A misunderstanding exists among the voters in some sections of the ter-

ritory involved, regarding the proposed water district sought to be formed at a special election called for March 14th. The election on the above date is to determine if a district is to be formed and if formed carries with it the election of three water commissioners. If the vote is favorable for the creation of the district, the next step will be with the commissioners who will engage engineers and prepare plans and secure an estimate of the cost of installing the proposed system. Then will come before the voters the proposition to vote bonds to provide for construction. This question would presumably be submitted to the voters at the primary election in May. In no case could the bond issue exceed ten per cent of the assessed valuation of the district affected.
