Official Paper of City of Oregon City

"Flag of the free heart's hope and home!
By Angels' hands to valor given;
Thy stars have lit the welkin dome,
And all thy hues were born in Heaven.
Forever float that standard shaght!
Where breathes the foe but falls before us.
With Freedom's soil beneath our feet,
And Freedom's banner streaming o'er us."
—JOSEPH DRAKE.

THE LOVE THAT SAVES—For God so loved the world that he gave his only begotten Son, that whosoever believeth in him should not perish, but have everlasting life.—John 3:16.

A MORAL CLEANUP

Another chapter has been written in the history of the Oak Grove dance pavilion as a result of booze participation in the luxurious "hop" entertainment at the place on Saturday night last. One poor drunk was put in jail drunker than other drunks and though not now drunk he still lingers behind the bars in the cool basement of the county's bastille awaiting trial for drunk and disorderly while drunk.
In the meantime, the proprietors of this resort—a man and a woman—are also awaiting trial on a charge of running dance without license from the county court, defying these officials and claiming immunity from county jurisdiction through a state corporation permit. Another arrest for drunk and disorderly was made here recently.
These individuals propose to run this place without respect to the moral or decency rights of the community and its high time it was determined whether they or the county is in authority.
The moral law abiding element of Clackamas county should and it is expected will commend and support the sheriff, the court and prosecution in trying to purge the county of this moral leper. Of itself it will not change its spots.

ONE WAY TO LESSEN CRIME

Prompt and adequate punishment is the most effective deterrent for contemptive criminals. If the moonshine gentry, the speed fiend and the boozier who takes a chance at the wheel of a car when drunk were sure of a jail sentence they would think at least two times before defying the law or taking chances with human life as do drunken drivers.
There can be no doubt that the species of crime mentioned here has been until recently encouraged by the general wish-washy attitude of the courts, oftentimes abetted by the "it can't be enforced" attitude of officers. But here in Clackamas county, the booze shysters, who feed like parasites on the weakness of other, the speed fiends who drunk or sober threaten the lives of others while they defy the law are beginning to sit up and take notice. Once in the justice court is a good start for the calaboose where the birds and trees, green grass and freedom is viewed through basement windows and iron bars. And as the officials tighten up on the lawless more of the gentry will brought to justice and the more obedient will be others to the requirements of the law.
The crime situation in Detroit, Chicago and other centers of population became appalling and then the officers of the law and the courts aroused themselves and began to mete out punishment swift and adequate and within a few months crime has decreased in these same centers more than fifty per cent. TRAINING LITTLE CITIZENS

These Articles published weekly in these columns are Issued by the National Kindergarten Association, New York City

A COMMENDABLE SPIRIT

A teacher who picks the smallest community she can get, such an anomaly is Miss Margaret V. Thomas, now a student of the University of Oregon summer session. Miss Thomas never tries for a big school; she selects the smaller places from choice, realizing an opportunity to do a great deal besides simply teach the school subjects.
Miss Thomas's outfit includes teropic slides and a carbide generator, and an occasional motion-picture film is shown.
"We produce the 'movies' in the darkened schoolhouse," Miss Thomas explains, "and a victrola plays between the pictures while we ventilate the room. The children are eager to help. They are happy to be allowed to run the victrola or even open the windows."
Not only does Miss Thomas take the slides to those people who are far from cities and towns of any size, but after making them interested in doing

things on a community scale she organizes children and adults into groups and manages basket socials, picnics, plays, all with the intention of helping them raise the funds which enable them to bring in slides more often.
"They are so responsive," she said. "If you love them and do things for them, they will love you—almost to death. And those children are not 'fed up' on city movies; they get a good deal out of the university films."
"The people in the small settlements are pioneers; their children are the children of pioneers, and are the finest in the country. They deserve the best the state has to offer."
Miss Thomas has used the industrial films most, also the geographic and historical. Her whole aim is to stimulate community life in the smallest places and to add to the sum total of happiness. She taught last year at Heceeta, a lonely spot on the Oregon coast, and next year she will be near Reedsport.

tricts and her booze has far less crime proportionately than has America. And for this condition her courts and executive officers must be credited. In the ratio that punishment is speedy and sure the criminally inclined decline or seek new fields for operations.
May Clackamas county set a new record in the matter of law enforcement to the honor of her fair name and the safety of her citizens.

HELP SAVE THE DAIRIES

Strenuous effort is put forth by the dairying interests of the country to prohibit the shipment of skim milk compounds through interstate commerce on the basis that they are "adulterated and deleterious articles of food. Congress has been asked to pass such bill.
Labels on the containers proclaim it unfit for infant foods, but of real value in bakery products.
The matter resolves itself into a contest for and against the dairies which are now becoming fewer every year as a result of many causes—substitutes for dairy products, high cost of feed and shortage of help on farms and dairies.
The dairy industry should be encouraged and one of the most effective way is by discouraging substitutes and the so called skim milk compounds consisting of skim milk and cocoanut oil is one of them. Write your congressman today.

MAKE THEM PAY TAXES

A respected citizen of Clackamas county who recently paid a visit to the penitentiary expressed emotion at the sight of several hundred men in sheer idleness. And why shouldn't he revolt at such condition? He a farmer, a taxpayer, toiling long hours to meet the cost of family maintenance pays from his hard earned money to sustain these men who have damned society by their acts in their

idleness. Nor is this all.
In maintaining these men in idleness the state breeds in them greater contempt for honest service than they knew before the state took them under direct control.
Their criminal tendencies are cultivated by idleness and society pays for the instruction. And in this the state is guilty of an intolerable social and economic crime.
One of the pressing civic-economic needs in Oregon is to begin to reduce expenses and to make productive citizens out of its criminals by putting the latter to work in productive industry.

