notes, checks, drafts, etc., payable on demand.
Telegraphic exchanges sold on Portland, San
Francisco, Chicago and New York.
G. C. LATOURETTE, President.
F. & DONALDSON, Cashier.

OREGON CITY!

The County Seat of Clackamas County.

THE GREATEST MANUFACTURING CENTER IN THE WEST.

The Banner Grain Raising and Fruit Producing Region of the Northwest.

Clackamas County is well timbered and contains within its area some of the finest agricultural lands in the state. It has the advantages of both river and rail transportation. A great portion of the most desirable lands were taken up in early days by settlers who obtained large tracts through the donation land claim act. These are now being cut up into small tracts and sold on easy terms, and make very desirable fruit and vegetable farms. Now is the time to buy while lands are cheap. Wheat Raising. Clackamas county wheat carried off the first prizes at the Centennial exposition and the Oregon state fair. Oats, hay and wheat yield bountiful crops not inferior to the production of wheat. The crops never fail.

Hop Growing is becoming a profitable and important industry of Clackamas county. The hop yards of this county have so far escaped the ravages of the hop louse—so destructive in some sections. Hops are a profitable crop even at the lowest market price.

Fruits and Vegetables. Clackamas county is pre-eminently the fruit growing and vegetable producing section of the Northwest. Prunes are very profitable, and while many extensive orchards being planted there is no danger of overstocking the markets. Apples, peaches, pears, cherries, blackberries are staple products of superior quality. Potatoes and every vegetable that can be grown in a temperate climate are produced in immense quantities.

Timber, Manufacturing, Etc.—Clackamas county possesses extensive forests of the finest fir, larch, cedar, ash, maple, oak and other varieties of hard wood suitable for manufacturing purposes. There are already a number of sawmills in the county, but the industry is only in its infancy. The opportunities for lumber manufacturing and other industries are good.

Mineral Resources.—While this county has the greatest iron mines and works on the Pacific coast, its mineral resources are only in the beginning of development. Extensive deposits of the finest building stone, of which satisfactory tests have been made, are awaiting further development.

Other Advantages.—Nowhere in the Northwest can lands with such facilities for transportation and in close proximity to the markets of the world be purchased at such low rates. Clackamas county offers better inducements to the manufacturer, capitalist, and homeseeker than any section on the Pacific coast. No better field for manufacturing. The raw material exists here in abundance. The water power is practically inexhaustible.

Oregon City.—Situated at the great falls of the Willamette with 250-horse power at low water, that can all be utilized for manufacturing, it will become the great industrial center of the West. It is the only great water power situated on tide water, with all the advantages of boat and rail transportation. Woolen, excelsior, flour and several extensive pulp and paper mills, with wood-working factories are already utilizing a portion of this immense power. Yet there is room for hundreds more, who will be furnished with free sites and free water power. Oregon City is only twelve miles distant from Portland, the commercial metropolis of the Northwest, where vessels from every portion of the world anchor.

NEWS OF THE WORLD

Boiled Down For the Edification of The Enterprise Readers.

NEW ORLEANS MAFIA.

Report of the Committee of Fifty.

NEW ORLEANS, May 16.—The committee of fifty made its report to the mayor tonight. It says, in part: The first work of the committee was to obtain from the chief of police a report of the ninety-four assassinations by Italians and Sicilians, where the accused escaped for the want of evidence. Then followed the assassination of Chief of Police Hennessey. The result of the trial demonstrated to the people that no one was safe from the mysterious band that was operated re-ardless of the law. It was only when this fear grew into absolute conviction that the people rose in their might, took the laws into their hands, and then followed the event of March 14.

The report then, at length, goes on to show the existence of the Mafia, and tells of a visit made to the Italian consul to secure information. He stated he was ready to co-operate with the committee and would prepare a report containing the information in his possession. He was convinced of the existence of the Mafia in the city, and had strong suspicions as to who were the leaders. He furnished the committee with names.

THE CONSUL'S NARROW ESCAPE FROM DEATH.

He stated that prior to the Hennessey assassination, he had in some way incurred the displeasure of a coterie, composed principally of the men who met death at the Parish prison. They invited him to a supper, and although he partook only of soup, he was desperately ill, that night with symptoms of poisoning, and was satisfied his life had been attempted. The written information, he promised, however, never came. After some delay, he notified the committee that it being an extra judicial body, he did not feel warranted in giving the information. During the interview with him the committee called his attention to a published statement in a New York paper, to the effect that the mayor had appointed an extra judicial body, but its object was frustrated, owing to his (Corte's) earnest protests, and the intervention of Mr. Blaine. We reminded him that he and prominent Italian citizens had called on the committee before the mass meeting last fall, and approved of the pacific course, and asked him how he reconciled his published statement with this. He replied the statement he made in the New York Tribune were made as an individual, not as consul, and that the reporter greatly exaggerated his statement.

