

THE ENTERPRISE.

CHAS. RESERVE, Publisher and Proprietor.

FRIDAY, JULY 24, 1891.

It is an indisputable fact that Oregon City has more visitors than any other city in the state outside of Portland. Tourists coming to Portland often take a run on the boats and take a look at Oregon City, the falls, rocky cliffs, mills and factories. It is of the utmost importance that visitors to this city should leave with favorable impressions, and, while the residents of Oregon City are progressive and enterprising, that portion of the city along Main street does not have the presentable appearance it should. It only needs some one to start the ball rolling to have the desired improvements. Every visitor to Oregon City gazes admiringly at the Falls, free suspension bridge, immense factories and mills, and judges of the prosperity and enterprise of the city from the appearance of Main street. Very few of the hundreds of visitors ever see the principal residence portion of the city on the bluff. Their impressions of the city are received from the appearance of the principal thoroughfare. People owning property on Main street are willing to see it improved. If property were kept in a cleanly condition, would not only increase the value of property, but be valuable as a drawing card to attract people who have capital to invest. A city containing the wealth and population of Oregon City ought at least, afford one paved street. Main street as it exists at present, is an actual disgrace to the city, a fact that every property holder will acknowledge. While it is of much importance that Seventh and other streets should be improved, it is time Main street is receiving the attention that it properly deserves, as the grade has already been established.

Some startling revelations are made in the portion of the census tables which refers to the lumber trade. The bulk of the lumber of commerce—which is chiefly of white pine—has up to this time been derived from the three states of Michigan, Wisconsin and Minnesota. In the year 1880 the mills in these states turned out about 2,500,000,000 feet of lumber, the bulk of which went into the lumber trade. Careful surveys of the amount of white pine in Michigan and Wisconsin show that the white pine markets estimated the rate of consumption, the whole remaining supply is only sufficient to last six years. In other words that in 1891 the white pine forests will be exhausted. To prepare for a coming deficiency the great lumbermen of the Northwestern states have been buying timber land in California, Oregon, Washington and the Southern States, which have not yet suffered severely from the ax. An area amounting roughly to 3,800,000 acres has thus been secured, and it is reckoned that it will yield about 40,000,000,000 feet of fir, redwood, yellow pine, cypress, poplar and other woods. At the present rate of consumption this would supply the market for five years more. But at the expiration of eleven years, say in 1902, the forest of the whole country would be exhausted.—S. F. Call.

Some of the great projects of the Oregon State Fair are now in progress. The agricultural department has been made to make it superior in every respect to any other fair held by the association under the present management. The agricultural department, which has been made to make it superior in every respect to any other fair held by the association under the present management. The agricultural department, which has been made to make it superior in every respect to any other fair held by the association under the present management.

The prospects for a good State Fair were never so flattering as they are this year. The Premium List has been revised, and in many important points the prizes have been increased. The entries in the Speed Department are the largest and the best in the history of the fair. The State Fair is under the management of the State Board of Agriculture, and over \$15,000 in cash is offered in premiums for exhibits of stock, poultry, agricultural products, fruit, etc., works of art and fancy work, and for trials of skill. The board is making every preparation with a great success. Many valuable improvements have been made, and the grounds have been cleared up and greatly beautified. Electric and horse-car lines now run from Salem to the grounds. All persons wishing a premium list for the fair of 1891, can obtain it by addressing J. T. Gregg, the secretary, at Portland, Oregon, or Geo. W. Watt, assistant secretary, at Salem. The fair begins on the 14th of September, and will last one week. Send for a premium list and prepare something for exhibition this year.

A Real Summer Danger. To talk of guarding against cold in summer seems absurd, and yet it is necessary as in winter, writes Elizabeth R. Scovil in The Ladies' Home Journal. Where the climate is changeable, a hot day is often followed by a cool evening, or a sudden rain storm chills the air, or a cold wind springs up, grateful after the heat, but dangerous to those thinly clad unless they are protected from it by proper covering. Cotton is a good conductor of heat and allows it to escape rapidly from the surface of the body. As soon as the surrounding air becomes cooler than the skin it steals the heat which the body requires for its own needs. A fresh supply of heat must be produced, and this the system is overtaxed to supply the demands of the summer. Flannel is a bad conductor and guards the tender body more faithfully, retaining the heat.

