## Canning Week Urged.

To assist in the relief of the fruit growers of the state, who are hard hit by the present rail strike, the Oregon State Chamber of Commerce has suggested that the week of September 18-23 be designated as "Canning Week," to be observed throughout the state, during which housewives will be urged to can a two years' supply of fruit for family use.

Communications suggesting "Canning Week" have been sent to more than one hundred commercial clubs and chambers of commerce in Oregon. Governor Olcott has been requested to place his official stamp of approval upon the project.

It is pointed out by state chamber officials that the rail strike has curtailed car service to points east, especially in regard to refrigerator service, with the result that bumper fruit crops in Oregon are in danger of being lost through lack of market. An increased volume of home canning will do much to relieve the situation, it is believed.

The largest turtle ever imported to London from India was killed recently for soup. Its weight was 450 pounds.

# Seiberling Cord

A TIRE THAT WILL BE KNOWN EVERYWHERE

This product is the result of 23 years of tire building and experience of F. A. Seiberling, founder and up to short time ago president of the Goodyear tire and rubber company. Seiberling Cords do not embody any spectacular structural innovations which are untried. Seiberling Cords do, however, embody more advanced and proven structural developments than any other one tire built today. Some tires are built with THIS Seiberling feature—others with that—no tire built, however, includes them all.

Seiberling tread rubber extends from bead to bead, entirely around the tire—extra protection against tread separation and scuffing from curb and rut.

Come in and look these tires over before you start on that trip.

Here are the prices—Let us prove the quality.

"Do You Wonder I'm Proud of My Overland Sedan?"

THE pride that every woman feels in the possession of an Overland Sedan is founded on the worth and beauty of the car itself.

See how beautifully and sturdily the body has been built. See how comfortable and roomy the seats are, how deep and resilient the cushions, and the wonderful Triple Spring suspension just seems to remove every bump and rut from the road.

And it is so easy to drive—the motor, which uses remarkably little gasoline, seems eager to go on, no matter how steep the grade or how heavy the going. There is a feeling of power to spare.

No wonder people everywhere are buying Overland Sedans.
