Pickle Recipes

Take two dozen green peppers and extract the seeds by making a slit on the side or cutting a round piece from the stem end, making of it a little cover which can be replaced when the pepper is filled and may be held in place with a toothpick. This will keep the peppers whole.

Put a strong brine over the peppers and let them stand 24 hours, then take them from the brine and drain and soak them in clear water for a day and a night. Pour off this water, scald some vinegar into which put a small piece of alum and pour over the peppers and let them stand for three days. Prepare a stuffing of two hard heads of white cabbage chopped fine, seasoned slightly with salt and a cup of white mustard seed; mix well and stuff the peppers hard and full. Fasten on the covers, place them in a stone jar, pour over spiced vinegar scalding hot, and cover tightly.

Oatmeal Cookies

One cup of shortening, two cups of flour, two cups of rolled oats, one cup of sugar one teaspoon each of cinnamon and nutmeg, one-half teaspoon of soda one-half cup of milk, two eggs well beaten; add dry ingredients sifted first, then the raisins chopped and dredged with flour, and bake in a moderate oven 15 minutes.

OREGON INDUSTRIES

State elections are but a few days away. Whether we will have tax reduction or increasing tax burdens, rests largely with the voter. "Will it raise taxes," should be the consideration before voting for any measure. Don't kick about your tax bill if you now vote for tax raising schemes or new forms of taxation.

Hood River—Work starts on new creamery. \$85,000 bond issue authorized for construction of Dee Flat irrigation project.

Toledo—Standard Oil Co. to erect \$25,000 service station here.

Lebanon cannery has 50,000 case pack with value of \$200,000.

CRITICS AIDING DAIRY INDUSTRY

Discussion of Bovine Tuberculosis in Relation to Milk Supplies Is Big Benefit.

PRODUCTION SHOWS INCREASE

Many Towns Adopt Regulations Requiring Tuberculin Testing and Milk From Tester Herds Brings Higher Prices.

(Prepared by the United States Department of Agriculture.)

That the free and frank discussion of bovine tuberculosis in its relation to milk supplies benefits rather than injures the dairy industry is shown by observations of the United States Department of Agriculture. When the work of freeing dairy herds from tuberculosis on a wide scale was undertaken several years ago, critics advanced the belief that the slaughter of tuberculous cattle would result in a milk famine and that publicly calling attention to the disease among dairy cows would hurt the dairy business.

Increased Milk Production. The criticisms received careful consideration, but were not permitted to

interfere with the constructive program of tuberculin testing and freeing herds from the disease. The soundness of this policy is shown by the following figures: During the period July 1, 1917, to July 1, 1922, 175,000 tuberculous cows were destroyed. Instead of a milk shortage there has been a remarkable increase in both production and consumption of milk and dairy products. Last year, 1921, milk production in the United States aggregated nearly 99 billion pounds, a noteworthy gain over the previous year. Production of butterfat likewise increased. In 1921 alone, milk cows increased 341,000, which is a figure nearly twice as great as the slaughter of tuberculous cattle during the entire five year period.

People Use More Milk. Several hundred towns have issued regulations requiring tuberculin testing, and apparently with inspired faith in the safety and value of milk as a food, people are using more of it than at any time in the past. Frequent instances are reported to the Department of Agriculture in which parents place liberal milk orders with owners of tuberculin-tested herds a considerable distance away, although they could obtain milk from untested herds much more conveniently and at a lower price. Thus, in spite of various objections to the free discussion of tuberculin-testing problems, the evidence shows that the benefits outweigh the doubts and fears.

MISTAKE WITH BEEF CATTLE. Many Producers Handle Cows in Same Manner as High-Producing Dairy Animals.

The function of beef cattle is to convert cheap roughage into a product that can be utilized by man. Many men entering the business of beef production make the vital mistake of handling their beef cows in the same manner that a high-producing dairy herd is managed, and, because they fail to realize a profit, condemn the beef business generally. The same thing would happen, however, to the dairy business if dairy herds were subjected to the conditions necessary for profitable beef production. The only difference is that few dairy herds are ever placed under these conditions.

In managing a herd of beef cattle, the overhead expense in the form of labor equipment and concentrated feeds must be kept at a minimum if a substantial profit is to be realized.

A Clean, Profitable Herd of Purebred Dairy Cows.