The prospect for a free bridge at Portland begins to look exceedingly gloomy. It is a shame and disgrace that the municipality of Oregon, a city of 80,000 population cannot have a free bridge. In this respect Portland is far behind the municipalities of other cities. A free bridge for the past three years, fifteen to twenty of a free, efficient and characteristic enterprise should be established out by the city. It should not be behind the municipalities of other cities. A free bridge for the past three years, fifteen to twenty of a free, efficient and characteristic enterprise should be established out by the city. It should not be behind the municipalities of other cities.

The teacher's survival institute is proving a decided success. Seventy-five teachers are enrolled, and Clackamas county is well represented. Superintendent Thomson secured such able advocates as Prof. Fisher and Burbank to conduct the training methods, whose presence alone assured the success of the undertaking. The teachers will derive much benefit from the training received here, that will alike prove of advantage to themselves as well as their pupils. This work is for the benefit of the public and should be appreciated. The teachers are unselfishly devoting their time to this cause, and have already organized a county teachers' association, that will be productive of the best results.

The twenty-four civilian candidates for appointment as second lieutenants in the army find they have taken no easy task, and the successful ones may fairly reach the conclusion that they have earned their commissions. As a preliminary precaution, the medical officers were directed that they could not be too rigid in the performance of their duties, as it was essential that men of only the best physical type should receive these commissions.

Governor Campbell, of Ohio, says he is confident of reelection, and states the farmers alliance are hand-in-hand with the democrats. How does this set on the stomachs of the republicans of Oregon. There may be some truth in the report that prominent democrats are pushing the alliance movement with the ultimate expectation of carrying Oregon by means of a fusion ticket.

In Oakland, California, many girls are working in fruit canneries at the wretched sum of \$1.50 per week; less than twenty cents a day. No wonder Oregon canneries cannot be conducted at a profit, when they are compelled to compete with California institutions, that pay their help a mere pittance. The California press are making an attack of this low wages system.

Mrs. Langtry has received \$100,000 as damages for being knocked down by one of her English admirers. A good many women have been knocked down and received a much less sum than this, but the redoubtable actress has a penchant for money making and evidently considers this the most taking role she has appeared in for some time.

The Astorian compliments a new journal of Eugene in this city. "The Advance" is the name of a new paper in Eugene. Typographically it is neat; its success depends upon the amount of ignorance in Oregon. The more mental density it finds in the state the greater its success.

The Enterprise tenders the teachers of Clackamas county a column for an educational department, in which they can express their views and suggestions. This column can be appropriated to their own use for the general discussion of educational matters, and can be made interesting and instructive.

Save the Portland Evening Telegram. Twice every summer a great many city people feel the need of rest. One is just before they take their vacation to the seashore or summer resort, and the other is just after they get back. The first time the need may be imaginary, but it is generally genuine on the other occasion.

The Bay View Tribune claims the originality of the article recently published in the Oregonian about the superior qualities of hemlock lumber. Hemlock timber is now being used at the paper mills of this city, for which purpose it is admirably adapted.

Water has become of the sewerage solution? It is still in the hands of the health and police committees? There are places along the river front that emit an odor like unto daisies or roses, but it is a different kind of a smell, however.

The Oregon State Fair. The prospects for a good State Fair were never so flattering as they are this year. The Premium List has been revised, and in many important points the prizes have been increased. The entries in the Speed Department are the largest and the best in the history of the fair. The State Fair is under the management of the State Board of Agriculture, and over \$15,000 in cash is offered in premiums for exhibits of stock, poultry, agricultural products, fruit, etc., works of art and fancy work, and for trials of skill. The board is making every preparation with a great success. Many valuable improvements have been made, and the grounds have been cleared up and greatly beautified. Send for a premium list and prepare something for exhibition this year.

RAINY weather generally will disperse with interest the fruit-sharing suggestion of President Parker of the St. Louis, Anson and Terre Haute line. His idea is, when circumstances permit it, to divide the surplus earnings between labor and capital on an equitable basis, each owner and employee to share a share of the surplus net earnings in proportion to his salary or wages. He maintains the immediate influence of this would be to make the men directly interested in the financial result of the year's operations, and superintendence corresponding care and diligence.