SUGGESTIONS BY THE COMMITTEE.

The committee in pointing out the remedies in the existing trouble, suggests the restriction of immigration, a reform in the criminal laws and the administering of criminal justice, a law recognizing the existence of the bar association, and endorsing it with full power to try and disbar any attorney whose civil practices render him unworthy of being an officer of the court.

"The only radical remedy which suggests itself to us," continues the report, "is the entire prohibition of immigration from Sicily and Lower Italy. It was found necessary to prohibit Chinese immigration, and congress passed the necessary law. The danger to California from Chinese was no greater than the danger to this state from the Sicilians and the south of Italy. They are undesirable citizens, and there is no reason why they should be permitted to participate in the blessing of the freedom and civilization, which they are not only unable to appreciate, but which they refuse to understand and accept."

Smart Ben Butler

BOSTON, May 16.—General Butler has secured a temporary release of Mrs. Charletta Johnson, his client recently sentenced to prison for perjury, and on whose account the General was ejected from the court. Mrs. Johnson retains her liberty on a writ of personal reprieve, a process so rarely employed that it is most unknown.

The Cascades Portage.

WASHINGTON, May 12.—Senator Dolph secured today the approval by the secretary of war of the location of the state portage road across the government reservation at the Cascades for a three-foot gauge road, as recommended by Major Handbury, with the understanding that if it was deemed important by the board that a road of a different gauge should be built their application for a change would be considered by the secretary. The secretary declined to authorize a wide gauge without referring the matter to Major Handbury.

AT WASHINGTON

The President Apologizes, but does not Return the Fish.

WASHINGTON, MAY 18.—The president in an interview with Representative Hermann today dwelt quite lengthily upon the reception extended to him by the people of Oregon, wherever he had an opportunity of greeting them, he especially made mention in glowing terms of the magnificent ovation on the part of the citizens of Portland. He pronounced the ceremony at the grand exposition hall there, one of the most pleasant as well as unexpected, of the many surprises of the entire journey. The concourse of people, the admirable display and perfect system observed throughout, and this on a very rainy day, made a lasting impression upon his mind. The advancement everywhere seen, as to the material progress of the state and its towns and cities was a continuous revelation. He expressed his painful regret as to his failure to meet the citizens of Eugene. He says he had no intimation that he was approaching so important a point in the state nor had any notice that the citizens there were waiting to greet him. Hearing the music as the train approached the depot, he hurriedly arose and prepared to appear, when the train moved on. Though it was an early hour, yet he says that would not have deterred him. This mishap and that at Oakland, in California, he says were the only exceptions to the perfect success and excellent management during the long journey.

The president stated today that he would not appoint any of the new circuit judges until the meeting of the senate in December. The supreme judges will meet with the present circuit courts, under the new law which requires that organization, the third Monday in June.

That the Italian government is endeavoring to check the tide of immigration to the United States is shown by the issuance of a circular by the Italian minister of the interior to the protect of the kingdom for the restriction of such immigration so far as minors are concerned.

From Behring Strait.

SEATTLE, May 18.—The revenue cutter Bear arrived here today, after a month's cruise to Sitka, Ounalaska, and Behring sea. Among those on board was Louis H. Tarpley, formerly of Salem, United States commissioner at Ounalaska, who made the cruise for the purpose of securing witnesses in the murder cases to be tried at Sitka. Commissioner Tarpley is accompanied by his bride, to whom he was married at Sitka on May 12th. She was Miss Bessie Bugby, daughter of Hon. John S. Bugby, of San Francisco, now United States district judge for the territory of Alaska. Captain Healy says the schooners Premier and Dashing Wave were lost about the Shumagin Islands in April. He brought down ten of the Premier's crew. The Bear will now coal and take on board other supplies, and probably will be ready to sail for Behring sea about June to join the Rush.

Hope For Consumptives.

PARIS, May 16.—Professor Bernheim has submitted his reports to the academy of medicine regarding the experiment made to cure tuberculosis by transfusion of goats' blood. The professor in his report says that fourteen patients have been treated by this system, and that two of them were in the last stage of consumption. Ten of the number suffering from tuberculosis, the report adds, have been greatly improved under the new treatment, and the last two of the fourteen patients, both of them in an advanced stage of consumption, died six weeks after receiving the first transfusion. Bernheim declares that the treatment has an important effect in the early stage of consumption, but says it should not be used in the last stages.

Corvallis Election.

