Cataract Washer

She Sits and Sews While the Washer Goes

The worst part of housework is the washing-when done in the old way, on the rubboard, rasping the dirt and soil out of each peace separately, by hand. If you have a hand machine it will help out, but even then someone must push and pull the handle back and forth, and, although it is not hard, it becomes ardous before the family washing is completed. Then, the wringer must be turned by hand, and this is by far more tiresome than operating the washer.

Hand operated machines have been done away with in the factory, in the office, and in the institution, and, in fact, everywhere. Men now use machinery operated by power. Why should women not do likewise.
