OREGON CITY

According to figures recently compiled one-third of the homes in this country are still without a phonograph.

In view of the fact the phonograph supplies the world's best music in its cheapest and most convenient form, this situation is almost incredible.

Can it be that one-third of the homes in this country do not want good music?

Is it possible that so many persons do not appreciate good music?

There is scarcely a musician of any note anywhere in the world who has not made phonograph records.

The variety is bewildering. The excellence unquestioned.
