MEANING OF THE WORD VEAL

Departments of Agriculture Frequently Called Upon to Decide Between Veal and Beef.

There seems to be marked variation of opinion as to what is meant by the word veal. Ordinarily, when one hears the word uttered, he thinks of the carcass or meat of a young bovine. In most cases this conception of the meaning of the word veal is sufficient and it can be dismissed from the mind without further consideration; but, when one is called upon to state just what constitutes veal, there may be some difficulty experienced in determining when a bovine carcass is or is not to be regarded as veal.

Departments of agriculture are sometimes called upon to decide whether or not a rather heavy carcass should be classified as veal or beef and the decision conforms to the conclusion of authorities on the subject, which is as follows:

Calf carcasses weighing less than 300 pounds, with comparatively lightfied as veal.
