The society adjourned to meet Sunday, June 27, at 4 o'clock p. m.

#### THE FROG POND NEWS.

The Condition of Farm Crops and Fruits—Personal and other Notes of the Section.

FROG POND, June 20.—The weather is nice and cool but it is a poor time to make hay. The clover hay crop around here is extremely heavy this year and needs cutting badly. Fall wheat does not look very promising as it is dying out in spots and will not make as heavy a crop as usual. Too much wet weather has been the cause of it. Apples and pears are nearly a failure this season. I think it will be the shortest crop we have had for years. Cherries are getting ripe but are not very plentiful.

Mrs. Barnes has her new house nearly completed. She had a house warming Saturday night in the shape of a dance; had a nice crowd and good time.

A Pure Cream Tartar Powder

ROYAL. Contains Ammonia.

TAYLOR'S ONE SPOON. Contains Alum and Ammonia.

Dr. Price gives larger and fuller cans than that of any other Baking Powder manufacturer.

Above cut represents the comparative size of one pound cans of "Dr. Price's," "Royal" and "Taylor's One Spoon." These cans set side by side, then photographed down in exact proportions admit the plate in this space. Ask your grocer to set a one pound can of any other brand alongside 1 lb. Dr. Price's Cream Baking Powder, and observe the difference, as illustrated above.

Adulterated powders may usually be detected by their heavy bulk, as shown by the small cans, and these scantily filled, of containing a circular to help fill out the cans. It is a singular fact that many of the ammonia and alum baking powders are advertised as "Absolutely Pure." All official examinations prove that it is not safe to reject all powders labeled absolutely pure.

The economy in using Dr. Price's Cream Baking Powder does not consist alone in the fact that much larger and fuller cans are given, but Dr. Price's is a stronger, purer and more wholesome baking powder than any other known. Does better work, and goes farther, hence more economical in every way.

What woman would use an ammonia or alum baking powder she knew it? Such powders not only undermine the health, but ammonia gives to the complexion a sallow and blotched appearance.

Dr. Price's Cream Baking Powder is reported by authorities as free from ammonia, alum, lime, or any other adulterant. The purity of this ideal powder has never been questioned.

Refuse all substitutes. They conceal either ammonia or alum