PARAGRAPHS ABOUT TOWN

Mrs. Florence Kerr has returned to Oregon City from Redland, where she has been visiting her son.

Mr. and Mrs. Walter Taylor, of Portland, were Sunday guests of the former's parents, Mr. and Mrs. I. D. Taylor.

Pauline Pace, who is a student at O. A. C., was a visitor at the home of her parents, Mr. and Mrs. O. A. Pace, recently.

Mr. and Mrs. A. J. Owenby have had as guests, Mr. and Mrs. Otto Eckersley of Cove, Oregon. Mrs. Eckersley is a sister of Mrs. Owenby.

Mr. and Mrs. August Blum and children of Beaver Creek, were Sunday guests at the home of Mr. and Mrs. Henry Henriel at Jennings Lodge.

Mr. and Mrs. A. M. White visited Mr. and Mrs. Elmer J. Landins, also Mr. and Mrs. E. A. Bateson, at Viola, Sunday.

Mrs. Colonel Montgomery of West Linn, who was operated on for chronic appendicitis at the Oregon City hospital, last week, is improving.

Walter Reed and son, Walter, Jr., from near Corvallis, have been visiting here the past week at the home of Mr. and Mrs. A. M. White.

Mr. and Mrs. Clarence Frost of Gladstone, who have been visiting their son Harley, and family, at Cornelius, have returned home.

Mr. and Mrs. C. E. Ramsby of Tignard, were Oregon City visitors, Sunday, at the home of Mr. Ramsby's sister, Mrs. A. Nelson.

Paul Miller, for years a resident of Oregon City, but now of Gladstone, is very ill at his home on Herford street.

Mrs. L. Vierbus, formerly a resident of South Oregon City, but now of Portland, visited friends here on Friday of last week.

Mrs. Clarence Roll and son, Buddie have been visiting at the home of Mrs. Roll's parents, Mr. and Mrs. E. H. Cooper, have returned to Portland.

Mrs. Clyde Warren, who has been at the Oregon City hospital for several weeks, has improved so as to be able to be taken to her home at Mt. Pleasant.

Mr. and Mrs. Roy Woodward and daughters Helen and Hazel Jean were week-end guests of Mrs. Woodward's parents, Mr. and Mrs. E. S. Womer, at Estacada.

Mrs. C. O. T. Williams left Oregon City on Saturday morning for Bend, Oregon, where she will spend several weeks with her daughter, Mrs. Grace Lawrence, and family.

Miss Alice Glasspool, who has been visiting at the home of Mrs. H. L. Kelly and Miss Julia Haskell, has returned to her home in Portland.

On Wednesday morning of last week (two baby boys arrived at West Linn—one at the home of Mr. and Mrs. T. J. Dodge, who has been named Robert John Dodge, and another at the home of Mr. and Mrs. Edward Eckerson.

Miss Frances Shannon, who is teaching school at Welches, attended the teachers' institute, held at Oregon City last week. While here she visited her parents.

Mrs. Wallace Cole and her sister, Mrs. Kate Athey, of Portland, were in Oregon City, Sunday, attending the dedication of the new Odd Fellows' hall.

Mr. and Mrs. C. Bert Wilson, their daughter, Miss Gertrude Wilson, and sons Robert and Bruce, of Willamette, motored to Brownsville, Saturday, and spent the week-end visiting relatives.

Mrs. Nancy Pierce, who has been in Oregon City visiting her daughter, Mrs. Charles Straight, who is ill at the Oregon City hospital, has returned to her home at Astoria.

Miss Uma Johnson, who is a student at Monmouth, and her brother, Burr Johnson, who is attending O. A. C., were week-end guests of their parents, Mr. and Mrs. G. F. Johnson.

Mr. and Mrs. Ernest Ketchum and daughter, Miss Ruth, of Powell River, B. C., have returned home, after visiting Mrs. Ketchum's brother, Grant Olds, at Gladstone, for ten days.

Mr. and Mrs. Frank Shoeborn and daughters Beverly and Maurine, motored to Eldorado, Sunday, and visited the former's brother, Henry Shoeborn, and family.

Mrs. Della Vallen, a resident of Colton, came to Oregon City Monday to visit her father, W. T. Henderson, who is very ill at the home of his son, William Henderson, 10th and Taylor streets.

Miss Orena May of Canemah, who has been ill since last February with influenza, has improved so as to be able to resume her work as stenographer at the customs house in Portland.

