OREGON COUNTY PRESS OFFERED SERVICE PRIZES

Newspapers Carrying Best Rural Community News in Their Classes Will Get Cups and Pens

All weekly and semi-weekly Oregon newspapers have been invited to enter the second rural news service contest with valuable prizes offered by the department of industrial journalism at O. A. C. The papers will be judged by a committee of three at the annual meeting of the state editorial association at Corvallis, July 21-23.

"The first contest was a big thing in bringing the advertising value of a good rural news service to the attention of Oregon editors said C. E. Ingalls of the Corvallis Gazette-Times, ex-president and present program committee chairman of the association. "As a member of the former judging committee I had occasion to study the close relation between the amount and quality of rural news and the amount paid advertising. You should have this contest at the annual meeting of the association by all means."

To enable every newspaper in Oregon to enter the contest with a chance to win on merit the country papers have been grouped into three classes with a loving cup as first prize, fountain pen second and honorable mention third. The classes are: First, grand champion, free for all, except dailies; second, paper published in town of not more than 1500 population; third, paper of fewer than 25 columns all home print.

The "best must be left to the judges to decide, but they will consider the amount of news from any community away from the public point or news and editorials primarily for rural readers and the quality of this news and its ratio to the total news and editorial space. To eliminate special "creamings" it is specified the editors may select any edition of their papers published in June, 1922.

Quick action in getting results of experiment station investigations into action on Oregon farms was said by the California legislative committee looking into agricultural college work to be one of O. A. C.'s most distinguished qualities. Farmers have gone the plan then in use one better recently by visiting the station in large bodies, seeing for themselves just what findings are of value and applicable to their conditions, and going home with the hope in their pockets for use—possibly the next day or that evening. Can you beat it.

The shrewdest of these farmers say that in one day they learn some things of great value that they have tried many years of actual farming to pick up without success. Among some score of things listed as highly useful information the following are frequently mentioned: By simply rotating crops—grain, corn and clover, say—net profits were increased \$8.82 per acre annually in rainfall farming and \$14.09 in irrigation farming; farm manure realized \$1 to \$5 an acre annually for three years—light application; alfalfa on sandy loams of western Oregon yields an average of 4 1/2 tons per acre annually over periods of 7 to 10 years—a most profitable forage crop, the best kinds of wheat to grow in each tile community to make production and marketing best; white lands can be tiled drained and made to grow more than 2 tons of clover hay per acre; the new college-bred vetch will succeed on many soils too wet for the common kinds; sheep are most economically kept on western Oregon farms by a

combination of native and cultivated pasture—rape and clover being two good cultivated pastures; hogs can be profitably grown only for home market; Oregon grown clover seed is much the best for Oregon; clover and alfalfa may be protected largely from stem rot by clipping or pasturing before winter.

CLEANING LACE CURTAINS

In cleaning lace curtains the dirt should be squeezed rather than rubbed out. Use only a neutral soap but do not rub it in. Soak curtains in soapy water in which ammonia or borax has been added in proportion of one tablespoon of either to a quart of water. Soaking should remove dirt, but boiling is sometimes necessary. Rinse thoroughly in several changes of clear water and then dip in water containing two tablespoons of borax to one cup of water.

Lace curtains should be put on curtain stretchers and not ironed. Care should be taken that they are pinned on top of one another on one stretcher. If stiffening is desired use a very thin solution of starch as curtains easily become too stiff. It is impossible to give exact amount of starch as curtains vary in thickness. It is well before washing them to shake or brush off the accumulated loose dirt.

PUTTING UP EGGS FOR WINTER Lime Solution

If water glass is not obtainable, lime may be used. It is not considered so good as water glass, as in some instances eggs preserved by this method have tasted slightly of lime, although at other times lime water has proved entirely satisfactory.

To preserve with lime, dissolve two pounds of unslaked lime in a small quantity of water and dilute with five gallons of water that has previously been boiled and cooled. Allow the mixture to stand until the lime settles, then pour off and use the clear liquid. Place clean, fresh eggs in a clean earthenware crock or jar and pour the clear lime water into the vessel until the eggs are covered. At least two inches of the solution should cover the top layer of eggs.

Best Results

If best results are to be obtained the eggs should be fresh and clean and perfectly infertile. For this reason it is always best when possible to candle the eggs carefully before preserving them, unless they are known to be perfectly fresh. If an egg is only slightly soiled a cloth dampened with vinegar may be used to remove the stains, but eggs should not be washed with water, as the water removes the protective coating that is on the shell and may tend to cause the contents to spoil. Under no circumstances should badly soiled or cracked eggs be used for preserving, as one or more such eggs in a jar may spoil all the others.

Rhubarb Sherbet

One pound of rhubarb, six tablespoons of sugar, the rind of one-half lemon, three cupsful of water for 10 minutes, stirring frequently. Add the lemon rind and ginger and simmer for 10 minutes longer. Put in the sugar, stir until it is dissolved, then pour into bowl and let cool.

