

### Wood Train Wrecked.

The regular Sunday wood train on the narrow gauge that left Portland at 8 o'clock Sunday morning, met with a serious accident when two miles north of that place, and approaching a trestle over a spring branch which runs into Sucker lake, Conductor Kennedy, who was on the engine, noticed a large tree which had been blown across the track during the night. Engineer Miller saw the tree at the same time, and being so close to it that it was impossible to stop the train, he shut off the steam and both men jumped off and escaped uninjured. The fireman, John Hohenleitner, did not succeed in jumping off. The engine struck the tree, which the passengers say was about three feet in diameter, and broke it in two. It pushed the engine aside and passed through, leaving a track, and a moment later struck the trestle across the branch which was 16 feet high and 150 feet long. So great was the impetus with which the locomotive struck that it broke some of the ties together over the side, the seven flat cars attached following, while the caboose went off on the other side, making a complete revolution and landing right side up with such force that it was burst completely in pieces. The passengers were thrown from one side to the other of the car as it rolled over, crashing against each side in turn and landing in a heap on the bottom. The locomotive was badly smashed and went half way out of sight in the mud. The brakes having been applied at the rear of the train, the seventeen flat cars behind the caboose remained on the track.

The Southern Pacific officials were notified of the accident immediately after it occurred, and several surgeons were sent to the scene in a special train. They dressed the injuries of the passengers, and liberated the fireman, John Hohenleitner, who had been caught under the engine and flat cars, and dangerously hurt, having been scalded by the hot water from the boiler, and injured internally. He was taken to Oswego, where his parents live, and left at their home. The others were taken to the Portland hospitals.

Coroner R. L. Holman was called to Oswego on Monday to hold an inquest upon the remains of John Hohenleitner who died from his injuries the previous night, Dr. O. Yeargain accompanying him. The jury impaneled consisted of J. W. Hannis, G. W. Frosser, J. W. Thomas, T. J. McFarland, John Bolt and F. S. Morrell. After viewing the body and the scene of the accident they returned a verdict in accordance with the facts, that the man came to his death through the criminal negligence of the company in not having a track walker go over the road on Sunday, especially following so severe a storm. Prosser died in Portland on Tuesday and Brandes is still in a critical condition from internal injuries.

### A Voluminous Document.

County Clerk Geo. F. Horton has received a document two feet by three bearing the signature and seal of the secretary of state and which gives an abstract of the work of the state board of equalization. The assessment in this county is raised as follows: City, village and town property, 30 per cent; mortgages 100 per cent; railroad lands 15 cents per acre, agricultural lands 77 cents per acre, O. & C. R. R. \$350 per mile, P. & W. V. R. R. (narrow gauge) \$200 per mile, telephone and telegraph lines etc., 10 per cent, cattle 10 per cent, horses and mules 10 per cent, sheep and goats 70 per cent, swine 150 per cent, improvements 30 per cent, merchandise and implements 10 per cent, rolling stock on railroads 10 per cent. Deputy Clerk H. S. Strange began the task of figuring out the increase in each item of the assessment yesterday. By the time he finishes that extensive task he will probably be a sadder man.

### The Euphony Club.

Among the city's recent organizations is an orchestra which is rapidly coming into prominence, many of the members having belonged to noted similar organizations. The club has for some time been meeting twice a week for rehearsals under the efficient leadership and instruction of Dr. Emil Schubert who ranks high among trained musicians. The roster of the club is as follows: Dr. Emil Schubert, leader and violinist, Prof. Flacke, b f coronet, C. Michael d b f bass, Chas. Wrinkle clarinet, F. Wourms first violin, J. Friderick second violin, M. Jonstin violin A, Friderick, cello, J. F. Fitzgerald trombone, J. Pollanz, tympana and triangle. The club will give grand ball at the armory hall on Friday evening January 27.

### Teacher's Examination.

Notice is hereby giving that for the purpose of making an examination of all persons who may offer themselves as candidates for teachers of the schools of this county, the county school superintendent thereof will hold a public examination at the court house in Oregon City, beginning February 8 1893 at 1 o'clock p. m. Those desiring to apply for state certificates or state diplomas will apply February 9, 1893, at 9 o'clock p. m.

