Two social hops in town last Saturday night—one at the hotel and the other at Sam Miles', north of town. Both were well attended and a pleasant time was enjoyed by all.

Dr. Botkins received word that his son-in-law's house in Pittsburg, Pa., was partially destroyed by a bomb during the bomb explosions a couple of weeks ago. Mr. Dibley, the son-in-law, is connected with the government, and has something to do with deporting undesirable citizens, or rather, aliens.

In taking a trip across the country, the writer never saw a finer prospect for a big crop in any country. As fine oats and wheat in several fields as were ever seen in the Middle West. The hay crop is not so great, although many fine fields were seen, while the vetch was simply immense. Only one strawberry patch of any size was seen in a trip of over 40 miles, taken recently, and yet they are the earliest crop grown there and never fail, while the price—three and four dollars a crate—is very attractive.

A letter from Illinois says that a violent electrical storm lately killed a man and wife in bed, but the infant, in a crib, was uninjured. Also that the Army worm is doing a vast amount of injury to growing crops. A fine country for destructive storms, frequent and sudden changes of temperature, alternating from one extreme to another in jig-time. The tendency of human nature to go to extremes is seen in a statement of Evangeline Boothe, the head

No badly infected person ever became the parent of fine healthy children nor