The democrats of Kansas made a proposition to the farmers' alliance to fuse on county elections this year, but the people's party leaders rejected the proposition, and declared that they would not fuse with any party this year or next, and that no member of the new party would be countenanced who would advocate such action. This has created indignation among the leading democrats, who threw to the people a party sufficient votes last year to defeat Ingalls. In all of the counties of Kansas this year the democrats will put up tickets, and this break will prevent the democratic alliance fusion on a presidential ticket, which was expected.

The prospect for a free bridge at Portland begins to look exceedingly gloomy. It is a shame and disgrace that the municipality of Oregon, a city of 80,000 population cannot have a free bridge. In this respect Portland is far behind the municipalities of other cities. NEWS FROM BARLOWS.

GRAND RAILROAD RALLY.

Sudden Death of Mrs. Charles Waite.

ANOTHER PIONEER AT REST.

Deas Outclassed—Fouled in the Fifth Round—Other Notes of Interest.

RAILROAD MEETING AT MARQUAM.—Notwithstanding the busy season of haying and harvesting there were present quite a large crowd of influential farmers at the meeting held at Marquam on Thursday, and all took an active interest in the proposed railroad. Mr. D. W. Smith of Port Townsend, who is the representative of the capital to build the road made a lengthy speech explaining what was necessary to be done to accomplish the end. The main point was that of subsidies and right of way that would be inducement to capitalists to take hold of it. After many prominent farmers had spoken a motion was made by Mr. W. W. Jesse, of Barlows, asking the chairman, Mr. P. J. Ridings, to appoint a committee who would appoint a working committee for the purpose of obtaining subscriptions and right of way. Ten names were presented as follows: P. J. Ridings, R. H. Scott, T. J. Souls E. M. Hartman, Silas Wright, Wm. Vaughn, Wm. Barlow, W. W. Trwin, Oliver Robbins and T. C. Perry. On motion the names were accepted and requested to report at the next meeting which will be held at Molalla on next Saturday, July 25. Great interest was manifested by all who were present and the writer wishes to congratulate the farmers and merchants of Marquams for the interest taken. Do not miss your opportunity now as you have a chance of getting a railroad. Show your liberality and work hard to consummate the end. Your correspondent looks forward to a big and enthusiastic meeting at the Molalla Corners next Saturday. Let there be a big turnout.

ANOTHER PIONEER AT REST.—Samuel J. Oakley died at the residence of Wm. Barlow, on Wednesday, July 15, 1891, aged 80 years, 7 months, and 19 days. Mr. Oakley came to Oregon April 29, 1851, in company with Samuel R. Thurston, Gov. R. L. Moody, Mrs. Gov. Gaines, and several other notable young women who became the pioneer teachers of Oregon. During Mr. Thurston's illness on board a steamer from Panama to San Francisco, Mr. Oakley volunteered to act as nurse for him and so endeared himself to the Senator and his family that a bond of friendship was established between them which was never broken. On his death bed Senator Thurston took from his finger a valuable diamond ring and gave to his faithful friend and nurse.

In 1852, Mr. Oakley took up land near Barlows, on which he built a simple frame house where he has spent nearly 40 years of quiet and happy years. He lived a simple and regular life, making visits to Astoria and his neighboring friends, where he was always a welcome guest. He visited his old home in Brookfield, N. Y., last winter, where he had contracted a cold from which he never fully recovered. Fearing sickness in the summer he returned to Oregon where he said it was more pleasant for him to die. He was buried by the Astoria land, whose members had known and loved "Uncle Sam" since their childhood. A beautiful funeral home and the expressive "Home, Sweet Home" descended the sound of "Dust to dust, earth to earth."

Mr. Oakley was a strict moralist, and always maintained a reputation of right versus wrong. He accepted no dogmas, creed or code, but such was his honesty and integrity that no man could say aught against his life's conduct. He was universally esteemed in his neighborhood. Over one hundred paid their last respects at his grave, and though bound to none by the ties of blood, yet he had endeared himself so much to all who knew him that all paid him a tribute more loving than if he were a king.

FROM YALE COLLEGE.—Mr. Eugene Hedges, of Oregon City, visited Mr. Barlow and family this week. He has recently returned from Yale college where he has been studying law for the past four years. Mr. Hedges is a well made man in every respect, and we bespeak for him a bright and prosperous future.