With no change so far in Marion county in the relative number of votes for the opposing gubernatorial candidates the final outcome at this rate will not be difficult to forecast.
Miss Mathilda McCormick is very desirous she says that Americans shall forget her. In fact she says this is her greatest desire. And for the real red-blooded American nothing can be easier.

When a "for life sentence" means "work for life", the rope walking stunt of leaving this world will be neither popular nor tolerated.

SAW WITH PROPHETIC VISION

Toronto Man's Remarkable Prediction of Wireless Telephony Made Many Years Ago.
A remarkable imaginative prediction of wireless telephony was made by Grant Balfour (J. M. Grant) of Toronto in a triologue which appeared in an English magazine in 1880, and was afterward reproduced in a pamphlet entitled "Bahrak-Kohl," two Hebrew words, meaning the voice of the lightning. The characters of this little treatise were represented as in the neighborhood of the Jordan.
"The prophet now took from his girdle," says the narrative, "a small instrument resembling a trumpet for the deaf. Coming down to Mohammed, he asked him to turn his right side toward the southland, to put the broad end of the instrument to his right ear. The prophet then inquired where his home was.
"My home," replied Mohammed, "is in the extreme south of Arabia, 1,400 miles away."
"Listen now," said the prophet; "dost thou hear the sound of waves?"
"I do," replied the sheik. "Where may they be?"
"These waves," answered the prophet, "are the waves of the Indian ocean breaking upon the Arabian shore."
Further describing the instrument, the prophet said: "The thing before thee is but a rude pattern in part of the coming needed device of man. No such device is required by a prophet of the Lord to construe the lightning with a message. The prophet speaks, nay, he needs but to will, and it is done."—Toronto Globe.

HAS BIG LEAD IN VOLCANOES

United States Can "Boast" of More Than a Quarter of Those Known to Be Active.
Uncle Sam owns more than a quarter of the active volcanoes of the world, the report that two more have been born in Alaska making the grand total 108.
There are 64 smoking peaks in Alaska and the Aleutian islands and many more in western United States, Hawaii and the Philippines. It is likely, however, if many of the so-called vents of the Mount Katmai region of Alaska would be classed as volcanoes this country could boast of the majority of the old earth's skin troubles—an unenviable record.
There are 417 active volcanoes on the globe that have been located to date.
There are numerous peaks in the Philippine islands not sufficiently well known to establish whether they are volcanoes or smoke pots or vents. In Alaska there are hundreds of vents from which constantly issue steam and smoke, but which are not called volcanoes.
An occasional volcano bursts forth from the sea near the Aleutian islands, but finally succumbs to the flood of sea water.

A Fortune Maker

Andrew Carnegie said, "thrift draws the line between the savage and the civilized man."
An account with the Bank of Commerce is a splendid aid to thrift.

Makes Comforts Clean and Keeps Them Fluffy

The big problem in laundering comforts is not the washing of them, but the drying of them. It is no easy matter to force the thick, dripping mass through a wringer, and drying the comfort by hand is even a harder task.
But the Laun-Dry-Ette makes this work easy. It washes the comfort for you, and then dries it. And the beauty of the Laun-Dry-Ette way is that the comfort is not flattened out by a wringer—but comes out of the Laund-Dry-Ette clean and fluffy, and dry for the line.
The LAUN-DRY-ETTE ELECTRIC WASHING MACHINE does your hardest task for you. It not only washes the heavy pieces, but dries them, too.

Successful Graduates

ARE THE BEST RECOMMENDATIONS OF

O. A. C.

This institution offers a thorough, practical, and standard education at a cost within reach of the high school graduate

It offers training for collegiate degrees in:

- Agriculture
- Commerce
- Engineering and Mechanic Arts
- Forestry
- Home Economics
- Mines
- Pharmacy
- Vocational Education
- Chemical Engineering
- Military Science and Tactics

It offers training also in: The School of Music, Physical Education, Industrial Journalism.

Fall Term Opens September 18

Two kinds of friction

It has been proved that as much as 20% of the power delivered to the driving wheels may be lost through friction, due to the use of an incorrect oil.
This friction may be of two kinds—the friction of metal on metal, due to the failure of the oil to preserve a lubricating film between the bearing surfaces, or the friction of oil on oil—the internal, molecular friction of the lubricant.
Too heavy an oil, or an oil lacking in "oiliness"—the quality that makes it cling to the bearings while at the same time offering a minimum of internal or fluid friction—constitutes a direct drain on the available horsepower of your motor.
The right body at all operating temperatures
Made from carefully selected crudes and scientifically refined by our patented high-vacuum process, Zerolene has great "oiliness." It clings to bearing surfaces, while offering in itself a minimum of frictional resistance to the engine power.
Zerolene maintains the right lubricating body under all conditions. As the engine gets hot, bearing clearances decrease. Analysis of Zerolene shows that the variations in its body, at the various engine temperatures, follow in close relation the decrease in bearing clearances.
Because of their "oiliness," stability and purity, Zerolene oils give perfect lubrication and help to develop the maximum power, speed and gasoline mileage of the car.