Dated this 10th day of January 1893, H. S. Gimson, School Supt., Clackamas county, Oregon.

## FRUIT AND FLOWERS

### NOTES ON WINDOW PLANTS.

Suggestions Made by a New York Florist in Popular Gardening.

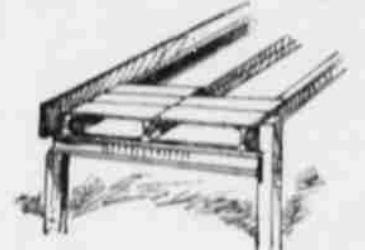

One of the best window plants is always the fuchsia. Speciosa, Lord Byron and Beaconsfield are good sorts to select, as is also the old Rose of Castile. Callas, kept all summer dry or at rest, will start with the greatest readiness. Keep them always abundantly watered, and give them strong light. Geraniums, on the contrary, must not be overwatered. On the whole, there is nothing finer for windows in winter than primroses. These like wood earth and sand. A collection of the bonvardia is very pleasing.

The old China roses are fine for winter. Hermosa, Catherine Mornet and Madame Watteville are good; so also the glorious Papa Gontier. Agrippina and Louis Philippe are two fine old sorts that will bloom well in pots. For back seats, away from the full light, you need begonias and ivies, the latter to twine about to cover bare places. One of the very best of all window plants is the Hoya carnosus or wax plant. Plant in strong soil, set up on a high shelf, seldom repot and train it by tying under the ceiling.

The very best bulb for the window is the Freesia, which requires potting in very rich earth. The morning glory and the Tropaeolum or nasturtium make easily grown vines and bloom delightfully. Sow the seeds, and they are soon on the climb and in full bloom.

### Substantial Greenhouse Benches.

We here reproduce from The American Florist two styles of substantial greenhouse benches. In Fig. 1 the rails used were light T rails, such as are used on some street car lines. The cross pieces

TWO STYLES OF GREENHOUSE BENCHES. are of the same sized rail, only placed right side up, resting on the top of the front cedar post, and mortised into the other cedar post at the back. The three rails that run lengthwise are placed bottom side up, so as to allow a broad flat surface for the slats or other bottom material to rest on. The rails are held in proper position by pieces of board cut so as to fit in the spaces between them. But it is necessary to hold them in place only long enough to get the slats or other bottom material in position.

The cedar posts are sunk eighteen inches in the ground and are placed eight to twelve feet apart. The side board is held in position by galvanized iron strips, which pass through two slits in the board and clasp around the outside rail. These are placed four feet apart. This is the weakest point about this style of bench. The rest is as solid as a rock. For the center benches the same system is followed, the rails being placed at a proper distance apart to suit the size of the slats, etc., used.

The second figure shows a style of bench used by a florist in Minneapolis. Two pieces of large angle iron about 8 by 3 inches run lengthwise of the house on brick piers set down about eight feet apart, and for the bottom short boards are placed crosswise. The illustration is sufficiently plain without further description.

### New Sorts of Currants and Gooseberries.

Mr. J. T. Lovett says: "Fay's Prolific is a success with me and I hear none but good reports of it from my quarter. North Star gives promise of being a valuable variety, especially for the market grower. Black Champion is an improvement upon the old Black Naples. The berries are larger and produced in greater abundance. I am told it is of better quality. The Cranial has some merit for culinary purposes. It is of strong growth, exempt from the attacks of insects and disease and very prolific; but the fruit is too harsh and austere to be acceptable as a dessert fruit. The berries are exceedingly large, almost equalling in size the Delaware grape and are decidedly attractive. The claim that a good jelly can be made from it is founded on fact, as I can bear witness.

The Industry gooseberry has not proved the success with me that it has in many other places. In Monroe county, N. Y., and upon the Hudson river it is giving the greatest satisfaction. I also saw it fruiting in perfection in Atlantic county, N. J., the past season. Although the best of the foreign varieties I have yet tasted, it loses its leaves prematurely and fails to ripen its fruit quite as often as it perfects it.

