BALANCE SCALE IS ACCURATE
THEORETICAL LEVEL OF TILTED

No balance scale depends upon the accuracy of its performance. It must be accurate to the point of 1/2 inch (50 feet) or, in the case of smaller scales, to 1/16 inch. In order to be accurate, a scale must be perfectly balanced. If it is not, it is useless as a tool. The United States Balance Scale is perfectly balanced and is guaranteed by the manufacturer for a period of one year.