Mr. and Mrs. C. O. Dryden, accompanied by Mr. and Mrs. G. J. Howell, motored to Portland on Sunday afternoon, where they visited at the home of Mr. and Mrs. Leroy Eaton, the latter a daughter of Mr. and Mrs. Howell.

Mrs. Jess Tidd, of Portland, was a Sunday guest at the home of Mr. and Mrs. Carl Green. Mrs. Tidd was Miss Lois Green before her marriage and is a daughter of the late Steven R. Green.

Mr. and Mrs. Charles Caulfield left Monday for Washougal, Wash., where they visited their daughter, Mrs. Wm. Woods, and family. Wallace Caulfield joined them later to accompany his father on a hunting trip.

Mr. and Mrs. Willis M. Youce and Mr. and Mrs. Archie Phillips of Oregon City, motored to Spring Water, Sunday, where they visited at the home of Mrs. N. T. Smith, an aunt of Mrs. Youce.

Mr. and Mrs. J. E. Calavan, former residents of Oregon City, were recent visitors here. Mr. Calavan was superintendent of Clackamas county schools for seven years and is now a field worker, connected with the office of the state superintendent of public instruction at Salem.

Mr. and Mrs. Howard Eccles have returned to their home in Canby, after spending three days in Oregon City, where Mr. Eccles, who is principal of the Canby school, attended the teachers' institute. While in town they visited at the home of Mrs. Harry Baxter.

BANNER THOUGHTS IN POETRY

The Poor Voter on Election Day

The proudest now is but my peer,
The highest not more high;
Today, of all the weary year,
A king of men am I.
Today, alike are great and small,
The nameless and the known;
My palace is the people's hall,
The ballot-box my throne.
Who serves today upon the list
Beside the served shall stand;
Alike the brown and wrinkled fist,
The gloved and dainty hand,
The rich is level with the poor,
The weak is strong today;
And sleekest broadcloth counts no more

Than homespun frock of gray.
Today let pomp and vain pretense
My stubborn right abide;
I set a plain man's common sense
Against the pedant's pride.
Today shall simple manhood try
The strength of gold and land;
The wide world has not wealth to buy
The power in my right hand,
While there's a grief to seek redress,
Or balance to adjust,—
Where weighs our living manhood less
Than mammon's vilest dust,—
While there's a right to need my vote,
A wrong to sweep away,
Up! clouted knee and ragged coat,
A man's a man today.
—John Greenleaf Whittier.

Soprano High "C" Without "Metallic" Suggestion

A Brunswick Achievement

The severest test of a phonograph is in reproducing "high notes," especially soprano. You have noted how most instruments vibrate and sound "metallic" when the higher notes are reached. But come in and hear a soprano record on The Brunswick. Note the clear-toned, ringing intensity of the "high notes." Then you will realize why greatest musicians have chosen The Brunswick for their own homes.

Any phonograph can play Brunswick Records

The Seiberling Cord

In producing the Seiberling Cord Tire the Seiberling tire people have endeavored to combine in a single product the best of Seiberling research and experience.

Seiberling Cords embody the best knowledge of a company, new in name, but old in the business. They have been twenty-two years in development.

- Here are some of the more important structural features of Seiberling Cords:
- 1—Side walls generous in gauge, and the same material as the tread. Seiberling tread stock, from bead to bead, minimizes curb and rut abrasion and eliminates tread separation.
 - 2—A carcass built of long staple Arizona and Egyptian cotton of the highest grade.

Tire Size	Piles	Tire Size	Price
3 1/2 inch	4	4 1/2 inch	6
4 inch	6	5 inch	8
 - 3—A bead construction well reinforced—and a wire bead which makes the full tensile strength of the wire available.
 - 4—Generous cushions, and a full breaker. An additional reinforcement of rubber, between the last two piles; to prevent ply separation, an evil in many tires.
 - 5—A semi-flat tread, which under normal load and inflation presents its whole face to the road, giving maximum wear.—A tread design which is an effective anti-skid, and easy to steer. A tread contour which makes the Seiberling Cord equally adaptable for front or rear wheel use. A tread compound which includes no reclaimed rubber.
 - 6—On Air Cure—which assures perfect union of plies and tread, and which eliminates mold pinches and buckles. A one cure process of stocks properly blended—assuring unity in the finished casing.