CORVALLIS, May 18.—The first city election under the new charter took place today. The following named officers were elected: Mayor, John Buffett; treasurer, S. Mitchem; councilman, J. R. Bryson, J. O. Wilson, B. R. Job, and Thos Elgin. The men elected are heartily in favor of the improvements provided for in the new charter, and our citizens are sure of a liberal and progressive administration of public affairs.

Abseonding Mayor.

SEATTLE, May 18.—O. B. Wilson, ex-mayor of Great Bend, Kansas, who is wanted there on a charge of embezzlement of \$40,000, was arrested here today by Sheriff Woolery. He had been here since last Tuesday and had been under surveillance for three days. He is perhaps 40 years of age and appears to be slightly pasted, but shows evidence of recent trouble and exposure. Wilson refused to say anything of his case.

The War in Chile.

NEW YORK, May 18.—Letters and papers received by the last mail from South America contains interesting facts concerning the trouble in Chile. There seems to be a probability of immediate ending of the war. Balmaceda's army is said to consist at present of 30,000 men. Chilean soldiers are being driven into foreign territory.

SAN FRANCISCO, May 18.—For the past few months, H. Francis, who represents a syndicate of English capitalists, has been endeavoring to persuade the canners of this state to combine. As a result of his labors, California fruit cannery companies have incorporated with a capital stock of two million dollars. The new company comprises about two-thirds of the canneries in the state.

SEATTLE, May 19.—A special to the Post-Intelligencer from Franklin mines says that everything is quiet there, though the dead-line, guarded by Pinkertons, is maintained. White miners are shown signs of yielding. Several families left town today, selling their shanties, which were built on the company's property, to the company, which puts negroes in possession at once. An increased force of negroes was put to work this morning, and more will be put in tomorrow. A party of white miners went to the house of J. L. Fry, white engineer of the hoisting engine, who refused to quit work, and assailed his wife verbally, so that she had to take refuge with her husband in the engine house. At New Castle, another coal camp of the Oregon Improvement company, feeling runs high, because a few men have stayed at work at the pumps and engines. Between twenty and thirty shots were fired at a special train at 9:30 last night, while it was making the run from Coal creek to New Castle, a distance of two miles. Sheriff Woolery and Deputy McDonald were on the engine and several bullets whistled past their faces, but no one was hit.

Notes of Strikes.

Because of lack of orders, the nail mills of Kelly county and the Bellfont nail mills have shut down at Ironton, O. Day laborers on the Western Minnesota railway docks at West Superior, Wis., struck for advance of wages. It is probable that the street laborers will strike next week.

The strike begun thirteen months ago by 2000 miners of the Pennsylvania and West Moreland Gas and Coal Company's were declared off yesterday, and those of the strikers who remained at Irwin will return to work at the operator's terms.

The green glass works assembly, of the Pittsburg district, has decided to withdraw from the Knights of Labor and affiliate with the American Federation of Labor. Assemblies at Alton, Ill., and St. Louis have expressed their willingness to join the movement.

TELEGRAPHIC BRIEFS.

The public executioner of Germany has applied for an increase of salary.

In an attack by Arnauts on the village of Sevice five persons were killed and many wounded.

The state of Blaine's health continues to attract attention in the newspaper press of Great Britain.

Hundreds of Hebrews fleeing from persecution in Corfu are arriving at Brindisi, where they expect to take passage for Alexandria. They propose to settle in Egypt.

The ghetto quarter of Corfu is still surrounded by military for protection of Jews. The total number of victims at Corfu nets fifteen killed and twenty-five who died from privation.

Russia has made a contract with the Chatterland arms factory by which the plant of the factory and its employees are at the absolute disposal of Russia, who gave orders for 3,000,000 new rifles.

According to the Buenos Ayres Standard, indications point to the election of General Mitre as president of the Argentine Republic. He is considered to be the best available man for the position.

The Posen authorities have applied to the government for instructions as to what to do with the multitude of immigrants thronging across the frontier from Russia, most of them in an utterly destitute condition.

Swarms of young locusts are appearing in Upper Egypt. The government is issuing instructions as to the best means of coping with the plague and preventing the utter destruction of the cotton and maize crops.

Owing to the opposition in England to Russian and Polish immigration, the immigrants who have heretofore gone to London and been assisted thence to America, will hereafter go from Hamburg to the United States direct.

Trade in Moscow is at a standstill. Letters received in Berlin state that the German colony in that city is being subjected in many annoyances by the Russian authorities, owing to the pronounced sympathy of many of its members with the Jews.

Packlen's Arnica Salve.

The Best Salve in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains, Corns, and all Skin Eruptions, and positively cures Piles, or no pay required.