Rhubarb Dessert

Wash three pounds of rhubarb, cut it into small pieces until tender. Soak one heaping tablespoonful of gelatin in half a cupful of orange juice and when the rhubarb is removed from the fire add this mixture to it. Let it get perfectly cold. When ready to serve fill some small patty shells with the rhubarb mixture, heap sweetened whipped cream on top and sprinkle over a few chopped nut meats.

The long growing season and cool summers are particularly favorable for a lettuce crop west of the mountains. Of the many varieties of lettuce offered, the New York Head is most commonly grown, suggests J. L. Stahl, of the Western Washington Experiment Station of the State College.

Young plants are usually raised under glass in hot-beds or cold-frames and set in the field after the seed bed has been properly prepared. As soon as four leaves are well developed and the plants 2 or 3 inches in height they are ready to be transplanted to the field. Plants are usually set 10 to 12 inches apart in rows about 18 inches apart.

When cultivating, the soil should be kept loose and fine 2 or 3 inches in depth during the growing period to insure moisture and keep down weeds. Where water is available, the crop would be benefited by one or two irrigations during the driest part of the summer.

Where the soil has been well fertilized before planting the lettuce, one pound of Nitrate of Soda to a square rod of area, scattered between plants in the seed bed will stimulate them. This material will injure leaves of the seedlings it touches.

Another good mixture to help stimulate the growth is 100 pounds of Nitrate of Soda, 300 pounds of Super-phosphate and 75 pounds of Sulphate of Potash, per acre. One application can be made just before planting or just after and a second when the plants are about half grown.

Head lettuce is an excellent crop to follow early potatoes the same season or precede a late planted crop. Some reset with new plants in the field as soon as the early plantings are harvested.

SPARTA—\$700 gold cleanup at Madan Gulch claim.

Klamath Falls—1500 men working in sawmills and box factory.

Salem—Staff prison furniture factory to employ 75 men.

Portland will vote on \$3,000,000 1925 exposition tax in November.

Wallowa—Contract let for \$42,000 school building.

Riddle—16 farmers to install electric irrigation plants.

Lone to have fireproof warehouse 26 by 76 ft.

Myrtle Point—Lampa road to be built, cost \$11,000.

Eugene—Work starts on city projects.

Oregon to receive approximately \$3,000,000 for road improvement work from the federal government during next 3 years.

Prineville, recently destroyed by fire, being rebuilt. \$10,000 brick store going up.

Portland—\$300,000 wholesale house planned.

Bend—Votes \$8,000 bond issue to aid in financing school construction program.

Portland—Plans prepared for \$100,000 Beth Israel house.

The Dalles—25 carloads cherries shipped east.

Milton—\$22,000 power plant being installed.

Waldport—Work on Waldport-Tide-water section of Corvallis-Waldport highway to start at once.

Hood River—\$10,000 contract awarded for new junior high school bldg.

Eugene—500 car loads gravel to be spread on Elmira-Noti and Elmira-Franklin road grades.

At the close of 1921 the investment of plants and equipment in the electric light and power industry of the United States totaled \$5,000,000,000, an increase of over \$2,000,000,000 since 1911.

Roseburg Country Club nearly completed.

Dallas—First unit of high school gymnasium to cost \$4500.

Portland—Concrete Pipe Co. to erect 2-story factory, cost \$20,000.

St. Helens—Lumber shipments for week approximately 3,500,000 ft.

Eugene—Lane county man sells \$35,000 prune crop to California Packing Corporation.

The Clackamas County Jersey Cattle Club will hold its regular meeting at the home of Mr. and Mrs. P. J. Anderson, one mile east of Monitor, Oregon, on Saturday, July 8, at 10:30 a. m. Basket dinner at noon, you are welcome.

RHEUMATISM

is one of our most common and most dreaded diseases. It is an easy matter for me to relieve, through my method of treatment. I have successfully treated numerous cases. Don't say your case is beyond treatment, or you have tried numerous doctors and they have failed. It makes no difference how many doctors you have consulted or treated with. I have had numerous cases that were thought by the patients and doctors to be beyond treatment and benefit. But I have demonstrated to the patients that they could be treated and rid themselves of that terrible, agonizing pain.

Why be an invalid and be in pain when you can rid yourself of it? I have patients that come hundreds of miles to have me treat them. Call at my offices, let me examine your case and demonstrate that I can relieve that pain. It makes no difference how long you have been suffering; it is not hopeless.

Office consultation and examination free. Neuralgia, Lumbago, High Blood Pressure and Sciatica also treated with great results. Do not put it off. Come at once; let me do for you what I have done for others.

DR. D. O. ANDERSON, Specialist. 716-717 Dekum Bldg., Portland, Ore. Residence phone, Tabor 1159. Office phone, Broadway 6000. Office hours, 10 to 12 and 2 to 5; Sundays 10 to 12. Evenings by appointment.