### A Beautiful Begonia.

Begonia Glorie de Seaux is a distinct and beautiful warm greenhouse plant. It is distinct from any other known variety, and is one of the most valuable sorts of recent years. It is a wonderful flower producer during winter. Its manner of growth and foliage are all that can be desired, the leaves being of a dark bronzy plum color with a metallic luster. The bloom is borne in large, compact trusses, the florets are large and perfect in outline, and in color a delightful shade of pink.

## FRUIT AND FLOWERS

### EFFECT OF WIND ON TREES.

The Repressive Effects of Cold Wind Upon Tree Growth.

Trees which grow in exposed situations have their tops always leaning away in the opposite direction from the prevailing winds, and the casual observer concludes that the branches have been bent by the constant pressure of the wind and retained their position. Now, although such trees have the appearance exactly of trees bending under a gale, still it is not pressure in that way which has given them their shape. The fact is, they have grown away from the blast and not been bent by it after they grew. Examination of the branches and twigs will show this. We hardly realize the repressive effects of cold wind upon tree growth, which it partially or altogether arrests, according to its prevalence.

Conifers show the effects of this more distinctly than other trees. Owing to the horizontal habit of growth of the branches they point directly in the teeth of the gale from whatever direction it comes, and cannot, like the oak, lean over and grow in the opposite direction; hence coniferous trees growing in exposed situations produce good long branches on their lee side, while on the windy side the branches retain their rigid horizontal position, but make comparatively little growth, which is simply suppressed. One instance in substantiation of the foregoing was a Nordmann's spruce, growing in a position fully exposed to the north and south. One branch on the north side of the tree had fifteen annual nodes or growths and was seven feet long, and its opposite had the same number of nodes, being of the same age, but was nearly 2 1/2 feet longer, or 2 1/2 feet, and all the lateral branches were proportionally long and well furnished.

If such a difference as that recorded above is found between the branches of a single tree standing alone in the open, how much more importance is shelter to all kinds of tender trees and shrubs. When damage is done to trees by frost it is done suddenly, and we see the effects and are struck by them, but except in the case of subjects killed outright or greatly damaged, it is probable that injury to trees from frost is almost nil compared to that worked by cold winds. These considerations should influence every one who contemplates planting, whether it be woods or single trees, but in either case it cannot be doubted that the more dense and loftier the enclosure, whether by means of belts or trees or hedges, that protects plantations of any kind from cold winds, and the harder the subjects used for cold positions, the better.

### Instructive Points on Grape Culture.

It is announced that a French grower has discovered a new method of pruning the grape. The cut is made at the node above the point where it is intended the end of the wood shall eventually remain, at the same time destroying the bud found there. The stump thus left is removed the following year, when the death is complete and when at its base a collar has been formed, which soon closes after the dead wood has been removed to its level. The theory is that under this method the wood dies slowly and without decomposition of the tissues.

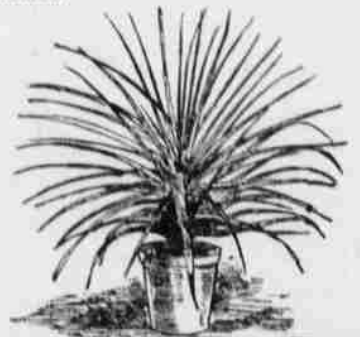

The practice of changing crops more or less systematically has always been found advantageous, and various theories have been offered explanatory of the principles upon which the benefits of rotative cropping depend. The same results have been found in the culture of the grape, as stated by Mr. Saunders, superintendent of grounds and gardens at Washington, who has for a number of years experimented in this matter.

### Wintering Monthly Roses.

The monthly roses are only half hardy, and consequently are likely to be winter killed when the thermometer falls 35 degs. below the freezing point. The best way to protect them, according to excellent authority, is to bend the branches down and fasten them securely within two or three inches of the ground by tying them to stakes driven for that purpose, or if close enough they may be tied to each other. Then spread dry leaves or rough litter over them to a depth of six inches. This should not be done, however, until severe cold weather sets in, so that nearly all the leaves are off the plants and they are thoroughly ripened, which is usually about Dec. 1 in the latitude of New York state. This covering should not be taken off until all danger of severe frost is over, say about April 1.

