

CLACKAMAS COUNTY

THE ENTERPRISE CORRESPONDENTS SWEEP THE FIELD.

STAFFORD, Nov. 9.—Election day is over. There were forty-seven republicans, forty democrats and ten people's party votes in (his (Tualatin) precinct.

Honry Probase has put in an order at the Baby mill for the timbers for a barn 44x58x10. Stafford is noted for large barns. Frank Pitman who was hurt by a log ten days ago is able to be around again.

Geo. Saum is having his mill yard graded. Mr. Saum is a ruster. He started in as a poor man with an old upright saw, and was faced by difficulty from all sides, his dam being repeatedly washed away, and friends deserting him; but facing all his failures he is now the owner of a large mill which does a paying business and he is on the road to earthly prosperity and happiness.

Agricultural College.

CORVALLIS, Nov. 15.—Prof. John M. Bloss, late of Topeka, Kansas, assumed his duties as president of the agricultural college with the opening of the fall term, and the school is already feeling the beneficent effect of his wise direction. New studies have been added and new systems adopted which greatly enhance the quality of work done.

There was recently organized a reporting department having for its object the sending to each county such news concerning the school as will be interesting to that section. A Clackamas county student is to write occasionally for the ENTERPRISE.

There are now 247 students enrolled for the fall term, every county in the state except four being represented. There are nine attending from Clackamas county, five of whom have appointments from the county entitling them to free tuition. Three of these, Miss Orla Robbins of Mulalia, S. L. Cayto of Carus, and Lester M. Leland of Oregon City, have entered the printing department.

H. A. Andrews and Miss Emma Lawrence, of Oregon City, will graduate at the end of the school year.

A bulletin issued by the botanist is being mailed free to those residing in the state who wish it.

On election day the students were accorded the privilege of voting for their favorite candidate. In regular style the boys and girls passed before the judges and clerks to deposit their ballots. The count stood, Harrison 100, Cleveland 35, Weaver 8, Bidwell 6.

Literary work is now made obligatory on all students.

Four societies have been organized and are to compete for a prize offered by the president of the college.

The origin of the fire is not known but is supposed to have caught from the engine. The loss is about \$5000. No insurance.

Following the literary exercises an adjournment was taken to the church parlors where a profusion of chrysanthemums of all shades and varieties were tastily arranged, making with the golden pumpkins an elaborate and handsome display. Owing to the late storms which threshed many gardens into tangled masses, the exhibit was a surprise and exceedingly attractive, there being not less than 100 varieties shown. The judges had much difficulty in awarding the prizes owing to the many fine exhibits. Their decision was as follows:

Chrysanthemums—First prize, case and picture Miss Louise Andrews; second prize, swing with doll, Miss Dorothy Chase; third prize, chrysanthemum pillow, sixty-five varieties, Mrs. S. B. Calif, diminutive display, Emory Noble, twenty-five cents. Pumpkins—Best exhibit, W. E. Johnson, \$1; Smallest pumpkin, Metta Finley, 25 cents.

Bought a Mine.

The Oregonian of Monday reports the buying of a mine in Lower California by the Oregon Iron and Steel company and says:

The company has been searching for two years for a mine, and has at last secured just what it wanted. It is situated about 150 miles south of San Diego, on the coast of Lower California, in Mexico. The mine is a short distance from the beach and about 300 feet above the water. The ore, which is equal to any in the world, yields 65 per cent of magnetic iron, is free of phosphorus and admirably suited for the manufacture of Bessemer steel. The vein is about 10 feet thick and crops out for a distance of 1200 feet. The purchase covers 52 acres. The deeds were made in Spanish, according to the code Napoleon, and are ornamented with revenue stamps to the amount of \$488. The Tepustete Iron Company, which was organized here a few days since, with a capital of \$900,000, will construct a wharf and railroad about a mile long to the property, with large ore bunkers near the shaft. There will be no need for much mining for a while, as there are 100,000 tons of ore on the dump.

The ore is equal to any found in the Lake Superior region, Spain, Cuba or anywhere, and it is convenient for shipment, and cheap transportation by water is assured. The ore used in making Bessemer steel in Pennsylvania is brought by rail from the Lake Superior region at heavy expense on account of cheap fuel in Pennsylvania. The company has an unlimited supply of the best and cheapest fuel, charcoal, at Oswego, and can get ore shipped by water much cheaper than by land.

The securing of this mine will give a great impetus to the iron works at Oswego, as they can now make any grade of iron desired, and will no doubt before long put in a plant for the manufacture of steel. The furnace at Oswego is the only active one on the coast; the pipe foundry is the only one on this coast, and probably before long there will be there the only steel works on the coast.
