Many a capable man or woman falls back up their mentality with the phys-

back up their mentality with the physical strength and energy which come from having plenty of iron in the blood," says Dr. James Francis Sullivan, formerly physician of Bellevue Hospital (Outdoor Dept.), New York, and the Westchester County Hospital.

"Tack of iron in the blood not only makes a man a physical and mental weaking, nervous, irritable, easily fatigued, but it utterly robs him of that virile force, that stamina and strength of will which are so necessary to success and power in every walk of life. It may also transform a beautiful, sweet-tempered woman into one who is cross, nervous and irritible. To help make strong, keen, red-blooded Americans there is nothing in my experience which I have found so valuable as organic iron—Nuxated Iron." It often increases the strength and endurance of weak, nervous, run-down people in two weeks' time. Unlike the older inorganic iron products it is easily assimilated, does not injure the teeth, make them black nor upset the stomach. The manufacturers guarantee successful and entirely satisfactory results to every purchaser or they will refund your money. It is dispensed in this city by all good druggists.
