HOW TO AVOID COLDS

Extremes in Heat Endanger Your Well-Being

Last Sunday we visited a sick friend. It was noticeable how hot his room was. It was heated by a wood stove. On the way home we visited a family who were gathered about a wood stove. The temperature here was oppressive. Almost 90 degrees. In order to please us they opened the window. As a result one of us has a sore throat and ever since has doctored a bad cold in the head.

This is a very common experience in thousands of homes.

Most people do not realize how dangerous to their health this haphazard mode of heating a home is. With a Gasco furnace controlled by a thermostat, the temperature in the house is kept around 70 degrees all day long. The well-being of yourself and family should decide you to enjoy the even heat of homes scientifically heated by gas.—Adv.

State Monopoly of Schools would cost—
In taxes—
Over \$1,000,000 a year for operation
Over \$3,000,000 for buildings and grounds

THE first cost of state monopoly of schools would be something over three million dollars for new buildings and grounds. We would have to pay a yearly tax of over one million dollars for operation in addition to what we are paying now.

They propose that Oregonians pay this bill for "Real Americanism." But it is not Americanism to take away the right of the parent to control the education of the child.

They propose that we pay this bill to have "Compulsory School." But we actually have compulsory school right now under the present law.

Be not deceived. What this burden of added taxes will go for is an experiment in education along communistic lines—the substitution of state monopoly in education for parental guidance. Russia is trying this experiment. Let us profit by her failure. Let us maintain our democracy and save millions of dollars.

When We Set a Trap For a Fox We Bait It With Something a Fox Likes.—Ed Howe

A crook never offers "Four per cent and no worry" such as a Savings account is, when he wants your money. Four per cent is not considered good bait. The swindler offers 25 per cent and 50 per cent, and many folks bite because they like the bait although their common sense tells them to keep away. Remember this the next time you are approached by a get-rich-quick artist.
