BOTH WILD, FOR SHORT TIME

Imprisoned Cat and Kansas City Man Alike in Disposition Until Storm Calmed Down.

In Enld, Okla., according to a Kansas City man who goes there frequently, there is a collector of curiosities peculiar to the state. His line ranges from Indian moccasins to live covotes. In fact he handles anything that might appeal to the romantic impulses and purses of Easterners.

This dealer's store window recently attracted the interested attention of a portly salesman who was strolling about the town in company with the Kansas City man. With this obese traveling man to pause was to sit, The only convenient seat in this case was a box on the sidewalk in front of the store window. A piece of burlap had been spread over it.

The portly one just settled himself comfortably to enjoy the window display when his companion heard a snarling scream within the box and almost simultaneously the fat man was seen rising high in the air, propelled by his own sturdy legs. A howl from him mingled with the falsetto one which emanated from beneath the burlap.

Subsequent investigation developed that the box was really a crate containing a temperamental wildcat about to be shipped East. The animal had been seized with an impulse to test its lungs and claws at about the time the salesman placed the posterior part of his anatomy so convenlent for claw testing.

Work in Madagascar Compulsory. All idle persons in Madagascar must work or pay a tax for the privilege of living an unproductive life. As the end of the war released thousands of native troops, the colonial government has decided that something must be done to check idleness, especially as there is plenty of work for all comers. A decree just published insists that every European sound of limb must work at least 250 days a year up to the age of fifty, but natives are not compelled to work more than 180 days. Of course, anyone with a private fortune can be exempted, but that will cost 25 francs per diem for leisure. All "olsif" taxes will be used to buy agricultural machinery and tools for the development of the Island's re sources. The aged and crippled will receive a small salary to seek out evaders of the new regulation. "Oisifs" are the equivalent in French for

This is the story told by a New Orleans gentleman attending the foreign trade convention: A steamship arriving from a French port had an enterprising officer who saw a fine opportunity to profit through the dry condition of the United States. He put in a large stock of liquor, and when the vessel arrived in New Orleans had no trouble in getting in touch with purchasers. They agreed to pay on delivery.

The price was \$3,000. The liquor was passed over the ship's side in the middle of the night on to a small vessel alongside and the \$3,000 given to the officer. The next day the seller went to the bank to buy French exchanges. A few minutes later he was doing two things at one time-tearing his hair and swearing like a troop-His \$3,000 was Confederate money.-Philadelphia Public Ledger.