OVERLOOKED.—The contest at Oregon City Saturday evening between Jas. Deas and J. S. Clark was decidedly a one-sided affair as Clark was fully twenty pounds the heavier. At the end of the fifth round a foul was made by Deas which ended the contest. We hope to see James challenge somebody near his weight the next time.

AN EXHIBITION.—An interesting exhibition was given by Peter Sampson which displayed great strength both in arms and back, breaking chains and wire that eight men were unable to break.

RETURNED FROM CALIFORNIA.—Miss Lillian Bray, of Seattle, has just returned from California and is now visiting Miss Mollie Barlow. She expects to return to Seattle in a few days.

LAND PURCHASE.—Mr. D. Parmenter, of Canby purchased 40 acres of the Wm. Barlow lower place this week and will build a home thereon in a short time.

NEW YORK VISITOR.—Mr. J. H. McMoragie, of New York, spent a few days this week with Cass W. Barlow and Percy G. Clune. Mr. McMoragie left Tuesday for Australia where he will spend the winter.

SUBURBAN RESIDENCE.—Mr. T. A. Anderson, the live speculator of Portland, was in our town this week, looking for a suburban home. He was much pleased with Barlows and will bring his wife next week to select a site for their home.

HEALTHY CONDUCT.—The hum of the binder can be heard on every side to remind us that harvest is again here. We are pleased to report a large yield all through this section. With the indications for good prices, a prosperous year may be looked forward to.

MONK INNOVATIONS.—In front of the residence of Mr. Wm. Barlow in the circle is being put in, a very handsome fountain. It will add greatly to the appearance of the large lawn and be a refreshing acquisition to the place.

HEALTHY CONDUCT.—The hum of the binder can be heard on every side to remind us that harvest is again here. We are pleased to report a large yield all through this section. With the indications for good prices, a prosperous year may be looked forward to.

HABIGHORST & CONANT. 151 Front Street. HARDWARE. Portland, Oregon. Northwestern Agents for ATKINS SAWS. Dexter—Diamond—Lanes—Oxbelt—Tullahoma—Dealer Lanes—Silver Steel Saws. Crescent Wedges (warranted.) B & S Proof Chains. Arcade Files. Rope. Crescent Saws. Loggers and Wood Choppers Specialties. WILSON & CO. Oregon City Agent.

WILHOIT SPRINGS.—Almost every day can be seen vehicles enroute to the Wilhoit Springs. Should the warm weather continue for a week or so a large crowd will be sojourning there.

SAD NEWS.—Mrs. Chas. Waite, of Portland, while visiting at her father's home, Mr. Samuel Mark's, retired Saturday night apparently well. In the morning when called to breakfast and on examination they were horrified to find she was dead. We learn she died of spasms of the heart. She was a bright young woman of thirty-one years and leaves a husband and three young children to mourn the loss. She was laid away in the Canby cemetery. A large attendance paid their last sad respects at the grave of the beloved one. NETTIE.

Be Your Own Master. Few people appreciate how much their impressions, their whims and impulses, and in fact all their mental energy depends on the harmonious action of all the vital organs. A poorly digested dinner may make one quarrel with a friend, a congested liver may bring imaginary gloom and trouble into the sunniest day. A rheumatic pain may keep you from business or work and entirely change some marked out policy. A few doses of Moore's Revealed Remedy will give tone to every function and make you enjoy your friends and all work.

NEW TODAY. Notice. TO ALL WHOM IT MAY CONCERN, MY wife Annie Lewis having left me without cause, I will hereafter not be responsible for any debts contracted by her. THOS. DAVIS, Oregon City, July 22, 1891.

W. S. MAPLE. In rear of Pope's hardware store. BLACKSMITHING and REPAIRING. Of every description on short notice. HORSE-SHOING, A SPECIALTY.

Notice of Final Settlement. IN THE MATTER OF THE ESTATE OF J. J. HARRIS, deceased. Notice is hereby given that I have filed for final report as executor of said estate in the County Court of Clatsop county, and State of Oregon, and the court has appointed September 15th, A. D. 1891, for hearing objections in said report. It may therefore be and is a settlement of said estate. FRANK BIRD, Executor of said estate. G. E. Hayes, atty for executor. 2117.

If you want THE BEST, buy ALLEN'S NORTHERN GROWN SEEDS.
