IF THE SUNBEAMS could reach down into the dark corners of your cellar, the closet under your sink, the corners of your pantry shelves, the dripping pan of your ice box, or into the fixtures of your bathroom, there would be no bad odors and your home would be free from disease germs.

No. 6 Disinfectant will care for those hiding places of disease which the sun cannot reach. It is safe, powerful and inexpensive. A 50c bottle will make 16 pails of disinfectant solution.

It is an insect killer for use on dogs, poultry and cattle. It is a fly-repeller. In fact, there are so many uses for No. 6 Disinfectant that it ought to be in every home. It comes in 25c and 50c bottles—1 gal. ad 5 gal. tins—in 30 and 50 gal. drums.

Stability starts with the crude

One of the most important requirements of a good motor oil is that it possess stability—that is, that it maintain its chemical composition and its lubricating body under all conditions of engine operation.

If an oil changes its chemical composition—"breaks down"—at high operating temperatures, it can no longer maintain a lubricating film between the bearing surfaces, and its value as a lubricant is destroyed.

Certain crude oils possess a higher degree of stability than others. Because of its large production of practically every type of crude, this company is free to choose for the making of Zerolene only those crudes which are particularly adapted for the purpose.

The Patented Vacuum Process

In the process of distilling and refining these selected crudes, it is of the greatest importance not to destroy their natural "oiliness" and stability. For this reason we employ our own patented high-vacuum process exclusively. By this process the oil produced—Zerolene—retains all the natural "oiliness" and stability of the original, selected crude from which it is made.

No other refiner on the Pacific Coast uses any form of vacuum distillation. No other refiner in the United States uses as high a vacuum as this company.

Zerolene of the correct grade for your car gives perfect lubrication and permits the development of maximum power, speed and gasoline mileage.
