Community Need

Most of the communities of my acquaintance in my work, have either church auditoriums, school houses large enough, or community halls, which meet the community needs of the people, but there are other small communities struggling alone, with really nothing to fall back on but their pride in the certain name of their community—who has a neighboring community in the same boat—and each, for fear of losing their own individuality, refrain from listening to all entreaties, to fall in line with their neighbor and build up a strong community center. Neither are efficiently equipped to put on any progressive community activities, the results of lack of funds and numbers, the results of non-cooperation.

Now, I can see a vision of great things being accomplished by their co-operating. A community house could be built which should be placed centrally and meet the needs of both. As all are farmers, problems of importance could be solved, the social hunger of the people satisfied in a wholesome way, the young people would have an attractive place to satisfy their activities, both recreative and social. Truly, a cemented big community could accomplish wonders. Its influence would reach out and touch many people, where now each touches only its little circle and lives among the relics of past ideas, peacefully slumbering on, dead to all the things a real live community enjoys.

Wake up, small neighborhood communities, consolidate with your next-door neighbor, build up a community center and enjoy the joy of doing big things in a big way.—A Community Worker.

Sunday School Needs Workers

Hazelia community Sunday school will hold a special service the last Sunday in October, the committee in charge providing an interesting speaker and music. The time of service will be determined by the speaker and announced later. If this effort on the part of this community-spirited Sunday school is supported by our community, it will provide a like service each month. The Sunday school would appreciate visiting in touch with community-spirited religious speakers, who will volunteer their services for this work, if continued. Write Mrs. Duncan, Oregon City, R. F. D. No. 5, or Mrs. D. E. Christiansen, Oswego, R. F. D. No. 1.

WILLAMETTE

CANBY

Dr. John Fuller

A Much-Needed Improvement

A long felt want is being supplied on a section of the highway just east of the city limits, at Aurora. The bridge across the Pudding river slough has been an eyesore and a source of annoyance to the travelling public for "many moons," and it is a source of relief to all that we now have under construction a fill and bridge-works at this point.

It will be equal in beauty and service to any section of our Pacific highway. The low ground, including the bridge, is being raised about four feet above the old level, which will eliminate the steep, rough climb heretofore met with, while the standard width, now being established, will do away with the danger of accidents. The work is progressing nicely and will be finished within a short time.

It is announced that the highway commission plans to build a new bridge across Pudding river at this point in the spring, which will complete this section of the highway.

Long Delayed Deal Consummated
The city of Canby will close the deal with the Molalla Power & Light Co., on Thursday, October 5, and take over the city plant.

The consummation of this long delayed deal will be a source of satisfaction to the patrons of the lighting system of Canby. The bonds voted for by the city several months ago were placed with Phil Hammond for negotiation, and the writer is informed by M. J. Lee, one of the city councilmen, that all things are now ready for the transfer.

LOCALS

For the first time since Canby took over the water works system, the plant is on a paying basis, and presents an optimistic outlook towards financial success.

H. E. Werlinger of Portland, going south, bumped his car into an auto being driven by A. Steffan, last Saturday evening. The accident occurred on the highway at Steffan's lumber yard. In the impact two fenders and a running board were slightly damaged and "cussed" over by the two "contacting" parties. "Safety first," boys.

The hot weather, sea-shore and mountain-trip season and the state fair is over with, and once more Canby becomes the target for auto accidents. Six accidents within a radius of as many miles, and a speed fool running through town at forty miles per, came under the gaze of our penmanship last week. If there is a real Mrs. Jiggs, who keeps on hand a stock of broom sticks, flatirons and rolling pins for runaway husbands, it might be well for the traffic squad to engage her services, with tools, and place her on the "Fifty Moore" side of our highway, just east of Canby, as a caution signal to careless drivers.

Geo. Rose of Oswego was looking after business affairs in Canby, last Tuesday.

C. H. Shelton went to Portland on business, last Friday.

A. F. Hoff spent Sunday with friends in Portland.

Chas. Prants was a Portland visitor, last Saturday.

Mr. and Mrs. W. A. Bullock of Salem and Mrs. Bankert, mother of Mrs. Bullock, were week-end visitors at the home of Mr. and Mrs. C. H. Shelton, of Canby. While here Mrs. Bankert met with a painful accident. In descending the stairway she fell and sustained a bad cut through her upper lip and was bruised about the face and head. Dr. Dedman attended her and they left for their home at Salem on Sunday evening.

MOLALLA

Mrs. A. D. Cow

Fill with RED CROWN and nothing else

Motorists who follow this rule in their gasoline buying find that they not only save money—because "Red Crown" yields more per gallon mileage—but improve the power and stamina of the motor.

"Red Crown" enables your car to develop the maximum of power that its makers built into it. It vaporizes rapidly and uniformly in the carburetor, and is consumed completely in the cylinders. Uniform wherever and whenever you buy it—hence you don't have to bother with carburetor adjustments.

Fill at the Red Crown sign—Service Stations, garages, and other dealers.