### A Graceful Palm.

Numbered with decorative plants of decided value is the palm Dracena ludivisa, depicted in the accompanying illustration.

DRACENA LUDIVISA, OR FOUNTAIN PLANT. This attractive palm has gained by its graceful drooping habit the popular name of fountain plant. It is frequently employed for the centers of large vases and baskets. Dracena ludivisa is doubly valuable, for it is not only well adapted to indoor culture, but is one of the most desirable of plants for beds in the open ground.

## BUSINESS LOCALS.

Receipt, note and order books at the ENTERPRISE office.

School department cards one cent each, good for term, at the ENTERPRISE office.

If you want to borrow money apply to C. O. T. Williams.

Lounges, chairs, etc., upholstered at Holman & Walling's. All work guaranteed. Repair all your old lounges for little money and they will be good as new.

Wedding stationery, the latest styles and finest assortment ever brought to Oregon City at the ENTERPRISE office.

C. O. T. Williams is now doing business for himself at the old stand next door to Caulfield & Huntley's drug store.

Justice blanks, real estate blanks, and all other blanks at the ENTERPRISE office. Portland prices.

C. O. T. Williams is now prepared to make very favorable rates on good farm loans.

Buy your paints and oils, windows and doors at the Park Place Store. They are cheaper than elsewhere.

Those contemplating borrowing should ascertain terms offered by C. O. T. Williams.

Bring your produce to the Park Place Store where you can always get the best market price and your goods at the same figures as though you paid cash.

Before buying your winter supplies, call at the Park Place Store. They have one of the best assortment of dry goods, clothing, boots and shoes, millinery and choice family groceries in Clackamas county at prices that tell.

The latest in visiting cards at the ENTERPRISE OFFICE. Prices to suit you.

### For Sale.

Thoroughbred chickens, fine birds, Black Langshaws, Silver Wyandotts, White Pekin ducks. Also a yearling short horned bull. Prices Right. Call on or address L. P. WILLIAMS, Myers Farm.

### About Your Sewers.

Do not forget that A. W. Schwan is prepared and authorized to lay and make connections with the public sewer system of Oregon City and that he can lay your sewers and put in your water closets, sinks, slop hoppers, etc., all properly connected with sewer and water systems at the most reasonable rates. The Oregon City Jobbing Shop, Seventh street near depot.

A. W. SCHWAN, Prop.

### Last Call

All persons indebted to us must call and make a settlement without fail or you will have extra cost to pay. Our business will be closed out.

MAYER & ACKERMAN.

## Portland-Clatskanie ROUTE.

STR. G. W. SHAVER,

J. W. SHAVER, Master.

Leaves Washington street dock, Portland, every Monday, Wednesday and Friday, at 6 A. M., for St. Helens, Kalama, Rainier, Oak Point and intermediate points, arriving at

### CLATSKANIE

At 3 o'clock p. m.

Return trips for Portland following mornings at 6 a. m.

For freight or passenger rates apply to dock clerk at Portland or on board stamer.

This is the nearest and most direct route to the Nehalem valley.

### W. S. MAPLE,

Blacksmithing and Repairing.

Having one of the best shoers in the state in my employ, I make

HORSESHOEING A SPECIALTY.

## OF INTEREST TO YOU!

What the ENTERPRISE has to Offer--The Best Paper for the Least Money of Any in the State.

In order to give a more general acquaintance with the merits of the ENTERPRISE as a newspaper and to introduce it into every home in Clackamas county, it will be sent on a trial subscription until March 15, 1893, for 25 cents.

The ENTERPRISE will be made of special interest to its readers during the next few months. The proceedings of congress, now in session, in view of the present political complications, will be of vital interest to all. A special effort will be made to report them in full for the ENTERPRISE. The Oregon legislature, in session during January and February, promises to be of unusual interest. The most important legislation and radical changes in the laws of the state, attempted for years, will be enacted this winter. Every resident of Clackamas county should keep himself posted as to what is done. The ENTERPRISE will have an experienced reporter in attendance during the entire session, and complete reports will be given each week of all bills introduced, including the publication of those of interest to Clackamas county, and a report of the speeches and votes of our senators and representatives on all important measures. No county paper in the state will give the legislative news as complete as the ENTERPRISE.

