California Express (through)	7:01 p. m.

FRIDAY, DECEMBER 18, 1901.

TRIAL SUBSCRIPTIONS.—The Enterprise will be sent on trial for two months for twenty-five cents. Send in a trial subscription and if you do not get your money's worth the two bits will be refunded to you. The paper will be shipped promptly at the expiration of the trial period if it is not desired longer.

THE BOARD OF TRADE.—At the regular monthly meeting of the board of trade last Monday night the chief matter discussed was the road question. In the absence of the chairman of the committee Surveyor Sidney Smyth made a verbal report of the result of his investigations recommending as the most favorable route the present Highland road in the main. The route outlined by him leaves the present Highland road at Springer hill and bears to the west of the present highway about fifteen chains, thence passes southerly to the Jeffs May place, thence down the canyon to Buckner creek, thence down that to Milk creek crossing at the junction of the two streams and intersecting the present Molalla road in the vicinity of the garage hall. This route would involve building but about three miles of new road, Mr. Smith said, and there would be no grade to speak of on it. Mr. Vaughn of Molalla was present at the meeting and upon being invited to express his opinion on the road question he said that a good road could not be made on the Howard hill but that he thought the old road the best route the remainder of the distance. The expense of building a wholly new road he presumed would be greater than the taxpayers would bear. He thought the present road could be planked as cheaply as a new one could be prepared for planking. C. D. Latourette said everything else had been tried and failed and he was in favor of a good plank road. Mr. Ramsby, of Molalla, raised the objection that planks would not do on hills—teams could not get a footing in frosty weather to draw loads. Judge Meldrum dropped in to the meeting and was called upon for his opinion of the road matter. In speaking on the subject he said no one ought to feel very bad about throwing away what had been done on the present road for most of the trees and stumps that grew in the roadway were still there. These should be gotten rid of. To let air and sunlight upon the roads and properly drain them would vastly improve the roads as they are. He was not in favor of a plank road as a general thing but didn't know but planks were the best material that could be provided for this road. It would cost \$3000 to \$5000 per mile to get a new road properly planked. But he thought an accurate survey of the different routes should be made, not merely a cursory examination, and then there would be something tangible to work upon. Upon the conclusion of the discussion the matter was left in the hands of the committee to continue the work.

ADDITIONAL COUNSEL EMPLOYED.—Upon the filing of the petition for an injunction against the selling of the property for the Seventh street assessment last Monday a special meeting of the council was called. Upon the convening of the council in the evening all the members were present except Councilman Charman. The fact of the filing of the petition was stated and a motion made by Noble that District Attorney McBride be retained to assist in looking after the city's interests in the matter. The proposition was carried, Latourette being excused from voting. As an additional means of protecting the city in the controversy a committee consisting of O'Connell, Randall and Porter was appointed to employ additional counsel if necessary to assist in getting the city's defense into shape. Latourette opened this alleging that the employment of additional counsel would only be an expense and useless expense upon the city. Upon the conclusion of this business there was some informal discussion regarding the ownership of the strip of land along the river bank and then an adjournment was taken.

WEST SIDE SCHOOL CLOSED.—The school in West Oregon City closed last Friday for the winter vacation which lasts till spring. This term of school made thirty-two months. S. A. D. Gurley has taught in that district and he has been very successful in his work. The enrollment for the term just closed was 108, which was much greater than ever before in that school. Miss Grace Baird, now in the Oregon City school, was the first assistant teacher on the west side and Miss Tacy Wilkinson, also now teaching on the east side, succeeded her. Miss Anna Hicenbotham was the assistant teacher for the last two months.

ARRESTED AS AN ACCOMPLICE.—Frank Kellogg, of Elyville, was arrested Wednesday morning on complaint of Fred Ely and charged with being an accomplice of Ray Fischer in robbing Mr. Ely's safe, for which young Fischer was bound over to the grand jury in the sum of \$250 about two weeks ago. It appears that Kellogg understood the lock to the safe sufficiently to open it as the lock was kept during the day and that he turned the dial and opened the safe for the Fisher boy to get the money that was taken. Upon examination Wednesday afternoon Kellogg was bound over to the grand jury in the sum of \$350.

