Tooze is a vote for the man who: (1) Will work for TAX REDUCTION—(a) Big cutting down government expenses; (b) By Equalization of Assessments; (c) By putting New Sources on the tax roll. (2) Will strive to make the state penal and reformatory institutions to which the 1921 legislature appropriated \$965,009.35 SELF SUPPORTING or even REVENUE PRODUCERS as in other states of the union. (3) Is against Special Appropriations except in REAL EMERGENCIES. (4) Believes in the Millage Tax for the support of the University, O. A. C. and Normal school, as the best means to keep these educational institutions out of legislative log rolling, political chicanery and discrimination. 600,000 out of the \$12,103,000 appropriated by the last legislature. The Tax Reduction League endorsed this system at its recent meeting in Portland; several governors have endorsed it in their platforms since F. J. Tooze announced it as a part of his legislative program. If you want a man who will thus represent you on these issues. Vote for F. J. Tooze for Senator. How to Really Save On Cost of Painting FIRST, find out what good paint is, for that is where you start to save on paint. We spend more to make paint for your economy as follows: We use only the best materials in Fuller's Specification House Paints—PIONEER WHITE LEAD, pure linseed oil, zinc and finest colors. We super-purify the lead in a special purifier. Then we make the lead so fine that it will pass through a silk screen with 40,000 meshes to the square inch. The "whiter" lead means clearer-toned colors. The extreme fineness means better mixing quality, greater covering capacity, more ease in spreading—a paint that's always uniform and smooth. Such paints when applied form a beautiful elastic, tough, protective coat that stays. They are known as "Fuller's Specification House Paints." Where "Cheap" Paints Fail Don't Figure Paint Economy as "Cost per Gallon." "Cheap" paints can't compete with good paints in economy. "Cheap" paint covers less—you buy more gallons. It is harder to spread, requires more work—so you pay more labor cost. Your "saving" in less cost per gallon is very quickly eaten up. Cheap paint starts to crack in twelve months. Good paint remains good five or more years. It is really the cheap paint that is expensive. Don't allow surfaces to rot—it costs less to paint them. There is no real cost in painting with the best paint. Depreciation of an unpainted building far exceeds the cost of paint. Take advantage of Fuller House Paints. Take steps to paint now. Don't let weather depreciate your investment. W. P. Fuller & Co. Dept. 23, San Francisco. Pioneer Manufacturers of Paints, Varnishes, Enamels, Stains, and PIONEER WHITE LEAD for 72 Years.