As a local paper the ENTERPRISE has few equals in Oregon. Its corps of correspondents cannot be excelled. It gives the county news, city news, circuit, probate and county court and city council proceedings, real estate transfers, correct market reports and a synopsis of the news of the state and nation. Send 25 cents in coin or stamps for a trial subscription. Paper promptly stopped at expiration of subscription unless otherwise ordered.

### Society Directory.

OREGON CITY BOARD OF TRADE. Meets at Court House on Second Monday in each month. Visitors welcome. F. E. DONALDSON, HARVEY E. CROSS, Secretary.

CANBY BOARD OF TRADE. Meets at Knight's Hall, Canby, on first and third Friday of each month. Visitors welcome. S. J. GARRISON, Sec. W. M. KNIGHT, Pres.

MULTNOMAH LODGE, NO. 1, I. O. O. F. Holds its regular communications on first and third Mondays of each month at 7:30 p. m. in the Odd Fellows' Hall. Members and Brethren in good standing are invited to attend. J. T. APPERSON, W. M. T. F. RYAN, Secretary.

OREGON LODGE, NO. 2, I. O. O. F. Meets every Thursday evening at 7:30 o'clock p. m. in the Odd Fellows' Hall. Members and Brethren of the Order are invited to attend. By Order of W. A. Moulton, N. G. Thos. Ryan, Secretary.

FALLS ESCAMPMENT, NO. 4, I. O. O. F. Meets first and third Tuesdays of each month, at Odd Fellows' hall. Members and visiting patriots, cordially invited to attend. A. R. JANNEY, J. W. O'CONNELL, Scribe. Chief Patriarch.

OSWEGO LODGE, NO. 95, I. O. O. F. Meets at Odd Fellows' hall, Oswego, every Saturday evening. Visiting brethren made welcome. G. W. FROSSER, N. G. J. F. HINLEY, Sec.

MEADE POST, NO. 2, G. A. R. DEPARTMENT OF OREGON. Meets first Monday of each month, at K. of P. Hall, Oregon City. Visiting comrades made welcome. GILMAN PARKER, Commander.

GEN. CROOK POST, NO. 22, G. A. R., Department of Oregon. Meets in school house at Needy on first Saturday in each month at 2 o'clock p. m. All comrades made welcome. JACOB SPONLE, J. KARTHAUER, Adj. Commander.

PIG IRON LODGE NO. 135, A. O. U. W. Meets every Thursday evening at Odd Fellows hall, Oswego. Visiting brethren always welcome. R. STRAUB, Recorder. J. U. CAMPBELL, M. W.

MOLALA LODGE, NO. 114, A. O. U. W. Meets First and Third Saturday in each month, at Adams hall. Visiting members made welcome. T. S. STIFF, M. W. J. W. THOMAS, Rec.

TUALITIN GRANGE, NO. 111, P. of H. Meets last Saturday of each month at their hall in Wilsonville. R. B. HENRY, Miss BIDA SHARP, Sec'y. Master.

WARNER GRANGE, NO. 117, P. of H. Meets fourth Saturday of each month, at their hall in New Era. C. C. WILLIAMS, Master. Miss Maggie Brown, Sec'y.

BUTTE CREEK GRANGE, NO. 82, P. of H. Meets at their hall in Marquam, second Saturday in each month at 10 a. m. Visiting members always welcome. J. E. JACK, J. R. WHITE, Secretary. Master.

MOLALA GRANGE, NO. 40, P. of H. Meets at their hall at Wright's Bridge on the second Saturday of each month at 10 a. m. Fellow members made welcome. EUGEN WRIGHT, Master. N. H. DARNALL, Sec.

GAVEL LODGE, NO. 35, A. O. U. W. Meets second and third Saturday evenings at Knight's hall, Canby. Visiting brethren made welcome. W. S. GRIMBLE, O. L. BARLOW, Recorder. Masterworkman.