MADE AN ASSIGNMENT.—J. P. Logan, the Union Mills miller, made an assignment last Monday to T. F. Ryan for the benefit of his creditors. Mr. Logan leased the flouring mill of the owner, G. T. Trullinger, who on December 5, levied an attachment on Logan's grain, flour etc., held there, for a claim of \$500, \$195 of which was for rent due, \$250 for wheat and \$55 for an assigned labor claim. On account of that attachment Mr. Logan assigned to Mr. Ryan Monday. The schedule of assets and liabilities shows the former to aggregate about \$800 and the latter about \$1100. The mill is now being run by Mr. Trullinger.

SOME BIG POTATOES.—John Githens, a farmer residing near Highland, comes to the front with the best potato specimens of the season. He brought to the Enterprise office this week a tuber twelve and a half inches long and eleven inches in circumference that weighed just three pounds and said he had fifty bushels of potatoes of the same size. One of his potatoes had several branches to it

and in digging it was broken into two or three pieces, which together weighed ten pounds. Mr. Githens's potatoes are of the late rose variety which he will match against the world for quantity and quality of yield.

NARROW ESCAPES FROM DROWNING.—Captain Bass Miller was working about a raft of logs some distance above the falls one day last week when he slipped and fell in the river and was carried under the logs. However, he managed to get out into the open water, and swimming down the river and toward the shore, he caught a bush and finally was rescued from his perilous situation. A few days ago Harry Spencer was crossing the river in a small boat a short distance above the falls. He had one broken oar which made his progress so slow that the strong current nearly swept him over the cataract. The exertion to avert the impending destruction was so great that he was laid up two or three days by reason of the excitement and exhaustion.

THE LATONA REBUILDING.—The Oregon City Transportation company's steamer Latona is on the ways in Johnson & Olsen's shipyard at the foot of Jefferson street, Portland, and is being rebuilt. She is being sawed in two amidships and about twelve feet will be added to her length making her 102 feet long. A new cabin will be put on her so that she will be much like her sister steamer, Altosa. The new opera chairs for seating the cabin have already been ordered and when the boat is put back in the water she will be one of the finest equipped passenger steamers on the river. She will be nearly as large as the Altosa. It is not yet determined whether she will be renamed. The boat will be on the ways about six weeks during which time the Manzanillo has her run.

UP RIVER NAVIGATION.—The steamer Hoag came down from Corvallis yesterday with a load of merchandise, including 26,270 pounds of sugar for Salem. After discharging her cargo the Hoag went on to Portland. The Bently arrived from Portland last night on her way to Corvallis with nine tons of freight for merchants here. The Three Sisters is working between Salem and Independence, carrying wheat. The river registered ten feet and a half yesterday afternoon. Sunday night the water rose four inches, but it was about at a standstill yesterday. The approaches to the Oregon Pacific wharf-boat were being put back yesterday into their former position, so they can be used for the present.

TO PUSH THE ROAD MATTER.—The board of trade committee having the Molalla-Marquam road matter in charge went out Thursday to personally inspect the different routes for locating the road. Upon their return a special meeting of the board will be held and the matter of the location definitely determined so that the other preliminary work may proceed, for it is realized that there is no time to be lost in getting the work started. The petition for the road must be brought before the county court at its February term.

WATER WORKS TO GREEN POINT.—Residents in the Green Point district have laid a water main to connect with the city water works system near Broughton's saw mill and are having the benefit of the water service. The city is at no expense in the matter. It was assured \$8 50 a month revenue before the Green Point service was permitted to connect with the city main and there are now fourteen consumers on the Green Point main outside the city limits. Every consumer added adds to the water works revenue.

IMPROVEMENT AT THE LOCKS.—The Willamette Falls Electric company is constructing a reinforcing flume around the guard locks across the river in order that the water drawn from the canal for power purposes may not in any manner interfere with navigation. It will consist of a flume twenty feet wide, five feet deep and nearly 300 feet long. It will take several weeks to construct the improvement which will cost about \$2500.

VISITORS WELCOME.—We are now fully prepared to meet the demands of the season, and assure the public that visitors will be cordially welcome. Whether you wish to purchase or not we shall be glad to entertain you with our charming exhibition of Diamonds, Watches, Jewelry, Clocks, Silverware, etc.

A HOLIDAY GREETING.—Mrs. Prier returns thanks to her friends for past favors, and asks her to call and see her new stock of Christmas goods as she has quite a variety on hand this year at the old established Candy Store.

MILK COW WANTED.—A first class milk cow with young calf is wanted. Address with description of and price. HIRSH ANTHONY, New Era, Or.
